

**ASSEMBLY BILL NO. 3683  
(Second Reprint)**

To the General Assembly:

Pursuant to Article V, Section I, Paragraph 14 of the New Jersey Constitution, I am returning Assembly Bill No. 3683 (Second Reprint) with my recommendations for reconsideration.

We are fortunate to have dedicated health and personal care professionals, who travel to patients' homes to perform support services that are often critical to the health, well-being and quality of life of some of our State's most vulnerable citizens, often under difficult conditions and in physically and emotionally demanding circumstances. These services are especially valuable to our aging population, who may be subject to limitations on their mobility such that they are unable to easily commute to and from a hospital or doctor's office, or require medical and personal assistance simply to get through a day at home. To provide treatment and care, home care service agencies deploy hard-working, trained professionals who do not utilize emergency service vehicles. Rather, these home care service employees drive unmarked, non-emergency vehicles that are subject to normal parking restrictions, even in areas where parking is very limited.

In densely populated areas of the State, patients in need often suffer from delayed service and limited treatment because health care service employees are unable to park their vehicles anywhere near the patient's home, or must truncate the provision of services to feed the meter or move their vehicles. This bill seeks to alleviate some of these concerns and I commend the sponsors for creatively addressing the issue.

While it is important to ensure that home care service employees are able to more readily provide services to those in need by removing practical obstacles such as travel and parking restrictions that would otherwise interfere with or unduly burden the delivery of these much-needed services, we can accomplish that result without creating undue

administrative burdens and while limiting opportunities for abuse of this salutary program. Accordingly, I am recommending sensible changes to the bill that will address some of the concerns articulated by the State's Motor Vehicle Commission ("MVC"). The bill tasks the MVC with the responsibility for creating and administering the new placard program, but does not provide sufficient resources for that purpose. As such, I am recommending that a renewal fee be implemented to offset the costs associated with launching a new program within the MVC. Additionally, the bill should include safeguards to minimize misuse of the placards and prevent fraud that would compromise the entire program and its successful implementation. To enable more effective enforcement and reduce the potential for abuse, I am suggesting certain changes that will require better information-sharing and reporting by home care service agencies, tighten up the procedural protections, and strengthen compliance.

Accordingly, I herewith return Assembly Bill No. 3683 (Second Reprint) and recommend that it be amended as follows:
