

NATURE BY THE NUMBERS

There are lots of numbers found in nature. Birds have two wings while butterflies have four. On your next adventure outdoors try to find the numbers 1 - 10 in nature. Check how many petals are on a flower or look close at an insect to see how many legs it has. Share your observations with a family member and draw or write about them below.

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____
