Subject: [EXTERNAL] 2019 Draft Energy Master Plan comment
Date: Monday, September 16, 2019 11:17:01 AM

Please keep your campaign promise and make NJ a leader in the fight against global warming and climate change. Please continue to push for clean air and water and especially clean energy for us and future generations.

Please protect our land even more by enacting a moratorium on all new fossil fuel projects in our state.

The technology is here and the price is right to move to solar and wind power to generate electricity for our residents. Put the budgeted money into clean projects and clean jobs. There is no need for new fossil fuel infrastructure in any part of the state for any reason!

Thank you for your time.
Susan Golden
