## B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

## C. Accounting Policy

Longevity Plan of New Jersey, Inc is a Medicare PPO that provides medical coverage to members who qualify under the Federal Medicare guidelines. Health premiums received are recognized as income in the month of coverage. Premiums collected are recognized as revenue during the months of coverage. Medical Loss Ratio (MLR) rebates are mandated by the Public Health Service Act. Rebates are accrued if the ratio of medical losses to premiums is below the specified minimum of 85% for Medicare Advantage Plans. Premiums are reported net of reinsurance and MLR rebates.

Net investment income earned consists primarily of interest less investment related expenses. Interest is recognized on an accrual basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other than temporary. Expenses for management and administration of the organization, including acquisition costs such as marketing, are charged to operations as incurred.

#### 20. Fair Value Measurements

#### A. Fair Value Measurement

Inputs used for assets and liabilities measured and reported at Fair Value.

(1) Fair value measurements at reporting date

The Company has categorized its assets and liabilities that are reported on the balance sheet at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels of the fair value hierarchy are defined as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement. The Company has no Level 3 assets or liabilities.

The fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company believes its valuation methods are appropriate and consistent with the guidance in SSAP 100R - Fair value.

## 24. Retrospectively Rated Contracts & Contracts Subject to Redetermination

A. Method Used to Estimate

The Company estimates accrued retrospective premium adjustments for its Medicare health insurance business through a model using the CMS models for the Part D Risk Corridor and Risk Adjustment.

B. Method Used to Record

The Company records accrued retrospective premium as an adjustment to earned premiums.

C. Amount and Percent of Net Retrospective Premiums

All direct premiums written are relating to Medicare Advantage plans and therefore subject to retrospective adjustment based in the CMS programs. Premiums for Medicare Advantage plans are adjusted based on the risk score of the enrolled members. The plan accrues revenue for known changes to members risks scores using the model published by CMS.

D. Medical Loss Ratio Rebates Required Pursuant to the Public Health Service Act

The Company is subject to the minimum loss ratio rebate provisions of the Patient Protection and Affordable Care Act (PPACA). PPACA will require payments to customers covered under the Company's comprehensive medical insurance if certain minimum medical loss ratios are met. Since the accrual reflects the amount of the rebate that would be payable based on year-to-date estimated medical loss ratios, the amount of the rebate will fluctuate as actual claim experience develops each calendar quarter.

E. Risk-Sharing Provisions of the Affordable Care Act (ACA) - Not Applicable
