HNJH Self Direction – Personal Preference Program (PPP)

The New Jersey Personal Preference Program (PPP) offers an alternative way for Medicaid/NJ FamilyCare members who meet the requirements for Personal Care Assistant (PCA) services to receive the services, and does not require the use of a home health care agency. You are the employer of your chosen workers.

HNJH Self Direction – Personal Preference Program (PPP) continued

What are PCA services?

PCA services are non-emergency, health related tasks. Tasks include help with activities of daily living (ADLs) essential to the member's health and comfort, such as bathing, dressing, meal preparation, and light housecleaning. These services assist members to remain in their home and community.

What does PPP mean for our members?

1. You choose who, you can hire. You can choose someone you trust, a friend or family member to care for you.
2. You choose when, you develop the schedule directly with your chosen worker.
3. You choose what, you decide what your chosen worker will help you with.

HNJH PPP Web Page - How to get started?

1. Obtain a prescription from your doctor for Personal Care Assistance (PCA).
2. Once the prescription is received from your doctor, you will need to have an in-home PCA Assessment conducted by a Horizon NJ Health Registered Nurse.
3. If you qualify for PCA services, the Horizon NJ Health Nurse will discuss options such as self-direction or agency PCA.
4. If self-direction – personal preference program is right for you, the Registered Nurse/Care Manager will assist you in applying.

HNJH PPP Web Page - How to get started?

continued

5. Applications are processed by **PCG Public Partnerships, LLC (PPL)**, the fiscal intermediary (FI) for PPP. PPL is responsible for background checks, enrolling caregivers as employees, budget planning, processing time sheets, training on electronic visit verification (EVV) and issuing paychecks. PPL notify you and Horizon of the PPP Start Date.
6. On a quarterly basis, a PPL financial consultant will conduct a home visit to discuss your care plan, monthly budget and back-up plan to make sure they are meeting your needs.
7. To remain on the program, a Horizon NJ Health Nurse will reassess all PCA and PPP members at a minimum annually.

The Personal Preference Program (PPP) allows you greater flexibility and control over the care you need by self-directing your Personal Care Assistance (PCA). PPP allows you to hire, train, and schedule the people you want to provide the care you need, when and where you need it. PPP is an alternative to traditional agency-delivered PCA, one where you are in control.

- Comprehensive program information, including requirements
- Resources, such as FAQs, links to Financial Intermediary and DMAHS PPP site
- Contact information and instructions for program application
- What to expect during the application and enrollment process

UHCCP Summary of Upcoming Changes

What we heard from you:

- Site is difficult to navigate and PPP information is hard to find
- More information depth is needed. You want to see information on PCA assessment process, how to request services, timelines and eligibility
- You want to see specific program information and links out to our financial intermediary and the DMAHS websites
- You want the information to be accessible to those who may speak languages other than English or require accessibility accommodations

What we're doing to improve our website:

- Adding direct links to a Personal Preference Program page from multiple places on the website, so it's easy to find PPP information from anywhere
- Developing content that provides both high-level and In-depth program information
- Clearly explaining the application process, including how to request, the PCA assessment process and enrollment timelines.
- Our website can currently be viewed in both English and Spanish from the landing page, and UHC offers accessibility support at 1-844-386-7491. TTY or RTT users can dial 711. We are exploring ways provide PPP information to people who speak other languages directly on our PPP page.

Personal Preference Program (PPP)

The New Jersey Personal Preference Program (PPP) offers an alternative way for NJ Family Care members who qualify for the Personal Care Assistant (PCA) services benefit to remain in their home and active in their community, and does not require the use of a home health care agency.

PCA services are non-emergency, health related tasks through NJ FamilyCare. Tasks include help with activities of daily living (ADLs) and with household duties essential to the patient's health and comfort, such as bathing, dressing, meal preparation, and light housekeeping.

You will work with a financial consultant to develop a monthly budget, through which you will decide the services you need and the individuals and/or agencies you wish to hire to provide the identified services. If you are cognitively impaired or unable to make decisions on your own, you can choose an authorized representative to assist you.

The PPP also provides fiscal management services to assist you with the financial aspects of the program. PCG Public Partnerships, LLC (PPL) is the fiscal intermediary (FI) for the PPP, and is responsible for handling payroll responsibilities, acting as a bookkeeping service, processing time sheets and issuing paychecks to your workers.

The PPP requires greater individual responsibility, but in return, offers you greater control, flexibility and choice over the services you receive.

3. Hear ideas and suggestions for improving the program going forward and any feedback people wanted to share.

What we heard:

Each conversation provided valuable feedback, recommendations, and discussion that shape the transition approach as we move forward.

Themes from these conversations included:

- It is important to improve coordination of PPP services between members & authorized representatives, workers, caregivers, families, MCOs, and the fiscal intermediary they are working with;
- Assuring transition communications are available and up-to-date through both the PPP website and managed care organizations is essential; and
- Continued community participation will ensure the success of this transition.
