Subject: [EXTERNAL] Comments on the EMP draft
Date: Monday, September 02, 2019 1:39:24 PM

The 2019 draft Energy Master Plan is an important first step in New Jersey's approach to combating climate change. However, I believe the situation is dire and more must be done if we are to fight this growing emergency.

The EMP specifies a goal of 100% carbon neutral energy by 2050 but the goal here should be 100% clean renewable energy by that date. The Plan should also include guidelines for constructing new power plants and compressor stations. And there must be a moratorium on fossil fuel projects.

Please protect the health and well being of New Jerseyans by ensuring that we have clean air and a livable climate.
