

Note: This is a courtesy summary of Diesel Private Inspection Facilities (PIF) that have been trained and certified to perform the BART retrofit installation inspection that will satisfy the “Vehicle Inspector” section of the BART Compliance Form.

A One-Time Compliance Inspection is required to be performed upon all regulated on-road diesel vehicles that have had BART installed to confirm installation pursuant to N.J.A.C. 7:27-32.21.

Also, when you call one of these centers, please verify that a trained inspector will be available to examine your vehicle and sign your BART Compliance Form.

<b>Trained and Certified PIF for BART Retrofit Installation Inspection</b>
