

GEOLOGICAL SURVEY OF NEW JERSEY

HENRY B. KÜMMEL, State Geologist C. C. VERMULE, Topographer

ATLAS SHEET No. 27

ORIGINAL SURVEY 1885
PRINCIPAL FEATURES REVISED 1913

NOTE—The shaded lines are level lines drawn on the earth's surface. All points through which they pass are of the same level and their height above mean sea level is shown by the numerical figures. The lines are full lines every 100 feet, and are dotted lines every 50 feet. Figures not on any line show the actual elevation of the surface at a point indicated by a small circle.
