Acting Director of Psychology
Director of Psychology Internship Training
The Psychology Department of Trenton Psychiatric Hospital (TPH), in conjunction with the New Jersey Department of Health/Division of Behavioral Health Services offers a one year, full-time (1750 hours), APA-accredited Doctoral Internship in Health Service Psychology. The internship program has a rich history dating back to 1952 when it was founded by Albert Ellis, PhD. The program has been APA-accredited since 1990. The last site visit occurred in August 2017 and the program was awarded accreditation for the maximum review period of 10 years.

TPH is an historic 400-bed psychiatric hospital for adults, founded in 1848 by Dorothea Lynde Dix, a pioneer of advocacy for people with mental illness. The hospital and its staff continue that legacy through a shared mission to provide hope, wellness, recovery, and successful community reintegration for patients.
Commitment to Diversity

At Trenton Psychiatric Hospital, we are committed to diversity and developed a Diversity and Inclusion Committee composed of members of the Internship Supervisors Committee. These members are themselves diverse in terms of age, gender, language, ethnicity, culture, etc., each has different areas of expertise, and each has demonstrated a commitment to diversity. The committee has developed several guidelines to ensure consistent and long-term practices to attract and retain diverse interns and staff. In addition, we have identified a Diversity Liaison, who is one of the members of the Diversity and Inclusion Committee. This individual’s role is to advocate for diversity as a core component in recruitment and retention of interns and psychologists. Specifically, the Diversity Liaison will serve as a resource for interns and psychologists to discuss concerns and ideas regarding diversity. Interns will be encouraged to help develop and become part of activities and events planned by the Diversity and Inclusion Committee. We also are committed to the provision of training in various areas including diversity. To enhance our Colloquia training, we collaborated with a psychologist who is an expert in Multicultural Training and Supervision to develop a three-part series on Multicultural Perspectives in Mental Health: A Training Guide for Practitioners. The Director of Internship Training is also the Chair of the CE/CME Committee and members of the Diversity and Inclusion Committee have been appointed to represent the psychology department in making recommendations for topics and speakers with a focus on individual difference and diversity. Our goal is to create a welcoming and affirming environment for all our staff and interns to grow together as professionals.

Because of its progressive philosophies and a preferred location in New Jersey’s capital city, between New York City and Philadelphia, TPH’s Doctoral Internship in Health Service Psychology is highly competitive.
The stipend for the 2019-2020 internship class is funded at the gross salary of $37,930.87. Each position is filled at 80% for a salary of $30,344.70 for a four-day work week at TPH and a one-day volunteer outplacement at another site. Interns also enjoy:

- 12 paid State Holidays at 80% pay
- 9 vacation days
- 11 sick days
- 80% of 6 administrative leave days
- Workers’ Compensation
- Deferred Contribution Retirement Program (DCRP)
- Free cafeteria lunch

Depending on when the intern’s volunteer day is and whether the volunteer day falls on a holiday or not, the final salary may increase or decrease slightly. No medical/health insurance coverage is provided, but in the event of an injury, interns will receive Workman’s Compensation. Interns will also be enrolled in the DCRP pension plan. If an intern does not become employed by the state after internship, the money withheld for the pension will be reimbursed upon request.
To be considered for TPH’s Doctoral Internship in Health Service Psychology, applicants must be graduates of an accredited college or university with a Bachelor’s Degree, enrolled in a doctoral program in applied psychology (clinical or counseling) at an accredited university or professional school and be approved by their University Training Director for the internship. Successful applicants have completed at least 500 hours of therapy experience and 100 hours of assessment experience, with graduate course training in each of the following areas:

1. Psychotherapeutic techniques and counseling with practicum experience.
2. Objective and projective testing with practicum experience.
3. Personality development and psychopathology.
4. Theories of learning and motivation.
5. Research design and statistical analysis.

Doctoral Candidates (Changing Specialties)

Doctoral psychologists interested in changing their specialty to qualify in an applied area of psychology must be certified by a director of graduate professional training as having participated in an organized program in which the equivalent of pre-internship preparation (didactic and field experience) has been acquired. (See pre-doctoral requirements for specific work and practicum experience).
Application Form

We utilize the online APPIC APPLICATION FOR PSYCHOLOGY INTERNSHIP (AAPI) form available at APPIC’s website, www.appic.org. Click “APPI Online,” complete the application AND submit all supportive materials electronically.

Supportive Materials

Supportive materials which should be scanned electronically and submitted in addition to the AAPI form include a recent work sample (e.g., a psychological assessment).

Deadline

The DEADLINE for sending the APPLICATION (AAPI) and all supportive materials is NOVEMBER 1st.

Further Questions or Clarification

If you have any further questions about our program or the application process, contact the Director of Training:

The aim of the doctoral internship at TPH is to stimulate, support, and shape the professional growth of psychology interns. We seek both to build upon previously acquired competencies and to facilitate development of new clinical competencies and professional skills. While we seek to enhance development of a broad range of competencies and skills, an important aspect of our training philosophy is to provide all TPH interns with particular expertise in providing psychological services to individuals displaying serious and persistent psychopathology.

We expect to graduate interns who will:

1. Function as competent psychotherapists, psycho-diagnosticians and interdisciplinary treatment team members.
2. Effectively apply literature, supervision and continuing education to their clinical work.
3. Conduct themselves in a professional manner, in accordance with ethical and legal guidelines applicable to the setting in which they practice.
4. Possess sensitivities to individual and cultural differences that enable them to provide effective psychological treatment for the individuals they serve.

These expectations are achieved by providing interns with a program that integrates two broad training dimensions: (1) exposure to clinical and professional roles and experiences and (2) didactic and supervisory experiences. These experiences are structured according to the unique training needs of each intern.

The first training dimension, exposure to a range of clinical roles and experiences, is achieved through clinical and other professional role experiences at TPH and at training experiences at an outpatient or specialized site that matches the intern’s training interests.

