Subject: [EXTERNAL] VERI Chrome Issues
Date: Monday, February 14, 2022 1:37:26 PM

Registrars,

We have been made aware of a printing issue in VERI. Some users are experiencing a print error when using Google Chrome. The print preview is unable to load and users cannot print.

However, there are no issues with Microsoft Edge or Mozilla Firefox. If you have not already, please use VERI in either of those browsers to ensure printing abilities.

Our developers are working on a fix to the Chrome issue. In most cases, the issue is resolved by uninstalling and reinstalling the Chrome browser.
