Helping New Jersey Manufacture Success

EDUCATIONAL RESOURCE DIRECTORY

The *Go To* Guide for Training New Jersey Manufacturer's Employees

EDUCATIONAL RESOURCE DIRECTORY

The *Go To* Guide for Training New Jersey Manufacturer's Employees

New Jersey Manufacturing Extension Program (NJMEP) serves as trusted business advisors and technical experts to New Jersey manufacturing companies. NJMEP has helped thousands of manufacturers improve operations, increase profits, create or maintain jobs, and establish a foundation for long-term business growth and productivity. Since Year 2000, NJMEP has worked with thousands of manufacturers leading to more than \$2.8 billion in increased/retained sales, \$390 million in process improvement savings, \$672 million in capital investments and helped create and retain more than 33,632 jobs. NJMEP has helped manufacturers realize more than \$3.8 billion in value.

Introduction

If you want to find a new car, a new restaurant, or new technology for your office, there are resources you can count on to help make the job easier. Until now, New Jersey has not had a single source at its disposal to provide locations in assisting manufacturers to train their employees. However, State, county and even local governments have their own resources (as do private entities), and NJMEP seeks to fill the need for New Jersey Manufacturers with this Guide.

How To Use The Eductaional Resource Directory

NJMEP has done the research and contacted key training resources in New Jersey to determine primary contacts. For example, if you are looking to train high school graduates we suggest starting with the "County College" section, (many of their related offerings are included in the "County College Degree and Certificate Sections") In other instances, if you are seeking basic skills training you can look in the "Vo-Tech" section, or if a specific or unique background is required you can go directly to the "WDB" (Work Force Development Board / One Stop Center).

We understand that some training needs are more complicated as they involve employees from multiple sites or counties, or custom programs may be required for a large group. NJMEP is here to help. Please contact our Talent Network team: Constantina Meis, cmeis@njmep.org or Michael Marchetti, mmarchetti@njmep.org for any further assistance.

Updates / Corrections / Comments

Please send updates, correction or any comments to: resourcedirectory@njmep.org

EDUCATIONAL RESOURCE DIRECTORY

The *Go To* Guide for Training New Jersey Manufacturer’s Employees

I. NJMEP RESOURCES

NJMEP has a proven record of helping your company to increase its efficiency, productivity and revenue. Best practices, civic engagement, networking with colleagues and vendors, group workshops and customized consulting and training are available. Hundreds of manufacturers like yours have experienced measurable improvements to help them grow and prosper through their affiliation with NJMEP.

I. NJMEP RESOURCES

NJMEP Key Services

OPERATIONAL EXCELLENCE

Manufacturers need to continuously improve their processes and systems in order to produce high quality products and parts efficiently and profitably. Achieving operational excellence helps manufacturers increase customer satisfaction while saving time and money.

<https://www.njmep.org/services/operational-excellence/>

INNOVATION & GROWTH

The difference between surviving and thriving is the prioritization of innovation and growth. Manufacturers must embrace these concepts to try new business models, enhance or create products and parts, and pursue new strategies.

<https://www.njmep.org/services/innovation-and-growth/>

WORKFORCE DEVELOPMENT

Manufacturing's rapid evolution due to technological advancements, customer needs, and changing demographics has heightened the demand for a skilled and developed workforce. The future success of your organization is heavily reliant on the continuous improvement of your team.

<https://www.njmep.org/services/workforce-development/>

COMPLEMENTARY ASSESSMENTS BY NJMEP

NJMEP is often asked to come in and solve a specific problem – like fulfilling orders faster or eliminating excess inventory. Our process begins with a comprehensive business assessment, during which we work with owners, executives, managers and operators to assess company needs in all areas. The assessment delivers a road map to improve competitiveness, performance, and your bottom line.

We evaluate key opportunities, isolate obstacles to growth, and make recommendations on how to improve your business. We will design and implement a 3-year consulting/training plan that yields lower costs, higher production, and increased product quality to meet your customer demands quickly, staying focused on doing the things that add value.

<https://www.njmep.org/contact-us/request-a-complimentary-assessment/>

WORKSHOPS & EVENTS

As the world changes, we need both the proper education and interaction with our peers to enable our personal and professional skills to advance in a dynamic industry environment.

