

NJSLEDS Special Education Scenarios

While the Special Education Student Data Handbook outlines the data elements and validation rules, this document outlines some of the common scenarios in the Special Education Submission and provides explicit clarification to some of the common misconceptions related to the Special Education Submission.

Students to Include in the Special Education Submission:

1. All students with an IEP in effect on the snapshot date (October 15, 2024) for whom the district has CST responsibility.
2. All students included in the district's Special Education submission last year who were declassified or determined ineligible after the previous year's snapshot date (October 13, 2023).
3. All students referred for evaluation after their third birthday who have a parental consent to evaluate date between July 1, 2023 and July 16, 2024.
4. All children referred for evaluation before their third birthday who have a referral date between July 1, 2023 and June 30, 2024.
5. All students who meet the following three criteria: 1) referred for evaluation after their third birthday and have a parental consent to evaluate date between July 1, 2023 and July 16, 2024, or referred prior to their third birthday and have a referral date between July 1, 2023 and June 30, 2024, 2) have an eligibility determination date, and 3) left the district prior to this year's snapshot date (October 15, 2024).

Students to Exclude from the Special Education Submission:

1. Special education students who have been parentally placed in non-public schools.
2. Students for whom the district does not have CST responsibility *with the exception of students who meet the criteria detailed in No. 5 above.*
3. Students whose new referral was withdrawn, or for whom the Child Study Team (CST) found that evaluations were not warranted, or for whom parents refused or revoked their consent to evaluate.
4. Students who leave the district after being referred and prior to receiving an eligibility determination.
5. Students who attend a vocational school full time.
6. Special education students who are not receiving services because they are home school students for whom the district does not provide services.
7. Students found eligible for special education services prior to the previous year's snapshot date (October 13, 2023) who transferred out of the district on or before the current year's snapshot date (October 15, 2024). *Note: students the district found eligible for special education services after the previous year's snapshot date (October 13, 2023) and prior to this year's snapshot date (October 15, 2024) must be included in this year's submission, regardless of their current district status.*

8. Special education students who transferred into the district after this year's snapshot date (October 15, 2024).
9. Students who were referred after their third birthday, have a parental consent to evaluate date after July 16, 2024, and do not yet have an eligibility determination date. These students should be reported in next year's Special Education Submission (i.e. Fall 2025).
10. Children who were referred before their third birthday, have a referral date after June 30, 2024 and do not yet have an eligibility determination date. These children should be reported in the next year's Special Education Submission (i.e., Fall 2025).

New Referrals

Data to be reported (in addition to the student demographic information of LID, SID, First Name, Last Name, Date of Birth, and grade level)

Scenario: New referral from Part C, Early Intervention Services, child is found eligible, IEP implemented, no annual review.

Description: Child is served by Part C Early Intervention services and referred prior to their third birthday; the referral date is between 7/1/23 and 6/30/24, and child is receiving services as of the 10/15/24 snapshot date. The child has not yet had an annual review meeting.

Scenario: Student is Receiving Services, Consent is Revoked

Description: Student is receiving Special Education services, had an annual review after 10/13/23, then parents revoked consent for services before 6/30/24.

Note: Student does not get reported since the student is not receiving special education services on the snapshot date of 10/15/24 and their referral and evaluation process information has been reported previously.

Exited Students

Students who were new referrals (referred on or after 7/1/23) or found eligible after the previous year's snapshot date of 10/13/23, but exited **special education** on or before the current year's snapshot date of 10/15/24 because of one of the following reasons:

- Dropped out
- Deceased
- Reached maximum age
- Moved and are known to continue
- Moved and known not to continue
- Graduated

NOTE: The above students should be reported to the current year's Special Education submission so the state maintains a record of the referral and evaluation process that each underwent. The students should be reported as inactive students in the Special Education submission and must also be inactivated in the Student Management fall submission.

Transfer Students

Students Transferred Out

Scenario: A student was found eligible for services after the previous year's snapshot date (10/13/23) and transferred out of the district to another school district after the end of the previous school year but on or before the current year's snapshot date of 10/15/24.

These students need to be included as inactive students in the current year's Special Education Submission for the NJDOE to have a record of their referral and evaluation process, which is required under IDEA Part B Section 618.

Scenario: A continuing special education student (one found eligible prior to the previous year's snapshot date of 10/13/23) transferred out of the district to another school district on or before the current year's snapshot date of 10/15/24.

Description: Student is eligible for services but transferred out of the district after the end of the previous school year but on or before the current year's snapshot date of 10/15/24.

DO NOT INCLUDE in your district's submission file –this student will be reported by the district with CST responsibilities for the student. Include the student as inactive in the fall Student Management submission.

Students Transferred into a District

Scenario: A continuing special education student (one found eligible prior to the previous year's snapshot date of 10/13/23) transferred into the district from another school district after 10/13/23 but on or before 10/15/24.

Description: Student was eligible for services last year and reported by the other district in the 10/13/23 submission file but has since transferred to the district on or before 10/15/24.

The new district (the one the student transferred into) will report the student, including any reevaluation or annual review dates that occurred between 10/13/23 and 10/15/24, even if those meetings were held by the original district.

Scenario: A student, who was referred in another district on or after 7/1/23 and found eligible for services, is transferred into the district on or before 10/15/24.

Description: Student was eligible for services but transferred into this district between 7/1/24 and 10/15/24.

The old district (the one the student transferred from) should report the student as inactive and include all information regarding the referral and evaluation process that took place in the prior year, including the referral date, the parental consent to evaluate date, the initial process reason delay code, if applicable, and the consent to implement the initial IEP date.

The new district (the one the student transferred into) will report the student as an active student and also include all information pertaining to the referral and evaluation process, even if those meetings were held by the original district.

Two Referral Chains

Scenario: Two referrals, both processes completed.

Description: Student was referred and found either eligible or ineligible after the previous year's snapshot date of 10/13/23. Student is then either declassified (if found eligible) and then re-referred, or re-referred (if originally found ineligible). The student is then found eligible with this new referral.

Data reported would use the data from the second referral (use the most recent referral date, consent to evaluate, eligibility determination, etc.).

Scenario: Two referrals, one process completed the other in progress.

Description: Student was referred and found eligible on or after 7/1/24. Student received services and was declassified (e.g. 5/2/24). Student is then re-referred several months later (e.g. (9/1/24) and consent to evaluate is received two weeks later (e.g. 9/15/24). Eligibility meeting won't occur until after 10/15/24.

Data reported would use the most recent referral and consent dates.

Scenario: Two referrals, one process completed, the other in progress, student receiving services on 10/15/24 based on the first referral.

Description: Student was referred and found eligible for Speech/Language on or after 7/1/24. Student has an IEP in effect for Speech/Language on 10/15/24 and is receiving services. Student was referred for Special

Ed/Related services on 9/1/24. Consent to Evaluate was received on 9/15/24. Eligibility Determination meeting will not be held until after 10/15/24.

Data reported would be only the current referral for Special Ed/Related services, **not** the Special Ed services from the Speech Evaluation.

Concurrent Chains

Scenario: Two referral processes, both open and occurring within the same time frame.

Description: Student is referred for Speech/Language on or after 7/1/23 and also has a Consent to Evaluate. Eligibility Determination meeting will not occur until after 10/15/24. Student also has a referral for Special Education and Related Services on or after 7/1/23 and also has a Consent to Evaluate. Again, The Eligibility Determination will not occur until after 10/15/24.

Data reported would be only the current referral for Special Ed/Related services, **not** the Special Ed services from the Speech Evaluation.
