

Active Post-Arrival Monitoring for Travelers from Ebola Virus Disease (EVD) Impacted Countries

LHD staff sets up notification in CDRSS to receive an email when a new Ebola report is entered

LHD receives CDRSS notification that new Ebola report has been created

Within 24 hours, LHD contacts the person

Person reached

Person cannot be reached (after 3 phone calls and/or in person attempts)

Conduct risk assessment (ie, survey in CDRSS under Epidemiology tab)

Document attempts in "Comments" section of CDRSS. Contact the NJDOH and ask to speak to the regional epidemiologist

Low (but not zero) risk

High or some exposure

- Review plan for active monitoring with the person and give 24/7 contact info for the LHD
- Change CDRSS report status to "LHD Open"

Contact the NJDOH and ask to speak to the regional epidemiologist

Continue active monitoring for 21 day incubation, with daily data entry of temperature into CDRSS

No fever, no symptoms

Elevated temperature, symptom or non-compliance

At end of 21 days, or if person will be relocating,* close case in CDRSS by changing report status to "LHD Closed"

*If a person will be relocating, notify NJDOH regional epidemiologist.

- If temperature is elevated or symptoms arise, instruct the person to seek health care via ambulance and the LHD should make immediate notification to the NJDOH
- If the person becomes non-compliant, the LHD should contact the NJDOH and ask to speak to the regional epidemiologist