<https://www.njmep.org/workshops-and-events/>

COMPLIANCE

New regulations and laws such as FSMA, FDA Regulations, DEP and OSHA.

<https://www.njmep.org/workshops-and-events/>

Apprenticeships

The Apprenticeship Program – NJ’s New Career Pathway... Where Education and Workforce Development Converge

Apprenticeships offer many NJ workers the opportunity to receive an “earn-while-you-learn” education. Relevant professional credentials support job performance and open the door to sustainable income.

Pre-apprenticeship programs on the High School level can progress to become applicants for full-time, paid apprenticeship positions with NJ employers. After graduating, participants have the chance to specialize and advance in their profession. They may take advantage of the many programs offered in NJ, listed in the Pro-Action Network overview offered by NJMEP.

Technical Sales Apprenticeship

1 Year, 2,000 hours

Sales excellence is as crucial to the manufacturing industry as skilled production workers are to their workshop. Participants experience more than 1,800 hours of On-the-Job-Learning (OJL) and 200 blended learning hours.

Employers develop sales staff from scratch with a focus on their fundamental technical understanding and their ability to persuade. This particular skill set will create sustainable jobs for future sales staff while securing business for the NJ manufacturer.

Manufacturing Production Technician Apprenticeship

1.5 Years, 3,000 hours

NJ’s manufacturers face a particular growth challenge. In order to take production, output and sales to the next level, they need qualified, skilled staff.

NJMEP’s Manufacturing Production Technician Apprenticeship Program includes 2,700 OJL hours and 300 hours of Related Technical Instruction (RTI). Additionally, these apprentices earn certifications from the Manufacturing Skill Standards Council (MSSC). These credentials focus on the core skills and knowledge needed for the manufacturing industry. Graduates from this program have a greater chance of employment in several manufacturing industries in NJ.

Certified Logistics Technician Apprenticeship

1.5 Years, 2,000 hours

The common ground for manufacturing companies’ and the Transportation, Logistics & Distribution industry is supply chain.

This one-year Logistics Technician apprenticeship program focuses on the most relevant knowledge regarding safe material handling and equipment operation, lean production and supply chain. In 1,800 hours of On-the-Job-Learning (OJL) and 200 blended learning hours, participants will have the opportunity to demonstrate mastery of the core competencies of material handling and receive two industry-valued credentials from MSSC.

Workshops and Training (Complimentary and Open Enrollment)

OPERATIONAL EXCELLENCE

Cyber Security: Secure The Manufacturing Product Line

COMPLIMENTARY WORKSHOP

Today's expanding cyber threats necessitate action. Join us for an introductory 2-hour workshop and get a taste of what an effective technology plan can do to keep the factory running. Leave with an understanding of the landscape; keep hackers out with some simple steps. You can take action proactively on with the knowledge you obtain.

Helping Your Organization Make the Most of 2018 Webinar

COMPLIMENTARY WORKSHOP

Your new year has begun – are you already behind? Every day we are faced with challenges and opportunities – organizations must plan for both. Your organization is not defined by any one situation; it is defined by how well you and your people are prepared and respond.

Optimize Inventory Management

COMPLIMENTARY WORKSHOP

Take cash-flow and processes to the next level with a targeted inventory management approach! As demand shifts in a constantly changing economy, it's important to effectively manage one of the highest asset values on your books – inventory. In this workshop we'll discuss basic concepts of inventory.

Principles of Lean Manufacturing With Live Simulation

OPEN ENROLLMENT

Implementing lean principles are extremely beneficial for manufacturing companies. The elimination of waste (muda), continuous improvement (kaizen) as well as pull-systems (kanban) will be illustrated in live demonstrations for practical, comprehensible knowledge of Lean Manufacturing.

WORKFORCE DEVELOPMENT

How To Be Successful In A (New) Leadership Role In 8 Steps

OPEN ENROLLMENT

Focusing on people in supervisory roles and those who are going to be in such positions soon. The NJMEP supervisory training equips participants to manage, supervise and lead staff

and tasks. The 6 step approach portions new knowledge and skills. The structure makes it easy to follow, one logical step after the next one.