In these settings, interns are exposed to patients representing a broad spectrum of psychopathology and diverse demographic backgrounds. Interns are also exposed to psychologists functioning in a variety of professional roles: multidisciplinary treatment team member, treatment plan facilitator, and hospital committee member.
The second dimension of training, didactic and supervisory experiences, involves education and guidance. Interns receive both individual and group clinical supervision, including 3 to 4 hours weekly of one-to-one supervision, and up to 1.5 hours of group supervision. Supervisors representing a range of theoretical orientations and areas of expertise provide guidance for interns. Interns also attend a state-wide colloquium series as well as seminars and in-service programs based at TPH.

Finally, interns’ experiences are structured according to individualized training plans that incorporate intern, supervisor, and university input. New training plans are developed for interns for each 6-month rotation.

We conceptualize our training model as a practitioner-scholar model. Training at TPH is characterized by intensive clinical experience supported by didactic programming and supervision that exposes interns to current research and literature relevant to their clinical work. Prior to completing the internship, interns demonstrate integration of clinical work and scholarship through an annual project. Most interns’ Annual Project is the development of new and innovative programming for the patients at TPH. Examples include a cognitive remediation program utilizing the Wii system, Acceptance and Commitment Therapy Groups (ACT), and competency restoration groups. As part of the colloquium series, interns will develop and present either a diagnostic or therapy case utilizing supporting theory and research. Some interns have a particular interest in research. If an intern has such an interest, she/he may develop and carry out an original research project relevant to his/her clinical work with appropriate approvals in place.

TPH is an inpatient psychiatric facility accredited by The Joint Commission. TPH maintains a census of approximately 400 adult patients. The hospital is located on the Trenton/Ewing border close to the Delaware River, approximately 20 miles northeast of Philadelphia and 60 miles southwest of Manhattan. It can be easily reached from the New Jersey Turnpike, 1-95 or Route 1. TPH is also accessible via public transportation.

Mental health services in the state of New Jersey have been transformed by the wellness and recovery philosophy the state has adopted. TPH’s Mission Statement is: “It is our mission to provide hope, healing and successful community reintegration for our patients by assisting them in managing their psychiatric symptoms and developing a personal path of wellness and recovery.” TPH has taken significant steps to assure that a wellness...
Intern Experience

TPH’s Mission Statement

It is our mission to provide hope, healing and successful community reintegration for our patients by assisting them in managing their psychiatric symptoms and developing a personal path of wellness and recovery.

philosophy shapes hospital treatment. Among the ways the wellness and recovery philosophy is being put into practice are:

- Staff members are trained to understand and apply a wellness and recovery paradigm
- Treatment includes psycho-educational and psychotherapeutic evidence-based approaches such as “Illness, Management, and Recovery” (IMR), Integrated Technology-based Cognitive Remediation (ITCR), Recovery Oriented Cognitive Therapy (CT-R), and Dialectical Behavior Therapy (DBT)
- Patients are being reintegrated into the community with the help of innovative programs and resources such as Residential Intensive Support Team (RIST) and Supportive Housing, and case management services such as Program of Assertive Community Treatment (PACT) and Integrated Community Management Services (ICMS).

TPH provides inpatient psychiatric services primarily to residents of Mercer, Middlesex, and Monmouth counties. Residents of other counties presenting special legal or other issues may also receive treatment at TPH. Patients 18 years of age and older, from diverse cultural and socioeconomic backgrounds, and with serious mental illnesses are provided mental health services designed to mitigate debilitating symptoms, enhance adaptive functioning, and facilitate successful reintegration into the community.
The hospital is divided into 4 primary sections. Each complex has unique functions but is interdependent with other parts of the hospital.

### Exceptional Opportunities for Professional Growth

**The Drake Complex** is composed of three coed, locked admissions units. Psychologists assess and treat involuntarily committed patients who present with acute symptoms and behaviors including suicidality and aggression. In addition, interns gain a familiarity with the care of patients who have significant legal issues including those on Detainer status, those found Not Guilty by Reason of Insanity (NGRI), those court ordered to be evaluated for competence to stand trial, and those who are Megan’s Law registrants. One unit is now dedicated solely to forensic patients court-ordered for competency assessments. Treatment occurs in the context of a Treatment Mall setting within the Drake Complex which offers centralized programming to individuals in all three admissions units and aims to stabilize, support and ultimately discharge patients. Patients may stabilize quickly and return to the community or progress to other hospital units for further treatment. The intern placed in Drake gains experience and training on the unit where his or her primary supervisor provides psychological services and gains assessment experience where his or her assessment supervisor is assigned.

**The Raycroft Complex** is composed of four locked units and provides “post-admission” treatment for patients determined to need continued acute treatment. The Raycroft Complex includes one female unit, two male units, and one coed unit. In addition to patients needing continued acute treatment, the Raycroft Complex also may include patients with sex offender charges, patients designated as NGRI, and patients being evaluated for competence to stand trial. Based on their Level of Supervision, patients may attend programming within the Raycroft Complex or they may go to the centralized Treatment Mall located in the nearby Lincoln Complex. At the Treatment Mall, patients attend diverse programming, including Sex Offender Specific Treatment, Art Therapy, Music Therapy, Anger Management, Competency Restoration, Dialectical Behavior Therapy (DBT) Skills Group and Yoga, in addition to traditional process groups. Under the supervision of the Training Director, the intern assigned to the Raycroft Complex completes therapy training across all the Raycroft Complex units and within the Treatment Mall. Interns receive their assessment supervision from a supervisor working within the Raycroft Complex and may draw cases from units in Raycroft and throughout the hospital.

**The Lincoln Complex** contains four locked units including: the Lincoln Unit providing coed treatment for patients with special medical needs; the Lazarus Cottage, providing coed DBT and substance abuse treatment; the King Cottage, providing continued acute treatment to men with chronic mental illness; and the Kennedy Cottage, considered a less-restrictive unit housing a coed population, which benefits from a unit-based positive
behavioral support program. Patients from all units also attend programming in the Lincoln Complex Treatment Mall. Approximately 25% of patients in Lincoln Complex have legal issues or a history of violence. The Lincoln Complex intern receives therapy supervision in the Lincoln Building, where the primary supervisor works, and assessment supervision with another supervisor located on the Lazarus Unit.

