On August 20, 2020, the Department of Health (Department) issued a Directed Plan of Correction, which, among other things, required the facility to retain the full-time, on-site services of a Certified Infection Control Practitioner consultant, implement an appropriate infection prevention and intervention plan, complete a long-term-care infection control self-assessment, perform specified staff in-service training and conduct a root cause analysis.

On December 3, 2020, the Department lifted the August 20, 2020 Directed Plan of Correction.