Spanish For Managers And Supervisors

OPEN ENROLLMENT

This relaxed informal workshop provides a quick assist to the communication challenges of supervising workers whose first language is Spanish. A non-Spanish speaker can quickly and logically learn techniques of communicating essential information and instructions in Spanish. It's all about Understanding and Being Understood.

The 3 Big 'Effectives' In Negotiation Skills

OPEN ENROLLMENT

Negotiations are the art of influencing results positively. Sales, contract conditions, on-boarding talent or terms of all kind – many things are negotiable. Is there a way to become a better negotiator? This introductory 2-hour workshop gives you a taste of what effective negotiator do to influence the outcome.

Attracting And Keeping Employees: The Strategic Value Of Employee Benefits

COMPLIMENTARY WORKSHOP

Attracting and retaining a talented, committed workforce is crucial for employers. Employees' attitudes toward their health and retirement benefits directly correlate with their employment choices, as well as with their levels of commitment and engagement. Employers that target their benefit package to attract and keep valuable employees gain a valuable competitive advantage.

5 Important Features 401(k) Plans Must Have to Help Attract And Retain Employees

OPEN ENROLLMENT

401(k) Plan management has gotten very complicated and plan sponsors now more than ever need to ensure they are properly carrying out their governance and fiduciary responsibilities. This session covers 5 important features plan sponsors must have within their 401k plan to help attract and retain employees and how with these features a Plan Sponsor can further protect their fiduciary responsibilities.

Addiction in the Workplace

COMPLIMENTARY WORKSHOP

Addiction is extremely costly to companies and organizations, regardless of size, industry, or location. Employees who misuse substances have healthcare costs three (3) times that

For additional help contact our Talent Network team: [Constantina Meis, cmeis@njmep.org](mailto:cmeis@njmep.org),
[Michael Marchetti, mmarchetti@njmep.org](mailto:mmarchetti@njmep.org) or info@njmep.org

of an aver-age employee. It makes little difference whether it is an employee or a family member suffering from addiction, as employers pay for substance use disorder.

Industrial Hydraulics – Hands-On Training

OPEN ENROLLMENT

This hydraulic training course aims to familiarize participants with the design, construction and operation of hydraulic components; this includes the interpretation of circuit diagrams and symbols as well as pressure regulation and position of hydraulic drives.

For this class we are using industry relevant training equipment for hands-on, practical exercises and knowledge transfer.

Programmable Logic Controllers (PLC) Fundamentals Training

OPEN ENROLLMENT

This course will cover the basic operations of Programmable Logic Controllers. The participants will utilize a PLC in connection with pneumatic components.

Programmable Logic Controllers (PLC) Advanced Training

OPEN ENROLLMENT

This course will cover the advanced operations of Programmable Logic Controllers. The participants will utilize a PLC in connection with pneumatic components to test and troubleshoot PLC's.

Certified Production Technician (CPT) – Modules 1, 2, 3 and 4

OPEN ENROLLMENT

Through a partnership with NJMEP and the Manufacturing Skill Standards Council (MSSC), both entry level and incumbent workers have the ability to be certified as a Certified Production Technician (CPT) or Certified Logistics Technician (CLT) through the completion of approved coursework and training. Participants who complete the certifications will be educated in manufacturing processes and production, safety, quality, and maintenance among other important subject areas.

Quality Management Systems and ISO Certifications

OPEN ENROLLMENT

A quality management system (QMS) is critical to attracting and retaining customers. A QMS signifies that an organization adheres to international industry standards. ISO is designed to maintain optimum product and service levels and, in so doing, ensure cost effectiveness and customer satisfaction throughout all phases of manufacturing and distribution.

INNOVATION & GROWTH

Capturing the R&D Tax Credit: How The R&D Tax Credit Benefits Businesses Of All Shapes And Sizes

COMPLIMENTARY WORKSHOP

The R&D Tax Credit is available for companies engaged the development of new or improved products and processes. First enacted in 1981, the R&D Credit is now permanent and expanded with new provisions that enable more companies to monetize the credit.

