

New Jersey Department of Health and Senior Services
Communicable Disease Service
Influenza Activity Summary
Week Ending October 13, 2007 (MMWR Week 41)

Influenza activity level: **NO ACTIVITY**

No Activity- At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases

Sporadic – At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the state within previous 3 weeks **OR** at least one laboratory confirmed outbreak in an institution anywhere in the state

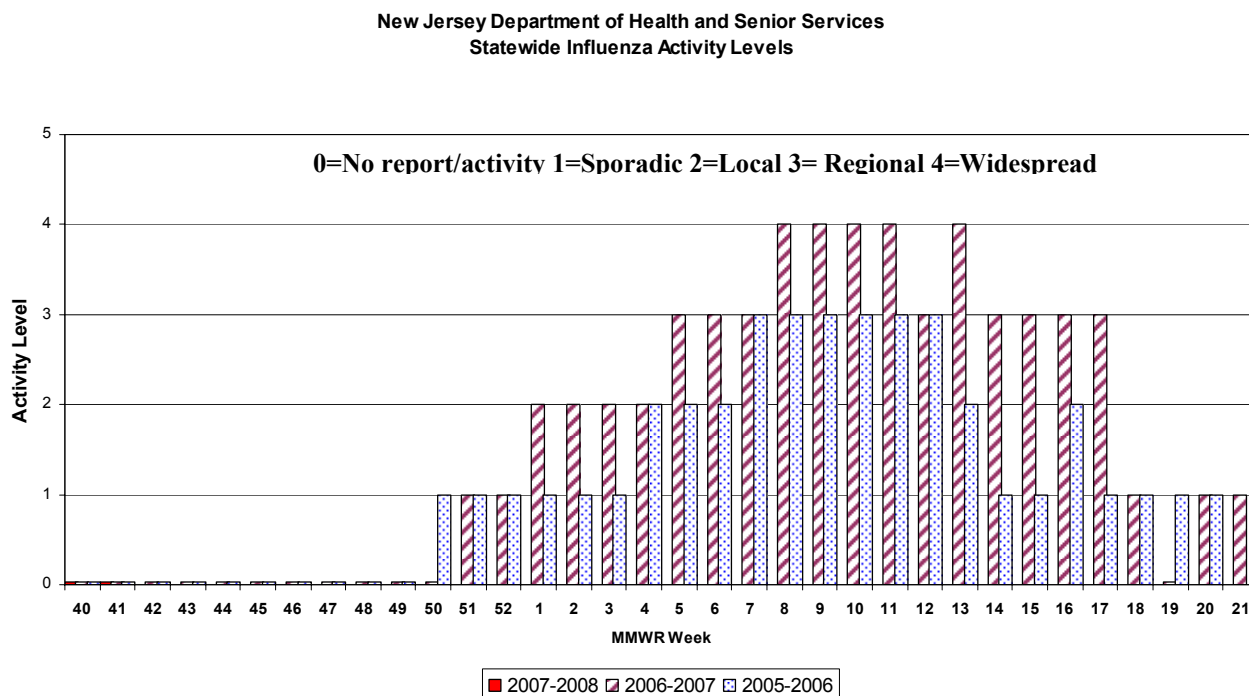

Local – At least 2 or 3 parameters above state baseline in a single county **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county

Regional – At least 2 of 3 parameters above state baseline in ≥ 2 but ≤ 10 counties **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in ≥ 2 but ≤ 10 counties

Widespread – At least 2 of 3 parameters above state baseline in > 10 counties **OR** institutional outbreaks in > 10 counties **AND** lab confirmed influenza cases in previous 3 weeks.

Parameter = School, emergency department, or long term care weekly surveillance data

Baseline is calculated by taking the average of statewide percentages of ILI for a 4 year (2004, 2005, 2006, 2007) period during months when influenza is less likely to be circulating (May-August). Weeks in which less than 4 counties reported were not included in the calculation.

Regional Data

NO ACTIVITY- ALL REGIONS

NOTE: No laboratory confirmed influenza cases were received from any counties.

