

SURE Submission Layout File Specifications

This guide serves as a reference in preparation to submit a SURE file in a format that will successfully load to the SURE SQL database. This document is intended to serve as a checklist, but does not replace the [data dictionary](#).

All fields identified with a “Y” in the column titled “*Required*” are required. The “*Page*” column indicates the page number of the data dictionary on which more information for the specific field can be found. Pages in **BOLD** indicate fields that have historically been prone to errors and thus merit closer attention. If you have any questions, please e-mail research@oshe.nj.gov.

STEP 1: Create Student Unit Record

SURE data files should use the layout below. Each SURE file must be submitted in .xlsx format.

IMPORTANT: Do not enter commas, dashes, or slashes in any of the fields. For all fields with “*Text*” in the “*Variable Type*” column below, select the entire column in the file and change the type from “General” to “Text” and then paste as values

Files must be submitted using the file extension XLSX). All SURE files must contain the appropriate naming convention for successful submission. Please review the naming convention criteria and examples below.

Click the “File Upload” tab to upload your file. If your file successfully uploads, you will then click the “File Tracking” tab. **Note that there are separate procedures for processing the file depending on if the file is the first version being submitted or is a revised version.** If you are submitting the first version of a file, you may simply click “Process” button. If you are submitting a revised file, **you must first search for the file name by using the filters in the drop down menus for file type, semester, year, and school. Once you find the correct file you are replacing, use the checkbox under the “Process” column before clicking the “Process” button.** For tracking purposes, we recommend that institutions create an internal file repository to track file submission that is updated to reflect subsequent version submissions. You can check the status of the file import process by searching for the file using the file tracking page filters, see screenshot below.
