

NJDOH NATCEP Workshops

The Certification Program at the New Jersey Department of Health (Department) offers regular New School, Instructor and Evaluator Workshops for the Nurse Aide in Long-Term Care Facilities Training and Competency Program (NATCEP). The New School Workshop is held as an online, two hour program to provide interested candidates with information on starting a NATCEP program as a Private Vocational School, Community College or Vocational Technical School, or as a Long Term Care Facility. The Instructor Workshop is a three day in person Workshop where information is reviewed with candidates interested in becoming NATCEP Instructors, and for previously approved Instructors who are seeking knowledge on updating or creating a Department approved Lesson Plan. The Evaluator Workshop is a three day in person Workshop providing information to candidates interested in becoming Department approved Evaluators (Evaluators proctor the Skills Examination for CNA students who have completed the 90 hour classroom and clinical portion of their training). Candidates who are interested in attending any of these Workshops may contact the Certification Program at 609-376-7755, or at CNA@doh.nj.gov for more information.