Destination Innovation

OPEN ENROLLMENT

Destination Innovation is a robust, step-by-step process for creating and delivering customer-targeted product, marketing, and business-model solutions and has been taught to, and utilized by, more than 200 manufacturers in New Jersey alone.

Dynamic Strategic Planning

OPEN ENROLLMENT

Classic business planning is outdated and overlooks the volatility of today's market which can lead to many missed opportunities or leave companies blindsided by new developments. In a fast-paced world with constant changes, a flexible approach to the planning process is needed. The answer: Dynamic Strategy Planning.

Executive Seminar: Business Growth Suite

OPEN ENROLLMENT

Are sales sluggish? Is competition for your legacy products heating up? Are your margins eroding and you don't have an answer on how to stop the slide? Is your sales staff unmotivated and underachieving? NJMEP is hosting an Executive Seminar to teach some of the fundamental skills and strategies from its popular Business Growth Suite program.

Predictive Insights - Looking For Clues In Advance Of A Crisis Webinar

COMPLIMENTARY WORKSHOP

In this webinar, we will discuss how you can work toward eliminating crisis surprise, disaster denial and self-deception by using technology and analysis to identify potential issues before they evolve into a crisis.

Preparing for Change: The Impact of the Tax Cuts and Jobs Act 120 Days Later

COMPLIMENTARY WORKSHOP

As we move through 2018, we find ourselves in the midst of some of the most significant tax law changes in decades. The changes within the Tax Cuts and Jobs Act will impact people throughout New Jersey, and the country, and will change the way both businesses and individuals plan for 2018 and beyond.

For additional help contact our Talent Network team: [Constantina Meis, cmeis@njmep.org](mailto:Constantina.Meis@njmep.org),
[Michael Marchetti, mmarchetti@njmep.org](mailto:Michael.Marchetti@njmep.org) or info@njmep.org

Retain, Recruit, Reinvent: Three Steps to Keep Today's and Attract Tomorrow's Talent

OPEN ENROLLMENT

As we move through 2018, we find ourselves in the midst of some of the most significant tax law changes in decades. The changes within the Tax Cuts and Jobs Act will impact people throughout New Jersey, and the country, and will change the way both businesses and individuals plan for 2018 and beyond.

Six Sigma – Green Belt - 6 Day Certification Training

OPEN ENROLLMENT

Six Sigma is a universally-recognized standard of excellence for continuous process improvement. This course will prepare you for Green Belt certification – an accomplishment that will add value to your company and your career.

FOOD MANUFACTURING

Good Manufacturing Practices (GMP) Requirements & Readiness

OPEN ENROLLMENT

NJMEP is hosting a GMP Requirements and Readiness Training Course, teaching some of the fundamental skills and strategies to ensure compliance with new FSMA regulations from its popular Business Growth Suite program.

Food Allergens

OPEN ENROLLMENT

NJMEP is hosting a Food Allergens Training Course to teach some of the fundamental skills and strategies to identify food allergens in your facility to produce safe products. This course will elaborate on the major food allergens and how they affect Good Manufacturing Practices (GMPs) and Food Safety Principles for food manufacturers and suppliers.

Food Defense

OPEN ENROLLMENT

The purpose of the food defense plan is to prevent food products from being adulterated by any source, inside or outside the company. Such acts intended to cause widespread harm to public health, including but not limited to acts of terrorism intending to target food supply, could cause illness, death and economic turmoil to the food supply.

Food Recall

OPEN ENROLLMENT

In this course you will learn about the types of products that are regulated by the FDA under FSMA and the process of creating a food recall plan to ensure effective market withdrawals and to reduce / eliminate product incidences occurring with food manufacturers and suppliers. You will learn to assess the impact of food recalls on a company's reputation and brand trust with the consumer.

HACCP (Hazard Analysis And Critical Control Points)

OPEN ENROLLMENT

Participants will learn about the background of HACCP as a food safety system and how it can be practically applied. The course covers the 5 preliminary steps and 7 HACCP principles are required by the codex alimentarius. This is hands-on training which will guide you through the steps to develop and implement a science based HACCP Program for your facility.