The Transitional Living Unit (TLU) is open and unlocked. Patients reside in 12 renovated homes on the hospital grounds, each housing five to eight patients who participate in programming on the hospital grounds, with many patients utilizing off-grounds privileges on weekends. Patients from TLU are also invited to attend programming in the Lincoln Complex Treatment Mall. Preparation for discharge into the community is facilitated in part through residing in this home-like environment. Patients in TLU may also hold a job through the Vocational Rehabilitation program on the hospital grounds. The TLU intern receives therapy cases and supervision in TLU whereas diagnostic cases and assessment supervision will occur in the Lincoln Complex.

Training Rotations
The year is divided into two, six-month training rotations. Each intern has two primary assignments based on the intern’s previous experiences, current training needs, and preferences. Exposure to hospital units outside of an intern’s primary placement can also be arranged to broaden the diversity of the training experience.

Outplacement Specialized Training
Depth and variety of experience are further promoted by having our interns spend one full day per week at an outplacement site that offers outpatient or specialized training and is affiliated with the internship program. An effort is made to match each intern’s training interests with his or her outplacement site. An intern may be placed at an established site or a new site. New sites are added regularly in response to intern needs and requests or changes in availability. Sites recently available to interns have included: Children’s Specialized Hospital Outpatient Program in Hamilton, NJ; Ann Klein Forensic Center in West Trenton, NJ; the Special Treatment Unit which serves civilly committed sex offenders in Rahway, NJ; Cooper Hospital/University Medical Center’s Neurology Group in Camden, NJ; and college counseling services at Rutgers University. These sites provide interns with the opportunity to gain experience in outpatient or specialized inpatient settings serving a variety of populations.
Supervisory Excellence

The TPH Doctoral Internship in Health Service Psychology has two broad training dimensions: (1) exposure to clinical and professional roles and experiences and (2) didactic and supervisory experiences. Six primary components of training fit into these dimensions. Psychotherapy, psychological assessment, professional role development, and outpatient or specialized site clinical experiences fall into the first dimension. Supervision and educational experiences fall in the second dimension.

1 Psychotherapy

Psychology Interns at TPH gain psychotherapy experience treating a variety of patients under close supervision. Interns’ caseloads include patients displaying varying levels of psychopathology and diverse personal, cultural, and demographic characteristics. All interns gain experience with a patient population displaying severe and persistent psychopathology. Interns are exposed to a variety of theoretical viewpoints and treatment modalities. Each intern is observed doing individual and group psychotherapy. Interns meet with their therapy supervisor between 1 – 1.5 hours per week. The Training Plans that are developed for each six-month rotation include identification of competencies and goals intended to remediate areas of weakness and promote growth as a psychotherapist. At TPH therapy cases are chosen from the entire range of acute psychoses and chronic schizophrenias, major affective disorders, character disorders, dissociative disorders, neurological conditions, and substance abuse disorders. At outplacement sites, interns gain additional supervised experiences treating populations which may display less severe psychopathology than the TPH population, such as college students; they may represent a population that differs from the TPH patients, such as children and adolescents; or they may present with particular issues such as forensic involvement. Both inpatient and outpatient supervisors employ supervision techniques such as direct observation, monitoring of taped sessions, feedback, case discussion, didactic instruction, role-playing, and discussion of assigned readings to foster theoretical understanding and technical competence.
Interns gain and improve skills in the administration, scoring and interpretation of major intelligence, neurological, objective, and projective test measures, as well as violence and sexual violence risk assessments and actuarial assessment instruments such as the: WAIS-IV, WASI-II, WMS-IV, Folstein Mini Mental Status Exam, MMPI-2RF, MCMI-IV, Personality Assessment Inventory, Beck Scales, Rorschach, TAT, Suicide Risk Assessment, Static 99-R, VRAG, SORAG, STABLE/ACUTE, and HCR-20 V3. Interns can access many computerized scoring and interpretive systems for the aforementioned tests as directed by their assessment supervisor, who evaluates how to incorporate and utilize these tools based on the intern's level of expertise. Interns meet with their diagnostic supervisor between 1 – 1.5 hours per week. Interns are taught how to: select tests to answer referral questions; learn to use the diagnostic categories of the DSM-5; develop clinical interviewing skills; and make specific and viable treatment recommendations. Referrals include questions such as risk to self and others and differential diagnosis including level of intellectual functioning, neurological conditions, presence of thought, mood and character disorders, and PTSD. Interns also identify the content of specific life and emotional issues unique to the individual being assessed.

Development of a positive professional image through interaction and identification with professional role models is a significant aspect of our program. In addition to their more traditional roles as therapists and psychodiagnosticians, TPH psychologists act as skilled facilitators at community meetings, as planners of innovative programming efforts, and as integral team members on their assigned units. By virtue of their treatment team experiences, interns gain exposure to different theoretical points of view and learn how to work with members of other disciplines. Psychology is represented in leadership roles on all major hospital policy committees, including the Executive Committee of the Medical Staff, the Performance Improvement Council, the Research Review Committee, CE/CME Committee, and Violence Prevention Committee.

At TPH interns are exposed to various supervisory styles through their own supervision, and supervisors provide and review literature on supervision models and approaches to ensure knowledge and competency in the methods of supervision. In addition, TPH interns are required to view videos from the APA Psychotherapy Supervision Video Series. Interns will have opportunities to engage in 1:1 peer supervision and
supervision role-plays as well as provide consultative guidance to other health care professionals on their respective treatment teams, including members of other professional clinical disciplines (psychiatry, social work, rehabilitation staff) as well as nursing and paraprofessional staff. Interns also participate in a weekly, year-long Professional Development Seminar where they routinely engage in peer supervision in a group format and provide feedback on cases and a variety of issues that arise during the year. As part of her facilitation of the Professional Development Seminar, guidance on the provision of supervision is provided by the Director of Training.

Each intern spends one full day per week at an affiliated outplacement site for the full internship year. Assignment to the outpatient/specialized setting is designed to bring diversity to intern experiences by bringing them into contact with patient populations other than psychiatric hospital inpatients. In addition, these experiences provide interns with opportunities to become familiar with alternate settings in which psychological services are delivered. New sites will be added in response to training needs and interests. Interns receive 1 hour of supervision per week by a licensed psychologist.

