

## **Out-of-State Institutions Currently Licensed to Offer Higher Education in New Jersey**

Unless otherwise indicated, enrollment data is current for the spring of 2019. Also, unless otherwise noted (see notes for Syracuse University; University of Phoenix) the most-recent licensure petition filed by every institution on this list was subject to a comprehensive review by a highly-qualified consultant or consultant team to determine whether the institutional and programmatic criteria required in New Jersey's higher education licensure regulations at N.J.A.C. 9A:1-1 et seq. have been met.

### **Data Points**

- There are currently 19 out-of-state institutions that are licensed in NJ (6 are for-profit, 13 are non-profit).
- 14 of 19 were either invited to NJ by a NJ-based entity or institution and/or are in a partnership with a NJ-based entity or institution and/or are in a facilities agreement with a NJ-based entity or institution in a capacity beyond that of a conventional private landlord.
- 4 of 19 were either invited to NJ by or are partnered with a NJ-based institution of higher education in a manner noted in the bullet above.
- 6 of 19 were either invited to NJ by or are partnered (as noted above) with a NJ-based public entity.
- 6 of 19 were invited to NJ by NJ entities that either are businesses or represent businesses or represent professionals.
- 3 of 19 were invited to NJ by entities which represent members of linguistic, cultural, or religious groups.
- 2 of 19 are either in "teach out" of NJ programs or not seeking re-licensure once current licensure period ends.
- 11 of 19 have enrollments in NJ below 100 students; 6 of the remaining 8 institutions have enrollments below 600 students and only 1 of the remaining 2 institutions has an enrollment greater than 1,000 students (Syracuse University, 1,896 enrollment, all of which are dual enrollment high school students).
- Currently, there are 5,190 total students enrolled full or part time in the 19 out-of-state institutions' NJ courses and programs, a number which represents *1.25 percent* of the total number of students reported enrolled (413,779) in New Jersey institutions in the fall 2018

IPEDS survey. This total includes 2,285 high school students enrolled in at least one dual enrollment course offered in NJ by one of two out-of-state institutions (Bard College; Syracuse University).

- The number of students enrolled in degree programs at the remaining 17 institutions is 2,905 students, or about *seven tenths of one percent* of the total 2018 fall enrollment at in-state institutions.
- Of these 2,905 students, 894 are enrolled in non-profit institutions, with 675 of these enrolled at just two institutions (Relay GSE; Wilmington University) and the remaining 219 students are spread out between the 9 remaining non-profit schools – none of which has NJ enrollment of greater than 100 students.
- Total for out-of-state for-profit NJ enrollment is 2,011 students statewide or slightly *less than one-half of one percent* of the total number of students enrolled in NJ-based institutions in fall 2018. 1,910 of those students are enrolled at the four out-of-state for-profit institutions that are NJPC members and are included in the NJ’s SURE and IPEDS enrollment data.

15. Syracuse University (Syracuse, NY)

Program: **licensed to offer 38 college credit-bearing courses in 36 public high schools**  
NJ enrollment: **1896.**

Year NJ licensure obtained: 1976

Institution invited by NJ-based entity or otherwise present in NJ due in part to partnership/agreement with NJ-based entity: **Yes, Syracuse has been invited by NJ public school districts to offer dual credit courses at 36 different high schools.**

Accrediting body: MSCHE

Notes: **All NJ Syracuse students are high school students enrolled in dual credit courses. Syracuse has been offering dual-credit courses in NJ since 1976 (43 years) and typically seeks to add new courses/locations annually. Accordingly, OSHE does not require a consultant review and report for each year Syracuse seeks to add courses or locations. To do so annually would be redundant, as the review is in large part an institutional one and institutions do not typically change significantly on an annual basis, as well as a waste of OSHE's limited capacity to conduct licensure reviews. However, Syracuse is expected to undergo consultant reviews at the same level of frequency as other out-of-state institutions, which is every five years, and Syracuse is currently undergoing such a review in 2019.**

16. Thomas Jefferson University (formerly Philadelphia University) (Philadelphia, PA)

Program: **licensed to offer a M.S. in Physician Assistant Studies**

Accrediting body: MSCHE

17. University of Phoenix (Phoenix, AZ)

Program: **licensed to offer bachelor degrees from one NJ campus. A full list will be provided upon request.**

Fall 2018 NJ enrollment: **47.**

Year NJ licensure obtained: 2003

Institution invited by NJ-based entity or otherwise present in NJ due in part to partnership/agreement with NJ-based entity: **No, however in order to fulfill licensure criteria for its library Phoenix formerly had a library services contract with NJCU for over 10 years, which is now concluded.**

Accrediting body: HLC

Note: **Phoenix is a NJPC member with NJ Campus President (Dr. Miriam Frolow) representing the institution at NJPC meetings. Phoenix has announced the pending closure of its only Jersey City campus after “teach out” plan concludes, which is anticipated to be no later than 2022. OSHE conducted a licensure review in 2014 for a number of new degree programs in NJ at Phoenix that included a review by a highly-qualified consultant team. Subsequently, Phoenix submitted a plenary re-licensure petition in 2015 for which OSHE declined to require a consultant review. Such a review would have been redundant, as the review is in large part an institutional one and institutions do not typically change significantly on an annual basis, as well as a waste of OSHE’s limited capacity to conduct licensure reviews. OSHE will conduct a full licensure review including consultants in 2020 should Phoenix seek to continue to operate in NJ past the licensure expiration date next year.**

18. Virginia University of Integrative Medicine (Fairfax, VA)
