COVID-19 (Coronavirus 2019) QUICK FACTS

Know the signs
Although COVID-19 is an illness caused by a new strain of coronavirus, it is not much different than other respiratory viruses. Learn more below!

Symptoms of COVID-19

- fever
- cough
- shortness of breath

IMPORTANT POINT!
Most people have mild symptoms and get better on their own at home. Those most at risk for severe illness are the elderly and those who have other health problems.

WHEN TO SEEK MEDICAL HELP!
If you have any of the following, you should call your health care provider:
- difficulty breathing
- high fever
- other unusual or concerning symptoms

Prevention tips
Preventing COVID-19 is much like preventing other respiratory illnesses like colds and flu.

- wash your hands
  Wash them often with soap and water.

- don’t touch your face
  This is the easiest way for germs to get into your body.

- keep sanitizer close
  Use sanitizer with at least 60% alcohol, use it often and tell children and people around you to do the same.

- avoid sick people
  This help you keep from being exposed to other people’s germs. COVID-19 spreads most easily when people have symptoms.

- stay home
  Stay home when sick and for a full 24 hours after your fever goes away.

- cover coughs and sneezes
  This keeps your germs away from others and off your hands.

- eat right
  Eating healthy, balanced meals can strengthen your immune system.

- exercise
  It boosts your immune system and speeds recovery from illness.

Have questions?
Call the 24/7 COVID-19 call center: 1-800-962-1253.
You can also call 2-1-1, text NJCOVID to 898-211, and visit: https://www.nj.gov/health/cd/topics/njcov.shtml.