Public Health Regions

NW Region (Morris, Passaic, Sussex, Warren)

NE Region (Bergen, Essex, Hudson)

CW Region (Hunterdon, Mercer, Somerset)

CE Region (Middlesex, Monmouth, Ocean, Union)

South Region (Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Salem)

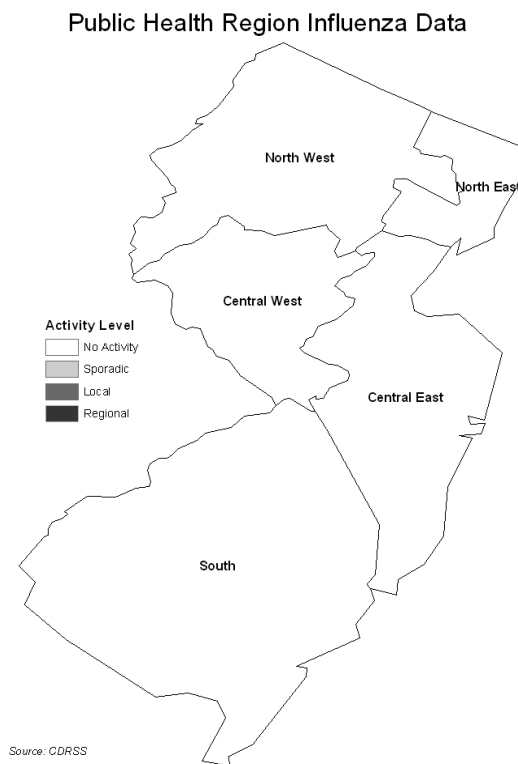

No Activity- At least 2 of 3 parameters at or below state baseline **AND** no lab confirmed cases in the public health region

Sporadic – At least 2 of 3 parameters above state baseline **AND** confirmed laboratory cases anywhere in the public health region **OR** at least one laboratory confirmed outbreak in an institution anywhere in the public health region

Local – At least 2 or 3 parameters above state baseline in a single county of a public health region **AND** confirmed laboratory cases from that same county within the previous 3 weeks (other counties may be above baseline without lab confirmed cases) **OR** confirmed outbreaks in 2 or more institutions in a single county of a public health region

Regional – At least 2 of 3 parameters above state baseline in at least half of counties of public health region **AND** laboratory confirmed cases from these same counties in past 3 weeks **OR** confirmed outbreaks institutions in at least half of counties of public health region counties

