Key Data Caveats

- This document is intended to show directional trends to indicate overall consumer activity.
- Caution should be taken when trying to compare numbers across categories for a variety of reasons:
 - Some numbers are at a household level (e.g., account transfers) where others are at an individual level (e.g., plan selections).
 - Duplication may exist at some steps and consumers may show up in multiple places (i.e., mixed household eligibility will show up in account transfer and plan selection, or consumers may create more than one account unintentionally)
- This document is inclusive of medical plan information only; it excludes dental plan information.
- The data represents a snapshot in time and calculations are subject to change. Changes in the figures will occur as individuals update applications and plan selections throughout the Open Enrollment period.