Internal Auditing For Food Safety Management Systems

OPEN ENROLLMENT

Internal auditing is one of the main requirements for a food safety management system (FSMS) and the most effective way to evaluate its effectiveness. Once a food safety management system is in place and implemented, the only way to verify that all requirements of the system are being implemented correctly is through an internal auditing program.

Corrective Action And Root Cause Analysis

OPEN ENROLLMENT

In the first part of the training class, participants will learn the common methodologies of root cause analysis and how to apply them during case studies and practical exercises. The second part of the training class will focus on the implementation of an effective corrective action process including methodologies and evaluation of effectiveness.

Preventative Controls For Human Foods

OPEN ENROLLMENT

NJMEP is hosting a Preventive Controls for Human Foods – PCQI course to teach you the fundamental skills of how to create a food safety plan for your facility. The course will go in-depth with the requirements Hazard Analysis and Risk-Based Preventive Controls based food safety plan training.

Foreign Supplier Verification

OPEN ENROLLMENT

This course will provide the knowledge to implement the requirements of the Foreign Supplier Verification Program for importers of food for humans and animals.

SQF Practitioner

OPEN ENROLLMENT

The SQF Practitioner training covers the requirements of the SQF Code and the food quality and safety plans. You will learn how to implement, maintain and audit the SQF system. At the end of the training, you will have the understanding of the SQF program and be ready to take the certification test to be designated as an SQF Practitioner.

Events and Engagement

Manufacturing Day

NJMEP celebrates New Jersey manufacturers who develop and manufacture products and unlock new technologies that grow our economy. They create jobs through entrepreneurship, and their competitiveness revitalizes American manufacturing. National Manufacturing Day aims to empower manufacturers, change public perception about the industry, highlight its economic impacts, and introduce more people to available career.

State of the State

This event brings together manufacturing and STEM Firm executives, and NJ elected officials to network and discuss opportunities and challenges within the industry. You will have the opportunity to listen to industry experts discuss best business.

Capital Hill Day

MEP is a catalyst for strengthening American manufacturing – accelerating its ongoing transformation into a more efficient and powerful engine of innovation driving economic growth and job creation. NJMEP is one of over 50 MEP Centers across the U.S. and Puerto Rico. Hill Day consists of meetings with each of the New Jersey congressional delegates in the House and Senate office buildings to discuss manufacturing and the important role that NJMEP and the MEP National Network play in assisting small to mid-sized U.S. manufacturers.

Facility Tours

NJMEP has a long history of working with manufacturers to set up visits by legislators, students and scouts. These visits are key to raising the awareness of the power of manufacturing as both an economic driver in the State and as a viable career path. The importance of manufacturing in New Jersey is often overlooked. Hosting a visit can change that. Give us a call... we'll work with you to set up a visit.

 howler@bergen.org

Applied Technology High School, Paramus

With a curriculum centered on “smart machines,” students learn to apply math, science, and technology to hands-on projects in the fields of automation, electronics, and advanced manufacturing. They also learn the essential skills they need to pursue careers in a wide variety of areas, including engineering technology, and benefit from dual-enrollment coursework that allows them to earn advanced standing in several technical associates degree programs at Bergen Community College, including an A.A.S. program in General Engineering Technology.

Pre-engineering/Industrial Track

The Pre-Engineering curriculum focuses on engineering practices relative to problem solving, conceptual and product design, programming, manufacturing, documentation, and presentation. Applications to these processes include but are not limited to: 3D modeling, robotics programming, rapid prototyping, conventional and CNC machining, and digital electronics. Students use computers, engineering graphics, testing devices, and other equipment in a laboratory setting. Students also learn the principals of technical reading and writing, and legal and professional ethics of engineering.

D-FAB: Design, Fabrication and Mechatronics

This new program, focused on design, fabrication and mechatronics, will grow the next generation of technology workers through skill development and flexible degree pathways. With multiple access points and degree/training options for learners from high school through college, the program has been planned and implemented in collaboration with employers and higher education. The program will utilize the dual training model employed in Germany, through which students will learn in school and on the job.