The internship program at TPH provides up to 3 hours of one-to-one supervision and 1 hour of group supervision per week by New Jersey licensed psychologists. Supervisors maintain a close relationship with their intern. Supervisors at TPH also have completed a year-long Supervisor Training Seminar or other seminars and training on the provision of supervision.

Interns are assigned a TPH psychotherapy supervisor and a TPH psychodiagnostic supervisor. Interns also participate in the year-long Professional Development Seminar which includes weekly supervisory and didactic components facilitated by the Director of Internship Training. Additionally, a New Jersey licensed supervisor is assigned at the outplacement site. Interns also have the opportunity to participate in weekly peer supervision.
To supplement their clinical experiences, TPH interns attend two days of training each month at a colloquium program. This is consistently one of the most highly rated aspects of the internship program and includes such experiences as attending presentations by psychologists in areas such as Conducting Competency to Stand Trial Evaluations, Risk Assessments, treating patients with addictions and speakers who are leaders in the field in subjects such as forensic psychology, cultural diversity, and personality theory.

Interns also participate in a variety of didactic and experiential programs at TPH on a monthly-basis throughout the year. TPH Psychologists provide in-service trainings on topics that include:

1. The Basics of DBT
2. Acceptance and Committeeman Therapy
3. Ethics and Professional Standards
4. Working with Immigrant Families
5. CBT for Psychosis
6. Cognitive Remediation
7. Private Practice

Interns have additional opportunities for didactic training in TPH’s CE/ CME Programs. Interns also have opportunities to interact with trainees in other disciplines.
High Standards, High Expectations

The internship experience is divided into two six-month rotations. Interns are assigned to a primary unit for each rotation with a different psychotherapy and psychodiagnostic supervisor for each rotation. Training plans are developed at the beginning of each rotation – at the beginning of the internship year and approximately six months into the internship year. At the completion of each six-month rotation, interns receive evaluations from their supervisors and provide evaluations of their supervisors. Interns remain at their specialized outplacement site for the full year. Each intern’s specialized site supervisor provides input to Training plans and evaluations.

Training plans and Evaluations include the following 10 Goals and objectives:

Goal 1
To Achieve Competence in Psychological Assessment
- Objective A: Clinical Interview Skills
- Objective B: Diagnostic Skills
- Objective C: Psychological Test Selection and Administration
- Objective D: Psychological Test Scoring and Interpretation
- Objective E: Assessment Writing Skills
- Objective F: Patient Feedback Regarding Assessment

Goal 2
To Achieve Competence in Psychotherapeutic Intervention
- Objective A: Case Conceptualization and Treatment Planning
- Objective B: Therapeutic Interventions and Confidentiality
- Objective C: Patient Rapport
- Objective D: Effective Use of Emotional Reactions (Countertransference)
- Objective E: Group Therapy Skills and Preparation
- Objective F: Patient Risk Assessment/Management
- Objective G: Safety and Crisis Management

Goal 3
To Achieve Competence in Consultation & Interdisciplinary Health Care
- Objective A: Consultative Guidance
- Objective B: Knowledge of the Treatment Roles of Other Disciplines
- Objective C: Interdisciplinary Treatment Team Functioning

Goals continued on next page
Intern Performance Evaluation, Feedback, Retention, Minimal Requirements

Goal 4
To Achieve Competence in the Application of Literature and Supervision to Clinical Work

Objective A: General Psychological Knowledge
Objective B: Seeks Current Scientific Knowledge
Objective C: Develops and Implements Final Project
Objective D: Utilization of Supervision and Continuing Education

Goal 5
To Achieve Competence in Ethics and Legal Matters

Objective A: Knowledge of Ethics and Law
Objective B: Knowledge of Policy, Procedure, and Reporting Guidelines

Goal 6
To Achieve Competence in Professional Interpersonal Behavior

Objective A: Professional Interpersonal Behavior
Objective B: Professional Verbal and Written Communication
Objective C: Communication with Supervisor

Goal 7
To Achieve Competence in Professional Values, Attitudes, and Beliefs

Objective A: Uses Positive Coping Strategies in Dealing with Professional and Personal Challenges
Objective B: Professional Responsibility and Documentation
Objective C: Responsible and Efficient Time Management
Objective D: Administrative Competency

Goal 8
To Achieve Competence in Individual and Cultural Diversity

Objective A: Sensitivity to Patient Diversity
Objective B: Patient Rapport/Working Relationships with Diverse Patients
Objective C: Awareness of Own Individual Differences and Cultural and Ethnic Background

Goals continued on next page
Goal 9
To Achieve Competence in the Provision of Supervision

Objective A: Supervisor Competence
Objective B: Diversity
Objective C: Supervisory Relationship
Objective D: Feedback
Objective E: Problem of Professional Competence
Objective F: Ethical, Legal, and Regulatory Considerations

Goal 10
To Achieve Competence in the Utilization of Research

Objective A: Critical Review of Literature
Objective B: Research Guided Intervention
Objective C: Research Guided Assessment Practices
Objective D: Presentation of Research

In addition interns actively participate in tailoring their training plans by providing preferences regarding in-house rotations, outplacement sites and any specific skills, projects or research interests they have. These are incorporated in the training plans and evaluated by their supervisor at the end of each rotation.

Supervisors rate interns on each objective applicable to their rotation on the following five-point scale:

1. **Needs remedial work** – Requires remedial work as part of supervision process.
2. **Entry level** – Continued intensive supervision is needed. Most common rating for beginning interns. Routine, but intensive, supervision is needed in most areas.
3. **Intermediate** – Common rating throughout internship. Routine supervision of each activity.
4. **High Intermediate** – Occasional supervision needed. A frequent rating at completion of internship. Competency attained in all but non-routine cases; supervisor provides overall management of trainee’s activities; depth of supervision varies as clinical needs warrant.
5. **Advanced Skills** – Comparable to autonomous practice at the licensure-eligible level. This is the highest rating achievable during and at completion of pre-doctoral training. Competency is consistent with full psychology staff privilege level.

