Subject: public comment on september 7 clean power meeting, which i cannot attend but do have comments for
Date: Saturday, August 18, 2018 2:44:14 PM

we need to keep down increases in rates. we cannot afford. this should be able to be done for the same rates as are being charged presently because sunshine is free.
i am not in favor of being gored for more money to live in nj , the highest taxed state in t his country. i am sick to death of trying so hard to pay all teh bills that this state legislature puts on people who live here. besides paying local, county, state and federal taxes. we are being taxed to death in this state. everybody who can move is moving. the rest are being massacred with taxes. we cannot afford more payout. we cannot afford more taxes. we cannot afford higher energy charges. this comemtn is for the record for htis september 7 meeting. jean pubilee jeanpublic1@yahoo.com
