

COVID-19 Vaccine for Children and Teens

Everyone 6 months and older is recommended to receive the updated 2023-2024 COVID-19 vaccine

Vaccination is important because it can help:

Prevent serious illness and possible hospitalization

Prevent the spread of COVID-19 in schools and communities

Prevent serious health issues such as **MIS-C** **

Keep kids in school

Keep kids active in sports, play-dates, and social clubs

Protect family and community members

Talk to your health care provider about getting your child vaccinated or visit covid19.nj.gov/vaccines

For more information, visit cdc.gov/covid19

** Multisystem inflammatory syndrome in children, (MIS-C) is a condition where different body parts can become inflamed.