*In addition, Supervisors can provide qualitative comments for each Competency.*

Interns are considered to be in Good Standing at mid-year if at least 50% of all rated objectives are at a competence level of 3 or higher. Interns are considered to be in Good Standing at the end of the training year if all rated objectives are at a competence level of 3 or higher and at least 50% of all rated objectives are at a competence level of 4 or higher.
Feedback and Advisement of interns is ongoing and occurs throughout the year, both formally, on a weekly basis during supervision, and informally, as requested by the intern or determined by the supervisor. It is the goal of the internship program to retain all interns who begin the internship program. In the rare situation in which an intern needs remedial work, a competency assessment form will be completed immediately and shared with the Intern and Director of Training. In order to allow the intern to gain competency and meet passing criteria for the rotation, these areas must be addressed proactively. In doing so, a remedial plan needs to be developed and implemented promptly. Due process procedures are followed.

Minimal requirements to complete the internship include:

1. Good Standing rating for all evaluations
2. A minimum of 1,750 hours of training, as documented on a Training Hour Log and in timesheets signed by the interns’ primary supervisor
3. A case presentation (therapy or diagnostic)
4. Submission of an acceptable Annual Project
5. Completion of all required documentation, including supervisor evaluations, program evaluations, clinical progress notes and psychological assessments

Interns interested in obtaining more than the minimum 1,750 hours of training can arrange, with their supervisor and proper documentation, to accumulate 2,000 hours in the TPH program.
The long-term objective of our internship program is that our internship graduates are prepared and expected to work in a variety of professional settings and roles as psychologists. Many interns apply to our program specifically because they want to acquire psychological treatment skills with individuals displaying severe and persistent psychopathology and/or forensic issues. Most intern graduates are working in staff positions providing psychological services. Many are providing services in settings with underserved populations that include individuals who display severe psychopathology, such as forensic settings and psychiatric hospitals. Some intern graduates move on to postdoctoral fellowship positions or jobs in settings such as university psychological counseling centers. Others are engaged in other professional activities such as consulting or research.

We encourage interns to continue on the professional path towards psychology licensure. We provide whatever guidance and assistance we can towards that goal. Many of our intern graduates have become licensed psychologists in New Jersey and other states. Others are in the process of becoming licensed.
The hospital’s psychology department is comprised of 15 psychologists, 4 psychology interns, 10 Behavioral Support Technicians (BSTs), and 2 Behavior Analysts. Nine full-time psychologists are licensed in New Jersey, with several other department members licensed in other states, including Pennsylvania and New York. Supervisors subscribe to a variety of theoretical orientations and provide opportunities for exposure to diverse supervision styles and professional roles. Qualified supervisors are New Jersey licensed psychologists who have attended a supervisor training class led by the former Chief of Psychology Services of New Jersey or have attended another form of training or supervision in the provision of supervision.

Dr. Nicole Waldron (Supervisor, Stratton Building) received her PsyD in Clinical Psychology from the Georgia School of Professional Psychology in 2000 and completed her internship at Trenton Psychiatric Hospital. She is a licensed psychologist in New Jersey, New York and Pennsylvania. Dr. Waldron has been working for the State of New Jersey for 18 years, previously at the Special Treatment Unit (civil commitment unit for adult, male sex offenders) and currently at Trenton Psychiatric Hospital. Her primary theoretical orientation is cognitive behavioral, but she adopts an eclectic approach in working with patients in a psychiatric inpatient setting. Her interests include the treatment of anxiety and depression, disaster response, and the treatment and assessment of forensic populations. She has particular expertise in sex offender specific therapy and risk assessment and worked with administration to develop and expand the sex offender therapy program at TPH. She is certified in Recovery Oriented Cognitive Therapy from the Aaron T. Beck Psychopathology Research Center. She has an interest in Ethics and provides In-service training on Ethical Standards and Practice.

Regional Staff continued on next page
Supervisors and other Psychology Staff:

Dr. Michele Koschin
Assistant Internship Training Director
Supervisor
Lincoln Complex

Dr. Michele Koschin (Assistant Internship Training Director, Supervisor, Lincoln Complex) is a licensed psychologist in Pennsylvania and New Jersey. She received her PsyD in Clinical Psychology from La Salle University in 2006 following her pre-doctoral internship at Pilgrim Psychiatric Center, a state psychiatric hospital in New York, where she also worked as part of the DBT team. Dr. Koschin completed her post-doctoral hours with the University of Medicine and Dentistry of New Jersey (UMDNJ), providing psychological assessment, crisis intervention, as well as group and individual psychotherapy across multiple forensic settings in the state prison system. Prior to joining the Psychology Department at TPH, she had been the director of ambulatory behavioral health programs at Belmont Northeast, part of Belmont Behavioral Hospital, providing administrative and clinical supervision for partial hospital, intensive outpatient, and outpatient programming for individuals with serious mental illness. Her interests include clinical supervision, as well as cognitive behavioral therapy and Acceptance and Commitment Therapy (ACT), particularly as applied to the treatment of individuals with psychotic disorders.

Dr. Laetitia Baehr-Reed (Lincoln/Raycroft complexes) received her PsyD in Clinical Psychology from the Georgia School of Psychology in 2016 and completed her internship at Trenton Psychiatric Hospital (TPH). Dr. Baehr-Reed has been working with both a military and forensic population. She completed her post-doctoral hours through her employment at the Special Treatment Unit (civil commitment of adult, male Sexually Violent Offenders), providing individual and group therapy, as well as psycho-educational sex offender specific modules. Dr. Baehr-Reed recently returned to TPH where she is providing the following services: psychological assessments, violence and sexual violence risk assessments, sex-offender specific treatment, trauma informed treatment, and cognitive remediation groups. Although using an integrative approach through the application of Schema Focused Therapy, Dr. Baehr-Reed’s initial training and theoretical orientation is cognitive behavioral. Her primary interest revolves around providing quality trauma informed care, including both developmental and adult/military trauma. She also enjoys providing treatment and assessment to the forensic population, with a particular interest in sex-offender specific treatment and risk assessment.

