Notes:

1.,2. Milepost with an "R" indicates a station equation milepost due to a route implemented after the September 2015 FERC Filing. All mileposts without an "R" indicates that the route has not changed since the September 2015 FERC Filing.

3. Agricultural Land - Active cropland, pasture, orchards, vineyards, and/or hay fields;

4. Forest And Woodland - Tracts of upland or wetland forest or woodland that would be removed for the construction row or extra work or staging areas;

5. Open Land - Non-forested lands, herbaceous and scrub-shrub wetlands, and maintained utility row;

6. Residential Land - Residential yards, residential subdivisions, and planned new residential developments;

7. Industrial Or Commercial Land - Electric power or gas utility stations, manufacturing or industrial plants, landfills, mines, quarries, commercial or retail facilities, and roads;

8. Open Water – Water crossings greater than 100 feet.

9. Permanent impacts to forest/woodland were calculated for the entire 50-foot permanent ROW, however, only the management of the 30-foot wide cleared permanent ROW in upland forests and 10-foot wide cleared operational ROW in wetlands will require the permanent removal of trees in these forested areas.

10. Temp. ROW – Temporary ROW for construction of the project; includes temporary ROW and additional temporary workspace (ATWS). All units in acres and rounded to the nearest 0.1. Values of 0.0 represent impacts less than 0.05

11. Perm. ROW – New permanent ROW; all units in acres and rounded to the nearest 0.1. Values of 0.0 represent impacts less than 0.05 acre and are included in the total project impacts.

12. The totals shown on this table may not equal the sum of addends due to rounding.

13. Total Perm. ROW does not include aboveground facilities or access roads.
