

Based on the Feb 4th subcommittee meeting and follow up homework, we drafted the following goals. The subcommittee leads overwhelmingly want to revert to theme-based topic areas instead of age-based. There also was a strong consensus to eliminate Health Behaviors as a focus topic because it closely aligns with Healthy Living ACT and they will probably cover the topic across the lifespan. We also will change the title of “Family Friendliness” to “Family Health” and incorporate to same content.

Topics - ***Infant, Child & Adolescent Health***

Goal 1: Eliminate the Racial disparity in Birth Outcomes

Goal 2: Increase the number of children who receive recommended vaccines by the age of 5.

Topic - ***Reproductive Health***

Goal 3: Increase the number of women who receive prenatal care across all race and ethnicities.

Topic - ***Family Health***

Goal 4: Increase access to full spectrum services for families of all generations, complexities, and abilities

Goal 5: Decrease the incidence of sexually transmitted diseases in adolescence and young adults throughout NJ.