Regional Staff continued on next page
Dr. Clédicianne Dorvil
Supervisor
Drake Complex

Dr. Clédicianne Dorvil (Supervisor, Drake Complex) NCSP, ABSNP is a multilingual psychologist with specialties in School and Neuropsychology. She has accumulated a wealth of experience in the field of education and mental health. She also has a strong background in conducting cognitive, personality, and neuropsychological assessments of children and adolescents. Dr. Dorvil completed her Bachelor’s degree at Rutgers University; she obtained her Master’s degree from Fairley Dickenson University, and her doctoral degree from Philadelphia College of Osteopathic Medicine (PCOM). For her dissertation, “Stereotype Threat and Minority Students’ Academic Achievement,” Dr. Dorvil created a manual program to remediate the negative effects of stereotype threat in the educational setting. She completed her pre-doctoral clinical internship at Ewing Residential Treatment Center (ERTC), a residential facility for adolescent males with legal involvement and Trenton Psychiatric Hospital (TPH). She received additional postdoctoral training experiences working with children and adults displaying various psychological and behavioral difficulties. She is a licensed psychologist in NJ and PA and utilizes her license to maintain a private practice in Trenton, NJ.

Dr. Dorvil’s skills interests include neuropsychological and bilingual assessments, trauma and resiliency, stereotype threat and learning, mother-tongue based education, identity formation in ethnic minorities. She is affiliated with the American Psychological Association, Delaware Valley Association of Black Psychologists, and National Association of School Psychologists. She seats on the board of the National Alliance for the Advancement of Haitian Professionals and The Haitian Community Wellness Center.

Dr. Marie Dole-Farrell
Travers Complex

Dr. Marie Dole-Farrell (Travers Complex) received her MS in Psychology from Millersville State College and her PhD in Psycho-educational Processes from Temple University. She is licensed in the state of Pennsylvania. Dr. Dole-Farrell has worked in outpatient and inpatient settings. Within the state system she has worked in the Division of Developmental Disabilities for 7 years and the Division of Mental Health for 16+ years, primarily at Ancora Psychiatric Hospital though at Trenton Psychiatric Hospital since 2007. Her training and experience has been mainly in group dynamics and behavior therapy/analysis. Additionally, she served as a volunteer member of the back-up crisis team for the National Disaster Medical System during the Desert Shield/Desert Storm military operations in 1990 and 1991.

Dr. Linda Kavash  
Drake Complex

Dr. Linda Kavash (Drake Complex) received her PsyD in Clinical Psychology from Wright State University School of Professional Psychology in 1989. She is a Pennsylvania licensed psychologist. She has been employed by the state since 1990, having worked previously at Ancora Psychiatric Hospital and North Princeton Developmental Center. As such, she has worked with both acute and chronic inpatient populations, in addition to dually diagnosed patients with developmental disabilities and mental illness. In the past, she has served as the Psychology Unit Coordinator and provided supervision to psychology interns and BMPT staff. Her professional interests include working with the DD/MI population and psychological assessment. Dr. Kavash currently provides psychological services in the Drake Complex.

Dr. Anna Maleson  
Raycroft Complex

Dr. Anna Maleson (Raycroft Complex) earned her PhD in clinical psychology from Walden University, graduated top of her class and is a member of PSI CHI National Honors Society. Dr. Maleson is also an alumnus from The University of Pennsylvania where she earned her Master of Science degree, and is an alumnus from the Georgian Court College where she earned her BA with honors. Her areas of clinical and professional interest are child and adolescent services, cognitive behavioral therapy, dialectical behavioral therapy, ABA, autism spectrum disorders, anxiety, bi-polar disorder, social skills, selective mutism, adult schizophrenia, and conducting cognitive and personality testing, ADHD evaluations, and risk assessments. Dr. Maleson has over 16 years of experience working with children and adolescents within the therapeutic foster care system, juveniles who sexually offend, juvenile and family court, conducting parenting and psycho-educational workshops and providing behavioral therapy with children diagnosed with autism spectrum disorder. She currently provides DBT therapy on an all-female unit.

Dr. Michael Mikitish  
Supervisor  
Lincoln Complex

Dr. Michael Mikitish (Lincoln Complex) holds a PhD in Psychology (Neuro) from the Graduate School of the City University of New York and a postdoctoral MS in Clinical Psychopharmacology (2014) from Fairleigh Dickinson University. He is a licensed psychologist in New Jersey and Pennsylvania. He completed his predoctoral internship within the Neuropsychology Section of North Shore University Hospital, Manhasset, New York, and his Psychopharmacology Postdoctoral Training Program at Moss Rehab at ARIA Frankford Hospital, Philadelphia, Pennsylvania. After earning his PhD, he served over seven years as psychologist on a locked adult...
psychiatric unit at the Fairmount Institute in Philadelphia. He then entered the field of public school education and has served as a school psychologist, special education director, school principal (for regular and emotionally disturbed students) and charter school lead person (superintendent). During this time, he has also worked part time with the Philadelphia Office of Vocational Rehabilitation within the Pennsylvania Department of Labor and Industry, serving over 20 years as a Psychological and Neuropsychological Consultant. He is the recipient of grants from the New Jersey Department of Education and the Albert Einstein Society. The latter was awarded to study the use of nirHemoencephalography feedback in the treatment of brain injury. He is very interested in neuropsychological correlates of learning and behavior and has been teaching a course on this subject, the Neurological Bases of Educational Disorders at Rowan University for over 15 years. Prior to joining Trenton Psychiatric Hospital, he was Neuropsychologist at Moss Rehabilitation Hospital, a division of the Albert Einstein Healthcare Network in Philadelphia.

Dr. Gina Radice-Vella (Raycroft Complex) earned her PsyD in Clinical Psychology from Xavier University in Cincinnati, OH in 2016. During the course of her training, she received a great deal of experience in inpatient psychiatric settings with individuals diagnosed with severe mental illness, which became her area of passion. She completed her post-doctoral fellowship at the Psychiatric Institute of Washington, a private inpatient facility in Washington D.C. She completed her clinical internship at Spring Grove Hospital Center, a state hospital located outside of Baltimore, MD. During internship, she was trained in Cognitive Behavior Therapy for Psychosis (CBTp) and worked on a unit with individuals with treatment resistant schizophrenia. Prior to internship, she worked two years in a state hospital in Cincinnati. Upon becoming licensed in New Jersey, Dr. Radice-Vella worked in corrections at a county jail. She currently works part time at this facility, providing psychological services, crisis interventions, and suicide risk assessments to inmates. She maintains a humanistic theoretical orientation, placing a strong emphasis on the therapeutic relationship as a catalyst for personal growth.