Widespread – Not used for public health region data

Laboratory Surveillance

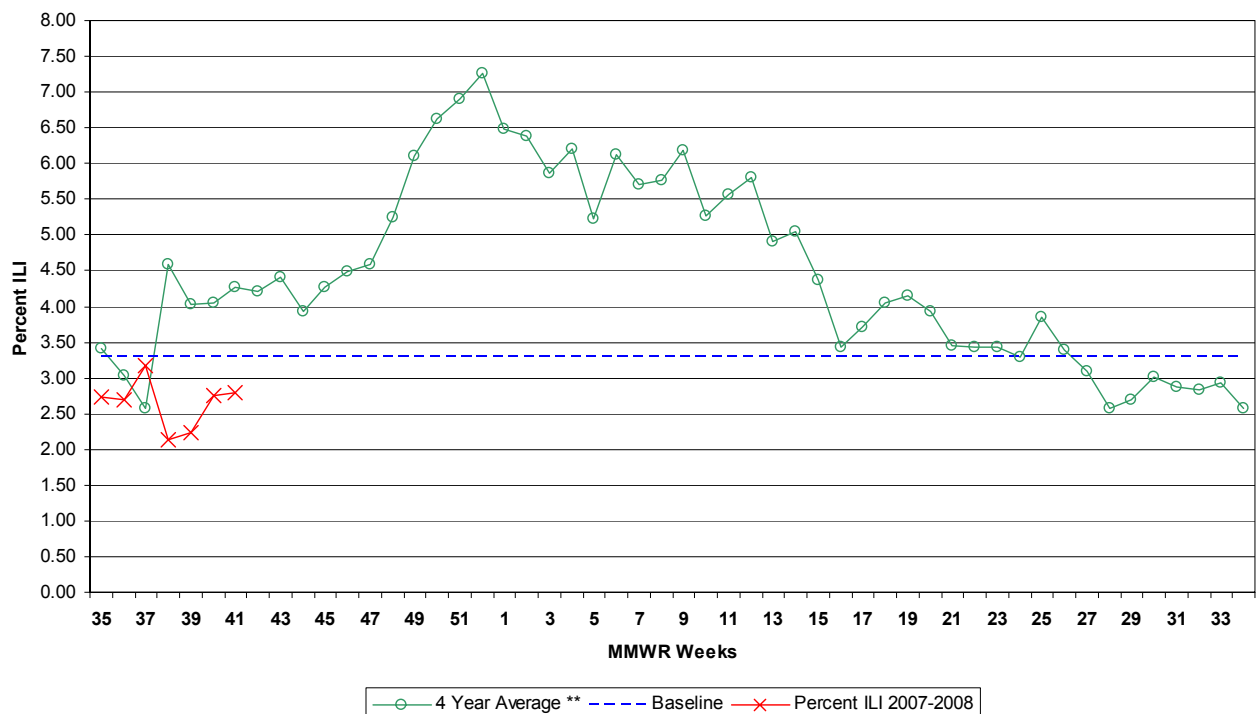

To date, no specimens have been positive by culture for influenza.

Influenza-like Illness (ILI) Surveillance*

Emergency Departments

During week 41, 2.80% ILI was reported statewide from emergency departments. This is an increase over the previous week (2.75%). The percent ILI for each county ranged from 0.00 to 7.55%. The percent ILI for this same week last year was 3.73% in emergency departments. The percent ILI for the northwest (6.30%) and central east (3.39%) public health regions were above state baseline (3.30%).