Full Time STEM Academy

The Mercer County Technical School District launched a STEM (science, technology, engineering and math) Academy in September 2015. The STEM Academy, a partnership with Mercer County Community College, provides Mercer County high school students with academically challenging and rigorous curriculum including Project Lead The Way, a project and problem-based curriculum. Students are working toward the completion of college credits and industry credentials while in high school. Student learning is enhanced through key business partnerships allowing for multiple workplace readiness and experiential learning opportunities. In this specialized learning environment, students will apply what they know, identify problems, find unique solutions, and lead their own learning.

Precision Machine Technology (a 10-month accelerated program for adult students)

The OCVTS Precision Machine Technology Program (PMT) offers accelerated training in modern and relevant career pathways in the manufacturing industry. Areas of study include: Computer Numerical Control (CNC) theory and operations, manual machine operations (mill and lathe), basic welding, automation, prototyping, production planning, CNC milling, CNC lathe, engineering analysis and quality control, theory, programming and operations, and robotics. Students are afforded the opportunity to receive OSHA-10 Safety Certification Training.

School of Applied Technology

Manufacturing Technology introduces young minds to the metal fabrications industry. The goal of the course work is to prepare students for entry level employment in the machining industry or to continue on to post-secondary training. Students work in a state of the art manufacturing training facility. The technical lab is equipped with a computer lab offering training in MasterCam, and has a production floor equipped with manual lathes, mills, surface grinders, saws and surface

For additional help contact our Talent Network team: [Constantina Meis, cmeis@njmep.org](mailto:cmeis@njmep.org),

grinders. The CNC lab is equipped with state of the art HAAS lathes and mills. Recently the program has adopted an articulation agreement offering 10 credits in Applied Metrology, Machine Tool Principles and CNC Programming. Upon completion of this comprehensive program, students are afforded the opportunity to either enter the workforce, continue to post-secondary training or a combination of both pathways.

School of Applied Engineering

The rigorous and relevant four-course sequence allows students to integrate the fields of CAD/drafting, digital electronics and engineering principles as they study the concepts of technical skills for the design, integration of systems, the execution of new product designs, the improvement of manufacturing processes, and the management and direction of physical and/or technical function within logistics, manufacturing and supply chain operations. In Applied Engineering, students engage in open-ended problem solving, learn and apply the engineering design process, and use the same industry-leading technology and software. Students are immersed in design as they investigate topics such as sustainability, mechatronics, forces, structures, digital electronics and circuit design, manufacturing, which gives them an opportunity to learn the application of engineering disciplines before entering the workforce or post-secondary education. This program offering consists of three interrelated courses by the end of the third year of implementation: Introduction to CAD /Drafting, concepts of Engineering, and a specialization course or the capstone course in Engineering Design & Development.

Mechatronics, Engineering and Advanced Manufacturing (MEAM)

The MEAM program is offered through a partnership with Raritan Valley Community College (RVCC), as well as local businesses to educate students to apply mathematical and scientific principles to the design, development and operational evaluation of physical systems used in manufacturing and end-product systems used for specific uses. As part of the partnership, RVCC will offer a minimum of thirteen college credits for students who successfully complete the program. Upon graduation, students will be ready to enter the workforce or pursue further education in highly coveted science, technology, engineering and math (STEM) careers.

III. STATE RESOURCES

Programs and Offerings from the State of New Jersey

The State of New Jersey offers many resources that can be helpful to your organization. These resources include opportunities from the Governor’s office through the Business Action Center and the Department of Labor. The New Jersey legislature has also taken initiatives through the creation of the Manufacturing Caucus. Our state government also has initiatives to help minority and small business as well as to conquer red tape, including administrative and legislative obstacles. To find out more about these programs, please contact: Constantina Meis, cmeis@njmep.org or Michael Marchetti, mmarchetti@njmep.org

NJBAC -Training Support

The New Jersey Business Action Center (NJBAC) is a state agency offering free and confidential assistance to help your business grow. As a “one-stop shop,” NJBAC can help businesses of all sizes and types manage the state’s regulatory processes, boost exports, gain access to financial resources where applicable and tackle other obstacles along the way. Visit their website <https://nj.gov/state/bac/> where you can download the NJBAC guide or contact their business advocates at 1-800 JERSEY 7.