Regional Staff continued on next page
Dr. Jonathan Rapaport (Supervisor, Travers Complex) received a PhD in Clinical Psychology from the University of Alabama in 1984. He is a licensed psychologist in New Jersey, and has supervised interns at TPH since 1985. Dr. Rapaport supervises individual and group therapy and psychological assessment. Dr. Rapaport enjoys working with supervisees who are willing to experiment with different techniques to achieve personal and professional growth. His eclectic psychotherapeutic approach has varied influences from the realm of psychodynamic, interpersonal, Acceptance and Commitment Therapy and pragmatic existentialist schools. He has extensive assessment experience and has conducted seminars on the MMPI 2. Dr. Rapaport has an interest in forensic issues, private practice issues and the advancement of the psychology profession in such areas as the movement to gain mental health parity. He had served on the Megan’s Law Task Force, which reported to the governor.

Dr. Anna Rehwinkel-Morfe (Clinical Psychologist 2, Drake Complex) is a licensed psychologist in New Jersey, New York and Pennsylvania. She received her BA in Psychology from Johns Hopkins University and her MA & PsyD in Clinical Psychology from La Salle University. Dr. Morfe completed an APA-accredited pre-doctoral internship at Southeast Human Service Center in Fargo, North Dakota and a NRSA-funded primary care research fellowship at UMDNJ-RWJMS. While on fellowship, she also taught psychology coursework at Mercer County Community College where she is on faculty. After fellowship, Dr. Morfe worked for: the Federal Bureau of Prisons where she functioned as a staff psychologist providing crisis intervention, individual therapy, group therapy and staff training on suicide prevention and Motivational Interviewing; and Cooper University Hospital where she was part of an inpatient consultation-liaison team. Dr. Morfe’s theoretical orientation is cognitive-behavioral with a strong focus on Acceptance and Commitment Therapy (ACT). She maintains a private practice in New Jersey. Dr. Morfe is an active member of the New Jersey Adult Suicide Prevention Advisory Council.
Dr. Mary Ann Rebel  
Lincoln Complex

Dr. Mary Ann Rebel (Lincoln Complex) has a BA in Psychology from Siena College and an MA from University of Northern Colorado in Agency Counseling. She completed her internship at Greystone Park Psychiatric Hospital. She has a PhD in Counseling Psychology from Seton Hall University. Dr. Rebel has held positions as a psychologist at Woodbridge Developmental Center, North Jersey Developmental Center and Hunterdon Developmental Center where she worked with Developmentally Disabled Clients and supervised multiple Behavior Support Technicians. She also has experience working with substance use disorders at Greystone Park Psychiatric Hospital and Hagedorn Psychiatric Hospital. Some of her interests include stress management, psychological assessment and neuropsychology.

Dr. Kathleen Tobin  
Supervisor  
Lincoln Complex

Dr. Kathleen Tobin (Supervisor, Lincoln Complex) received her PhD in Clinical Psychology from Alliant International University, San Francisco in 2007. She is a licensed psychologist in both New York (inactive status) and New Jersey, and completed her internship with the Department of Veterans Affairs in Northport, NY. Her postdoctoral training focused on the areas of neuropsychological assessment and the NEAR model of Cognitive Remediation at Columbia University. Here she also coordinated clinical research trials and conducted outpatient Cognitive Remediation groups throughout Bronx and Manhattan. Prior to joining Trenton Psychiatric Hospital, Dr. Tobin worked in the Department of Genetics at Rutgers University studying the genetic bases of Schizophrenia, Bipolar and Autism spectrum disorders. She currently is a treatment team member and psychologist on the Lazarus Unit and provides DBT individual, group and milieu therapy.

Dr. Alicia A. Williams  
Raycroft Complex

Dr. Alicia A. Williams (Raycroft Complex) earned her undergraduate degree in Psychology in 1985 from Princeton University. She then began working with developmentally disabled sex offenders in New Jersey’s Moderate Security Unit (MSU). During this time, she entered graduate school at the Graduate School of Education at Rutgers University. In 1993, Dr. Williams earned her Master’s in Counseling Psychology, focusing on neuropsychological issues in developmentally disabled sex offenders. In 2004, she earned her Doctorate, also in Counseling Psychology. Dr. Williams’ dissertation focused on a relationship between client sexual orientation and mental health assessment.
While at Rutgers, she completed a predoctoral internship at the Douglass College Office of Psychological Services. She remained with the MSU for 15 years, providing both clinical and administrative planning services to the program.

In 2000, Dr. Williams left the MSU to join the NJ Juvenile Justice Commission as Director of Clinical Services for their community-based residential program for adolescents adjudicated on sexual offenses. In 2003, she began employment with the Special Treatment Unit (STU) at the Avenel/Rahway site as a Clinical Psychologist. While at the STU, she worked with residents with special needs such as those with developmental challenges, those who were youthful offenders, and those who presented with interpersonal struggles related to sexual orientation/identity issues. In addition, she provided consultation regarding the provision of sex offender-specific treatment to individuals with developmental disabilities and supervised master’s level interns. In 2011, Dr. Williams returned to MSU as the unit psychologist and for several months, also served as the Director of Psychological Services for New Lisbon Developmental Center. In 2013, she joined the Psychology Department at Trenton Psychiatric Hospital. Dr. Williams is licensed as a Practicing Psychologist in NJ, and has inactive psychology licenses in DE and PA. She also holds the designation of Clinically Certified Sex Offender Treatment Specialist by the National Association of Forensic Counselors.
Maintenance of Records

In accordance with the Standards of Accreditation, TPH maintains documentation on Intern Performance and on Intern Complaints and Grievances. Records are permanently maintained so that an intern’s training experience, evaluations, and certificates of completion are available as evidence of the intern’s progress through the program and for future reference and credentialing purposes. TPH retains records of all formal complaints and grievances that have been filed against the program and/or against individuals associated with the program to be made available for review by the Commission on Accreditation.