Influenza-like Activity - Emergency Departments**

Long-term Care Facilities

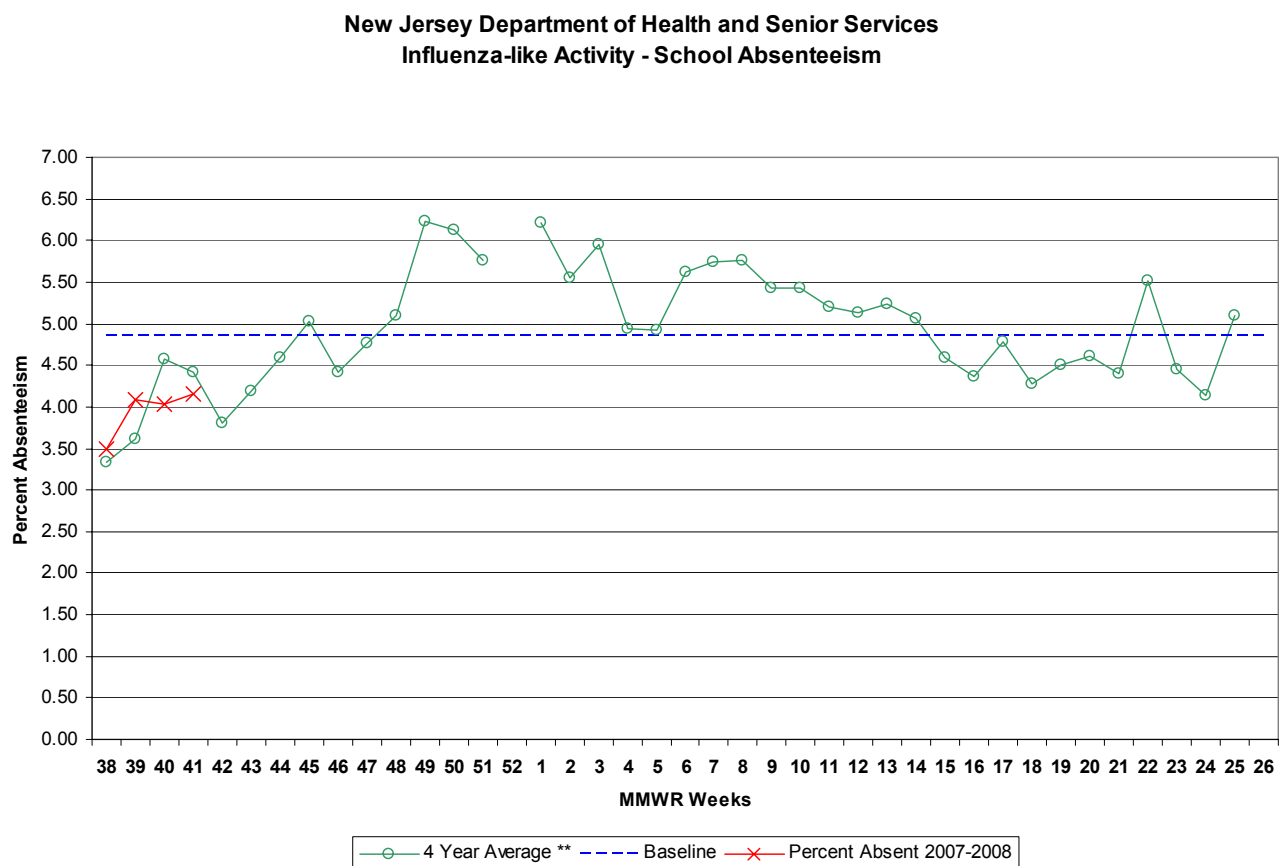

During week 41, 0.58% ILI was reported statewide from long term care facilities. This is a decrease over the previous week (0.62%). The percent ILI for each county ranged from 0.00% to 4.55%. The percent ILI for this same week last year was 1.05% in long-term care facilities. The percent ILI for the northwest (0.98%) and northeast (2.63%) public health regions were above state baseline (0.86%). No report regarding ILI/respiratory outbreaks in communal living facilities were received in week 41.

New Jersey Department of Health and Senior Services Influenza-like Activity - Long Term Care Facilities

School Absenteeism

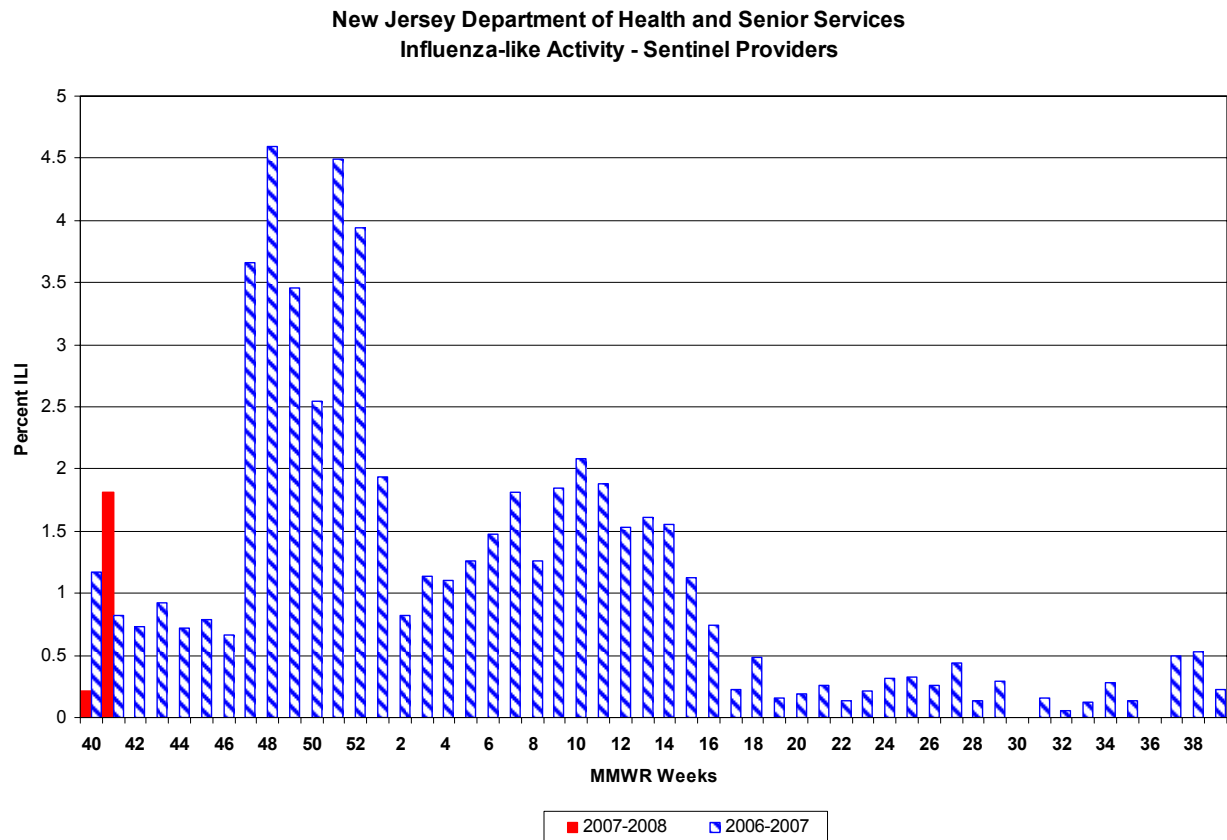

During week 41, schools reported 4.15% absenteeism. This is an increase over the previous week (4.03%). The percent ILI for each county ranged from 1.48– 8.79%. The percent absent for this same week last year was 3.69%. The percent ILI was not above state baseline (4.85%) for any public health region.

