DRBC was formed in 1961 to **manage, protect, and improve the water resources** of the Delaware River Basin.

How can we continue to achieve meaningful improvements to our shared water resources?

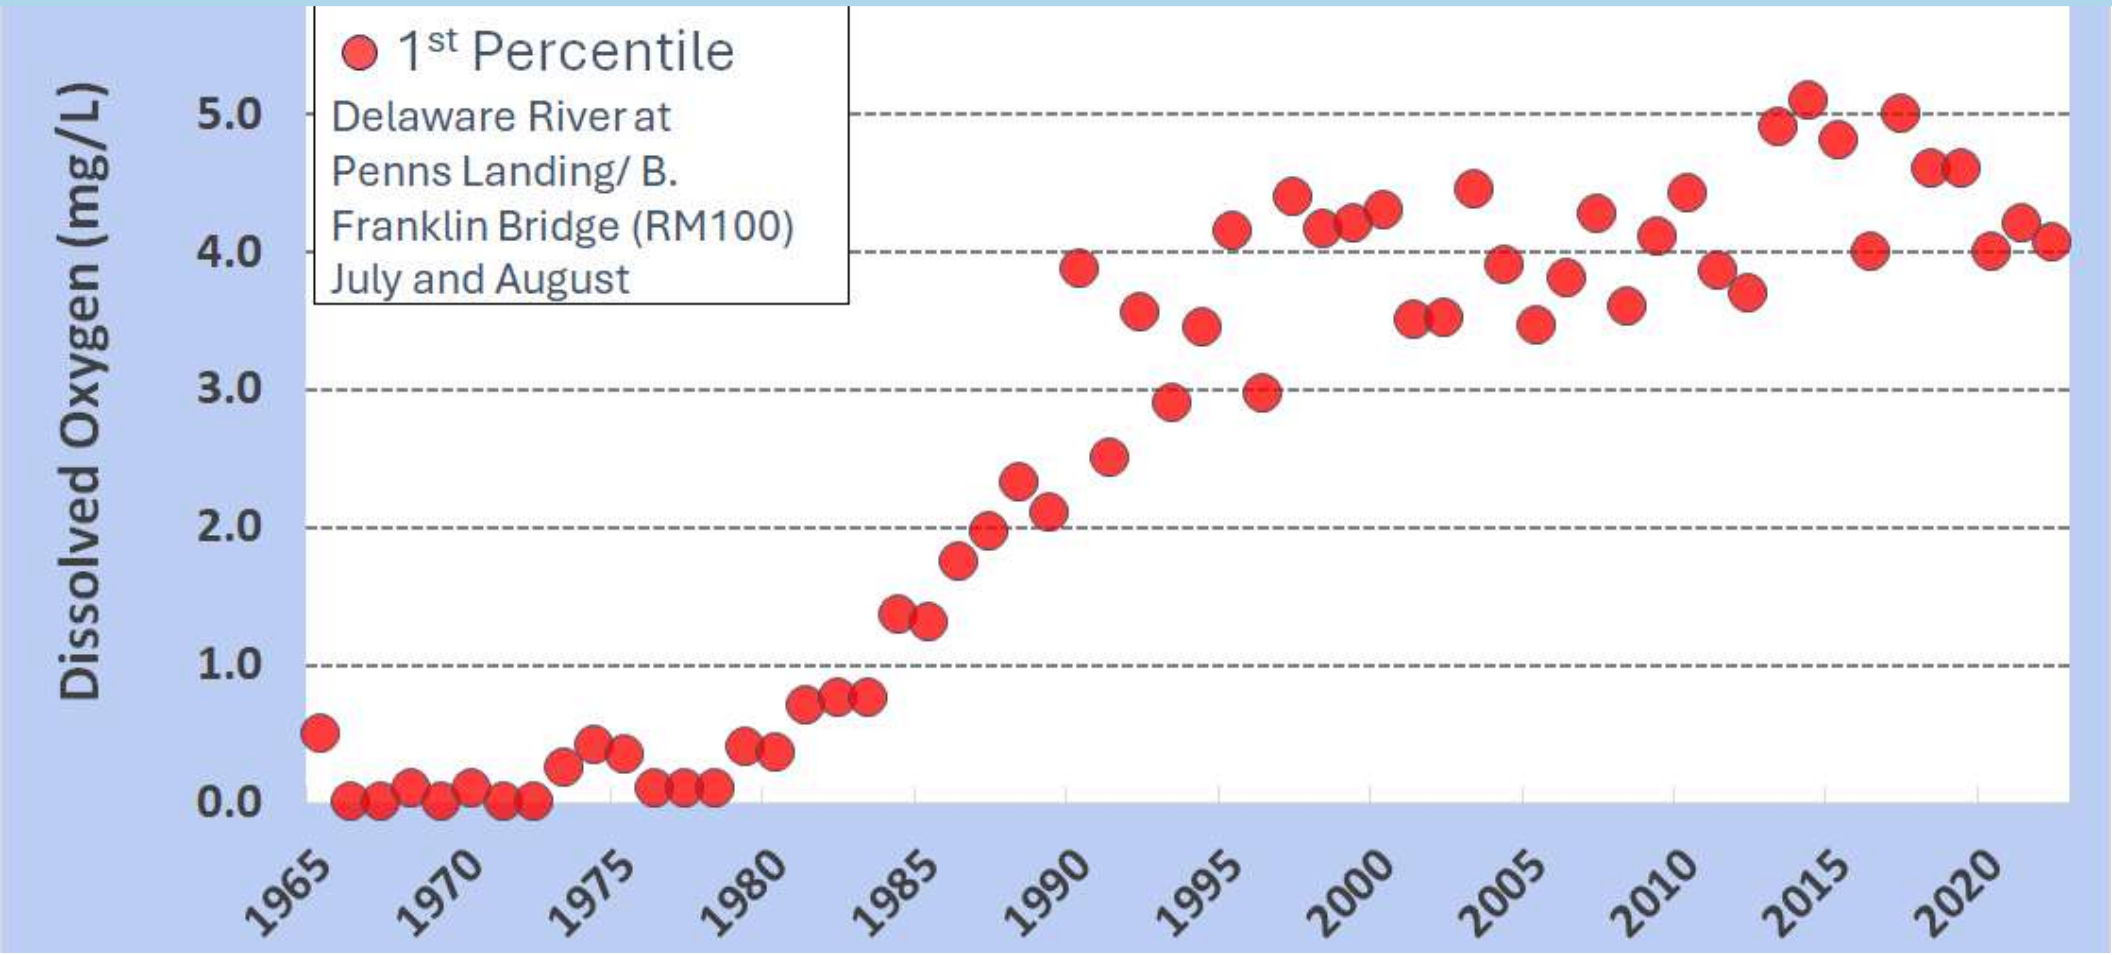
How can the DRBC continue to achieve meaningful improvements to our shared water resources?

How can the DRBC continue to achieve meaningful improvements to our shared water resources?

How can the DRBC continue to achieve meaningful improvements to our shared water resources?

How can the DRBC continue to achieve meaningful improvements to our shared water resources?

DRBC is supporting implementation of new DO criteria that will provide a significant ecological boost to the estuary.



DRBC is adapting the traditional climate resilience framework to specifically apply to water resources at a Basin level.

WATER RESOURCES RESILIENCE PLAN