Internship Matching, APPIC Guidelines, and New Jersey Regulations

Trenton Psychiatric Hospital abides by APPIC board decisions applicable to all internship sites and participates in the national computer matching program. This internship site agrees to abide by the APPIC policy that no person at this training facility will solicit, accept, or use any ranking-related information from any intern applicant. Intern applicants can obtain information about registering for the matching program at the matching program’s web site: www.natmatch.com/psychint.

New Jersey laws and regulations require that offers of Psychology Internship positions to applicants identified through the national matching program are contingent upon necessary approvals following satisfactory fingerprinting clearance, background/reference checks, and health screening.

Disability Information

TPH abides by federal and New Jersey regulations regarding disabilities. Information about resources for graduate students with disabilities is available from APA at the following internet link: https://www.apa.org/pi/disability/resources/publications/resource-guide.aspx. Additional information for students with disabilities is available from APPIC on their website at the internet link: https://www.appic.org/Training-Resources/For-Students#Healthmatters

Statement of Nondiscrimination

The Doctoral Internship in Health Service Psychology abides by the New Jersey Law Against Discrimination (LAD) which prohibits employers from discriminating in any job-related action, including recruitment,
Legal Notices and Disclaimers

interviewing, hiring, promotions, discharge, and compensation. The law also prohibits discrimination in the terms, conditions and privileges of employment as indicated in the law’s specified protected categories. These protected categories include: race, creed, color, national origin, nationality, ancestry, age, sex (including pregnancy and sexual harassment), marital status, domestic partnership status, affectional or sexual orientation, atypical hereditary cellular or blood trait, genetic information liability for military service, or mental or physical disability, including AIDS and HIV related illnesses. The LAD prohibits intentional discrimination based on any of these characteristics. Intentional discrimination may take the form of differential treatment of statements and conduct that reflect discriminatory animus or bias.

Hospital and Other Institutional Policies with Which the Program Complies

The TPH Psychology Internship program complies with all policies and procedures of the state and hospital that pertain to staff and intern rights, responsibilities, and personal development including:

Hospital – Including but not limited to NJ Policy Against Discrimination, Equal Employment Opportunities and Affirmative Action (3.001), Sexual Harassment (3.001.01), Code of Ethics (2.401.17), TPH Employee Physical Exam Guidelines/Pre-Employment Health Screening for New Hires (3.305), Employee Physical Exam Guidelines: Assessment of Physical/Mental Incapacity (3.305.01), Research Review Committee (5.401), Guidelines for Use of Information Technology Resources (1.801), and Patient Abuse and Neglect (1.901). For a complete description of a particular hospital policy and procedure, current interns can visit our Intranet homepage at http://tphweb/ and click “Template and Policy Search”. Type in a policy number or key word. Applicants may receive policies upon request via email.
Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program’s policies on intern selection and practicum and academic preparation requirements:

The Psychology Department of TPH, in conjunction with the New Jersey Department of Health/Division of Behavioral Health Services and affiliated outpatient and specialized training sites offers a one year, full-time (1750 hours), APA-accredited internship in Clinical Psychology. Interns are able to accrue 2000 hours if necessary for licensure in their state. Interns’ core experience involves intensively supervised clinical work at TPH with an inpatient adult psychiatric and forensic population. TPH patients display a broad spectrum of psychopathology and are from diverse cultural, ethnic, and economic backgrounds. Interns are exposed to a range of theoretical orientations. They gain experience with varied treatment modalities and acquire assessment experience utilizing a range of assessment tools. Individualized competency-based training plans are developed for each intern, facilitating the development and expansion of a broad base of clinical skills. Goals of the internship are to graduate interns who will:

1. Function as competent psychotherapists, psycho-diagnosticians and interdisciplinary treatment team members.
2. Effectively apply literature, supervision and continuing education to their clinical work.
3. Conduct themselves in a professional manner, in accordance with ethical and legal guidelines applicable to the setting in which they practice.
4. Possess sensitivity to individual and cultural differences that enable them to provide effective psychological treatment for the individuals they serve.

TPH’s psychology department is comprised of 15 psychologists, 4 psychology interns, 2 behavior analysts, and 10 behavior support technicians. Nine full-time psychologists are licensed in New Jersey. The hospital is divided into 4 complexes: Drake – 3 admissions units; Raycroft – 4 extended acute locked units; Lincoln – 4 less restrictive units comprised of patients with either medical issues, chronic mental illness, or those who meet criteria for DBT milieu treatment; and Travers – 12 unlocked cottages each housing between 5-8 patients comprise the Transitional Living Unit which helps to prepare patients for discharge. Each complex has unique functions, but is interdependent with the other parts of the hospital. During the course of the year-long internship, each intern spends 6 months in 2 rotations in different sections of the hospital. Depth and variety of
experience are further promoted by having our interns spend 1 day per week at affiliated outpatient or specialized training sites.

Interns will begin their day by attending Nursing Report and Life Management Meeting, which is a community meeting for patients. Interns will then participate in an interdisciplinary team meeting in which they will be assisting in writing treatment plans and updating patient safety plans. Interns will carry a caseload of 5-6 individual patients and co-facilitate 2-4 group sessions per week. Interns may see individual patients in the morning or afternoon and conduct groups in the afternoon. All staff members including interns are expected to document patient progress after each group or individual session in our Group Scheduling Application. Interns also conduct 4-6 assessments per 6-month rotation and will be working on integrative reports throughout the week. In addition on 2 Wednesdays per month, interns receive didactic training on a broad array of topics presented by leaders in the field. Interns will also receive in-service presentations by supervisory staff once a month and participate in the monthly department meeting.

Does the program require that applicants have received a minimum number of hours of the following at times of application? If Yes, indicate how many:

- Total Direct Contact Intervention Hours: Yes, Amount: 500
- Total Direct Contact Assessment Hours: Yes, Amount: 100

Describe any other required minimum criteria used to screen applicants:

Applicants must have a Master’s Degree by the date of application deadline, and the graduate program must be APA-accredited.
