Cranford High School Teacher Wins \$25,000 Milken Family Foundation Award *2003 Winner Announced this Afternoon in Union County*

Governor James E. McGreevey and Commissioner of Education William L. Librera, in collaboration with the nationally lauded Milken Family Foundation, are pleased to announce Amy Biasucci, a Cranford High School teacher, is the recipient of a 2003 Milken Family Foundation National Educator Award.

Biasucci, who holds a Bachelor of Science degree in education from Rutgers University - Cook College, has taught since 1996. She is currently an advanced placement environmental and marine science teacher at Cranford High School in Union County, where she has taught since 1998.

The state of New Jersey and the Milken Family Foundation are in the second year of a partnership. Founder Lowell Milken, the foundation's chairman, created the award program in 1985.

"Today, the state is proud to honor Amy Biasucci with a 2003 Milken National Educator Award," Commissioner of Education William L. Librera said. "She is precisely the type of teacher Governor McGreevey and I are pleased to recognize. Her dedication and her desire to bring out the best in her students should be shared statewide."

Since 1985, the Milken National Awards Program, which honors teachers, principals and specialists in public education from kindergarten through 12th grade, has become the largest teacher recognition program in the United States. This year, two award recipients will be recognized in New Jersey. There were six recipients last year.

By the end of October, the foundation will have presented about \$50 million to nearly 2,000 educators nationwide. The award was first presented in 1987 in California.

The foundation's chief goal recognizes that outstanding teachers who continue to learn are essential in fostering student growth, improving schools and enhancing the education profession.

Biasucci's excellence in the classroom befits the Governor's 21-point plan for education reform. Lauding teachers who continue to provide quality education for students statewide is paramount for Governor McGreevey and the Department of Education.

Biasucci received the award during a surprise assembly attended by Commissioner Librera and other distinguished guests, including Lucille Davy, Governor McGreevey's Special Counsel for Education.

"The state of New Jersey is extremely fortunate to have such wonderful examples of excellence in the classroom," Commissioner Librera said. "We are dedicated to recognizing teachers like Amy Biasucci and sharing their successes so that we can continue to celebrate the many fine efforts of teachers statewide."

Teachers are recommended for the prestigious award without their knowledge by a blue-ribbon panel appointed by a state's Department of Education. Recipients of the Milken Awards are selected based on the following criteria:

- Exceptional educational talent as evidenced by outstanding instructional practices in the classroom, school and profession;
- Outstanding accomplishment and strong, long-range leadership potential for professional and policy leadership; and
- Engaging and inspiring presence that motivates and impacts students, colleagues and the community at large.

Biasucci and other recipients nationwide are presented with their \$25,000 award checks at the Milken Family Foundation National Education Conference, an all-expense paid professional development conference held in

Washington, D.C. They also join the Milken Educator Network, a coalition of more than 1,700 top educators who have access to a variety of expert resources to help cultivate and expand innovative programs in their classrooms, schools and districts.
