Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial Statements of the Longevity Plan of New Jersey, Inc (LPNJ or the Company) are presented on the basis of accounting practices prescribed or permitted by the New Jersey Department of Banking & Insurance (the Department).

The Department recognizes Statutory Accounting practices prescribed or permitted by the State of New Jersey for determining and reporting the financial conditions and results of the operation of the insurance company and for determining its solvency under the New Jersey Law. The Department has adopted the National Association of Insurance Commissioners’ (NAIC) Accounting Practices and Procedures Manual as its statutory accounting principle (SAP) basis.

Prescribed accounting practices are those practices which are incorporated directly or by reference to state laws, regulations and general administrative rules applicable to all insurance enterprises domiciled in a particular state. Permitted accounting practices include deviation from NAIC SAP and state prescribed accounting practices specifically requested by an insurer and granted by the Insurance Division.

The Company is a New Jersey-based Medicare Advantage Organization operating a full-service I-SNP in a limited geographic region in New Jersey. The Company’s service area includes participating LTC facilities located in those specific geographic regions. The Company’s target population are institutionalized Medicare beneficiaries who reside or are expected to reside in a contracted LTC facility for 90 days or longer. This plan is offered in New Jersey counties; Atlantic, Bergen, Burlington, Camden, Cape May, Essex, Gloucester, Hudson, Hunterdon, Mercer, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Union, and Warren.

The Department has approved no permitted practices for the Company that differ from NAIC SAP or state prescribed accounting practices. A reconciliation of the Company’s net income and capital surplus between NAIC SAP and practices prescribed and permitted by the department are shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Longevity Plan of New Jersey, Inc is a Medicare PPO that provides medical coverage to members who qualify under the Federal Medicare guidelines. Health premiums received are recognized as income in the month of coverage. Premiums collected are recognized as revenue during the months of coverage. Medical Loss Ratio (MLR) rebates are mandated by the Public Health Service Act. Rebates are accrued if the ratio of medical losses to premiums is below the specified minimum of 85% for Medicare Advantage Plans. Premiums are reported net of reinsurance and MLR rebates.

Net investment income earned consists primarily of interest less investment related expenses. Interest is recognized on an accrual basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other than temporary. Expenses for management and administration of the organization, including acquisition costs such as marketing, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

20. Fair Value Measurements

A. Fair Value Measurement

Inputs used for assets and liabilities measured and reported at Fair Value.

(1) Fair value at reporting date

The Company has categorized its assets and liabilities that are reported on the balance sheet at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels of the fair value hierarchy are defined as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement. The Company has no Level 3 assets or liabilities.

The fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company believes its valuation methods are appropriate and consistent with the guidance in SSAP 100R - Fair value.

Since the accrual reflects the amount of the rebate that would be payable based on year-to-date estimated medical loss ratios, the amount of the rebate will fluctuate as actual claim experience develops each calendar quarter.