Sentinel Provider Surveillance

During week 41, 1.81% of sentinel provider patient visits were due to ILI. These data reflect reports from four (10%) of the enrolled sentinel providers.

During week 40, 0.21% of sentinel provider patient visits were due to ILI. These data reflect reports from seven (18%) of the enrolled sentinel providers.

Pediatric Influenza Surveillance

To date, NJDHSS has not received any reports of pediatric illness.

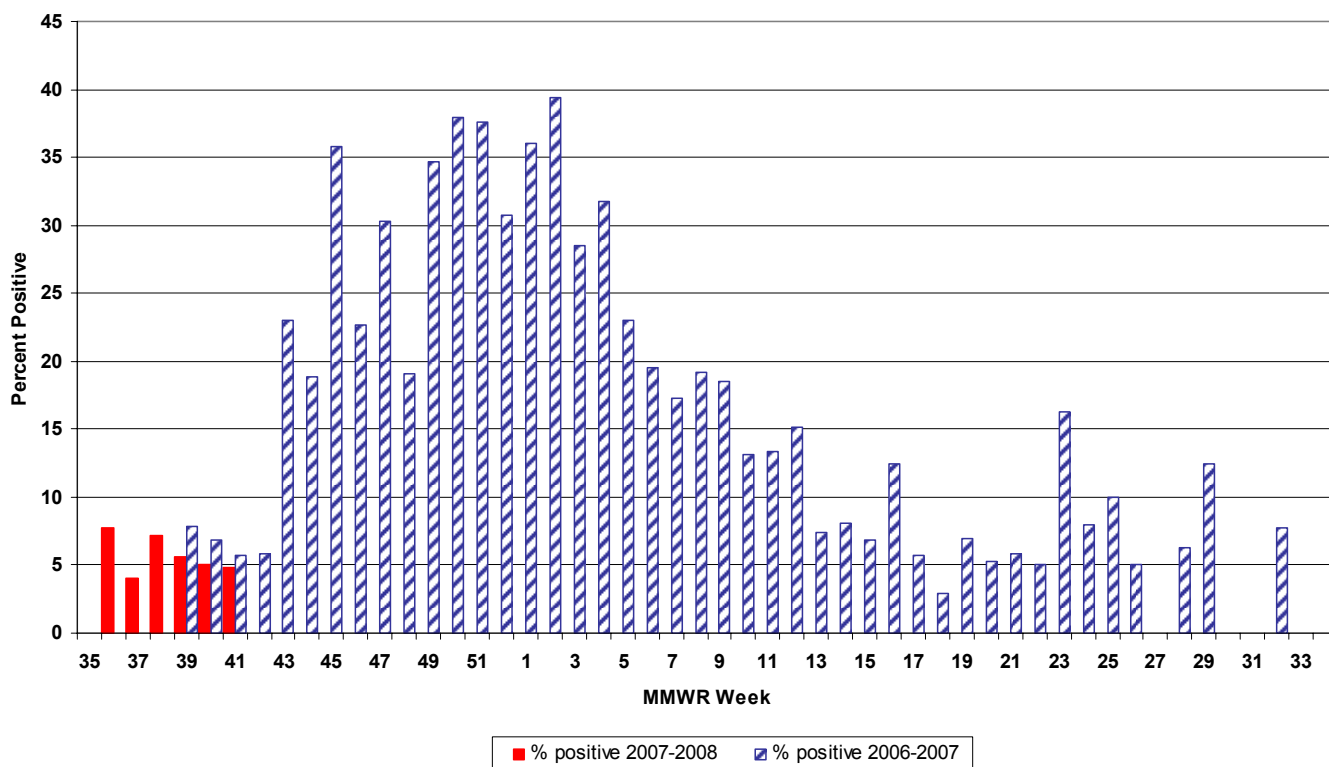

122 City Mortality Report

During week 40, 3.59% of all deaths reported by the vital statistics offices in 6 New Jersey cities (i.e., Camden, Elizabeth, Jersey City, Newark, Paterson, Trenton) were due to pneumonia or influenza. This is a decrease over the previous week (3.59%). The percentage of death due to pneumonia or influenza for this same week last year was 2.78%.

RSV Reports

During week 41, 4.84% of all RSV samples tested were positive. This was a decrease over the previous week 5.04%. The percent of samples positive RSV for this same week last year was 5.71%.
