NOTE: The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The size of the figures may vary in the size of the figures with about 10 feet. Figures not on any line show the actual elevation of the surface at a point indicated by a small circle. Figures on blue ground indicate the depth of water at mean low tide.