BPU / Energy Efficiency

The Board of Public Utilities (“Board”) is the state agency with authority to oversee the regulated utilities, which in turn provide critical services such as natural gas, electricity, water, telecommunications and cable television. The law requires the Board to ensure safe, adequate, and proper utility services at reasonable rates for customers in New Jersey. The Board addresses issues of consumer protection, energy reform, deregulation of energy and telecommunications services and the restructuring of utility rates to encourage energy conservation and competitive pricing in the industry. The Board also has responsibility for monitoring utility service and responding to consumer complaints.

New Jersey’s Clean Energy Program (NJCEP) promotes increased energy efficiency and the use of clean, renewable sources of energy including solar, wind, geothermal, and sustainable biomass. The results for New Jersey are a stronger economy, less pollution, lower costs, and reduced demand for electricity. NJCEP offers financial incentives, programs, and services for residential, commercial, and municipal customers.

NJEDA

The EDA offers a multitude of programs to support manufacturing companies located in New Jersey, as well as to attract those companies outside of New Jersey that are seeking to relocate or expand, and have created special programs to help manufacturers reduce costs. The EDA can serve as a one-stop service center for the financing and growth needs of your manufacturing business. Depending on your business goals, the EDA may have a financial solution that works for you.

Grow NJ Assistance Program

Grow NJ is a powerful job creation and retention incentive program that strengthens New Jersey’s competitive edge against tax incentive programs in surrounding states. Businesses that are creating or retaining jobs in New Jersey may be eligible for up to tax credits ranging from \$500 to \$5,000 per job, per year; with bonus credits ranging from \$250 to \$3,000 per job, per year (award amounts vary based on applicable criteria.)

Bond Financing

Creditworthy manufacturing companies, 501(c)(3) not-for-profit organizations, and exempt facilities in New Jersey may be eligible for long-term financing under the Bond Financing Program.

Direct Loans

New Jersey businesses in need of financing and committed to job creation/retention may be eligible for direct loans through EDA when financing is not available under other EDA financing programs.

Premier Lender Program

The Premier Lender Program creates new opportunities for small businesses and EDA’s lending partners by providing new, low-cost financing opportunities with faster turnaround.

If your small business is discussing potential financing with one of EDA’s Premier Lender banks, EDA’s participation or guarantee of a portion of the financing can lower the cost of borrowing for your business.

Salem County Energy Sales Tax Exemption

The program provides an energy sales tax exemption for the retail sales of electricity and natural gas and their transport to manufacturing businesses in Salem County. The energy and utility services must be consumed exclusively at the facility.

Urban Enterprise Zones (UEZ) Manufacturers Energy Sales Tax Exemption

Urban Enterprise Zone (UEZ)-certified manufacturers that employ at least 250 full-time workers, at least 50% of whom are involved in the manufacturing process, may be eligible for an exemption from the sales and use tax for electricity and natural gas utilities, both the commodity and its transmission, consumed at the UEZ-certified location.

How To Identify/Contact Your Legislator

<https://www.njleg.state.nj.us/districts/municipalities.asp>

NJMEP has worked with manufactures to meet their legislators, have them tour facilities and attend events, exposing the fact that over 11,000 manufacturers/STEM firms are active in all 40 legislative districts.

This NJMEP outreach initiative has helped to create the Manufacturing Caucus (see Page 23), which helps ensure the legislature is aware of, and react appropriately to, issues, important to our industry. NJMEP can help you to meet your legislators, set up a tour, or assist with any state issues regarding jobs, productivity, red tape, or other issues you may have. In order to become active in outreach, please contact: Constantina Meis, cmeis@njmep.org or Michael Marchetti, mmarchetti@njmep.org

Legislative Manufacturing Caucus

New Jersey state legislators have renewed their mission to strengthen New Jersey manufacturing and help employers put New Jerseyans back to work by establishing the bipartisan Manufacturing Caucus. The Caucus is focused on enhancing the productivity, capacity, and competitiveness of New Jersey manufacturing.

NJMEP has been a strong advocate and partner of the Manufacturing Caucus and works closely with legislators across the state. NJMEP will aid in the recruitment and expansion of the talent pipeline, and help create new pathways and opportunities for countless residents to find stable and rewarding middle-class jobs.
