

# *Our Shared Waters*

## A LOOK AT THE DELAWARE RIVER BASIN

### Our Shared Waters: A Look at the Delaware River Basin

is a DRBC-managed community engagement & public outreach program of multiple Delaware River Basin stakeholder groups, including non-profits, businesses and government organizations. Bringing folks together across sectors fosters important community connections and enables information sharing about Basin water resource issues & our efforts to protect them.

### Our Shared Waters: Program Goals

Educate the public and decision makers about the current state of the Basin and the opportunities available to support its continued sustainability now and for future generations.

Connect people to their local waterways & to one another. Share information about partner efforts & DRBC public input opportunities.

Uplift the voices of our publics, stakeholders and partners who have a shared interest in protecting our water resources.

# Our Shared Waters: Partner Benefits

- Join a network of nearly 100 partners!
- In-person & virtual networking opportunities with partners, legislators and others working in water
- Author blog posts featured on the Our Shared Waters website and shared with our partner & social networks
- Share your organization's news & events via Our Shared Waters' social media and quarterly partner newsletter
