

SEVERE AND FATAL PEDIATRIC INFLUENZA: CDRSS QUICK ENTRY GUIDE

- Once logged into CDRSS, enter or access the CDRSS case. If the outbreak section does not yet appear in the case, go to the navigation bar and select “Outbreak Information”

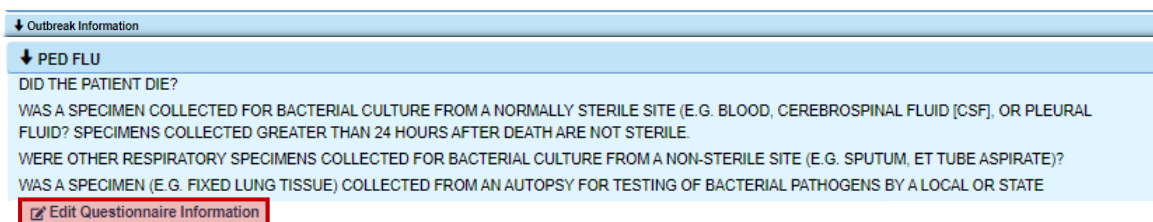

- Next, you will need to add an investigation to a case. From the Outbreak/Investigation, click on the radio button for “Investigation” and then find “I-2021-19704” from the drop down and click save. The outbreak will now appear in the case.

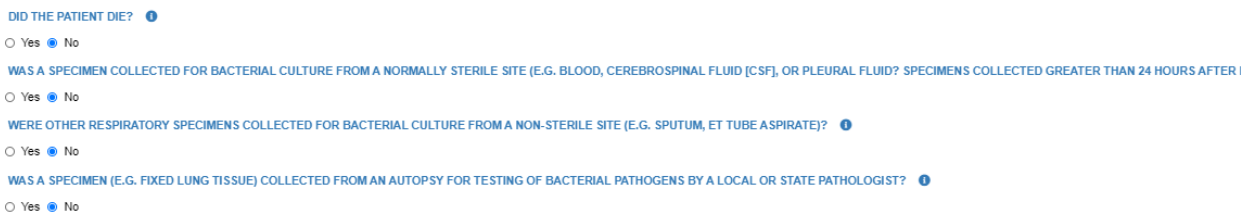

The screenshot shows the 'Outbreak/Investigation Information' form. Under the 'Choose:' section, the 'Investigation' radio button is selected. Below it, the 'Investigation#' dropdown menu is open, showing a list of options including 'I-2021-19704', which is highlighted in red.

- To modify the survey, click “Edit Questionnaire Information” and this will display a pop-up box with questionnaire.

The screenshot shows the 'Outbreak Information' section of the case. Under the 'PED FLU' heading, there are several questions related to specimen collection and patient status. At the bottom of this section, the 'Edit Questionnaire Information' button is highlighted with a red box.

- Complete the questionnaire and click save.

The screenshot shows the questionnaire form with the following questions and radio button options:

- DID THE PATIENT DIE?**
 - Yes
 - No
- WAS A SPECIMEN COLLECTED FOR BACTERIAL CULTURE FROM A NORMALLY STERILE SITE (E.G. BLOOD, CEREBROSPINAL FLUID [CSF], OR PLEURAL FLUID)? SPECIMENS COLLECTED GREATER THAN 24 HOURS AFTER DEATH ARE NOT STERILE.**
