The Drinking Water Quality Institute (DWQI), established under N.J.S.A. 58:12A-20, is currently reviewing the health effects, testing and treatment options for cyanotoxins, particularly for Microcystin, Cylindrospermopsin, Anatoxin-A, and Saxitoxin. As part of this effort the DWQI is requesting submittal of data and information related to the following topics for cyanotoxins:

- **Health Effects**: data or technical information concerning the toxicology, epidemiology, toxicokinetics, or other studies related to health effects that should be considered in the development of the standards.
- **Analytical Methods and Practical Quantitation Levels (PQL)**: data or technical information on analytical methods for drinking water and associated Practical Quantitation Levels (PQLs).
- **Treatment Methods**: data or technical information on methods for treatment or removal from drinking water.

Information will be accepted until 5 PM on January 31, 2022.

ALL COMMENTS SHOULD BE SUBMITTED TO DWQI@DEP.NJ.GOV

Additional information on the DWQI can be found at:
