Informational report

NJ FamilyCare Perinatal episode of care Pilot

Provider  SAMPLE PROVIDER  ID 9999999

Reporting period covering episodes that ended between January 1, 2020 to December 31, 2020

Purpose of this document

This document is meant to help you decide whether to participate in the voluntary perinatal episode of care pilot within NJ FamilyCare. Performance Period 1 will be April 1, 2022 to June 30, 2023. This document allows you to compare your historical performance to your anticipated quality thresholds and spend benchmarks if you were to participate. The pilot’s primary goal is to improve the quality of perinatal care delivered within NJ FamilyCare (NJ Medicaid/CHIP) by identifying a single accountable obstetrical provider for a maternity patient’s care, and giving you information about that care’s quality and spend. An episode of care includes most care related to a birth event, starting in the prenatal period through 60 days postpartum. Participating providers have the opportunity to receive financial incentives based on quality, spend, and profile of your episodes. The pilot only includes care for birth events paid for by managed care.

Average risk-adjusted episode spend based on 50 included episode(s)

- **Above benchmark**
- **Within corridor**
- **Below benchmark**

Your benchmark:

2020-Q1: $4,300
2020-Q2: $6,200
2020-Q3: $4,700
2020-Q4: $6,200
YTD (weighted*): $5,200
CY’19 peer median: $5,350

See a detailed version on page 9 and historical performance.

- **Shared Savings**
- **High Performer**

Your year-to-date spend is not less than your threshold for shared savings (i.e., 97% of 2019 benchmark).

Your year-to-date spend is less than that of 50% of your peers (i.e., CY2019 peer median).

Episode volume of 50 included episode(s)

- **Shared Savings**
- **High Performer**

You have at least 15 included episodes in the current performance period.

You have at least 15 included episodes in the current performance period.

Total eligibility: 

THIS IS AN INTERIM REPORT ONLY. Financial incentives will not be finalized until the end of the Performance Period.

Winter 2021 report: Episodes ending Q1 2020 - Q4 2020

Episode quality: Metrics linked to payment

How does my quality look across the five payment linked metrics?

- Below minimum
- Minimum
- Commendable
- Your performance
- YTD peer median

### Prenatal depression screening

- **Your performance DOES NOT pass the minimum threshold**
- Percentage of valid episodes where patient receives prenatal screening for depression using a standardized, validated tool (e.g., Edinburgh Postnatal Depression Scale).

### Gestational diabetes screening

- **Your performance DOES NOT pass the minimum threshold**
- Percentage of valid episodes where the patient receives prenatal screening for gestational diabetes, or has an existing diabetes diagnosis.

### Delivery mode

- **Your performance DOES NOT pass the minimum threshold**
- Percentage of valid episodes for patients without a prior C-section and with a live term singleton newborn in vertex presentation where that patient delivers vaginally.

### Post-partum visit within 3 weeks

- **Your performance passes the minimum threshold**
- Percentage of valid episodes where the patient receives an obstetric follow-up visit (with the PAP or another provider) within 21 days of discharge.

### Neonatal visit within 5 days

- **Your performance DOES NOT pass the minimum threshold**
- Percentage of valid episodes with newborn linked to the delivering patient where the newborn receives a wellchild visit within 5 days of trigger end.
**Information for payment incentives**

**Episode quality for payment-linked metrics, demographics by patient race/ethnicity**

- **Prenatal depression screening**
  - **Average**: 6%
  - **White**: 1%
  - **Black**: 4%
  - **Hispanic/Latino**: 0%
  - **Other**: 0%
  - *n=49*

- **Gestational diabetes screening**
  - **Average**: 84%
  - **White**: 30%
  - **Black**: 25%
  - **Hispanic/Latino**: 81%
  - **Other**: 24%
  - *n=49*

Do I qualify for the SUD Participation Incentive?

The SUD Participation Incentive is designed to encourage participation by providers whose patient panel includes many with SUD needs. It also is meant to prevent disincentivizing care by participating providers of patients with SUD needs.

10% of your patients have SUD needs

- SUD episodes
- Episodes without SUD

90% episodes without SUD

10% SUD episodes
5 episodes

SUD episode
Represents an episode where the patient has a Substance Use Disorder (SUD) diagnosis.

How does my service of patients with SUD needs compare to my peers?

You are below the top quintile of providers in service of patients with SUD needs which does not meet the criteria for the SUD participation incentive.

Additional performance insights

Birth events under fee-for-service NJ FamilyCare, volume and quality

Quality around Fee-for-service birth events

Fee-for-service NJ FamilyCare is care reimbursed through Gainwell, and not through one of our five managed care companies. Members whose birth event is paid by fee-for-service NJ FamilyCare are less comparable those paid by managed care NJ FamilyCare. As a result, they are excluded in the pilot at this time. You are not currently held financially responsible for them, but we share quality information for your information.

Volume of Fee-for-service care: The following quality metrics are based on 2 fee-for-service events (a subset of the 5 birth excluded event(s) from your total of 55).

What is being measured?

Episode quality-of-care

The episode model measures quality by measuring markers of high quality care that can be identified through claims data (rather than clinical sources like EMRs) to minimize administrative burden on participating providers. These measures flag both indications of activity (e.g. well-child visits and obstetrical follow-ups) as well as documented diagnoses that indicate relevant aspects of patient care (e.g. diagnosis of substance use disorder).

There are five payment-linked quality metrics. You must pass “minimum” levels to be eligible for Shared Savings and the High Performer Bonus. In addition, you must pass “commendable” performance on at least two of these metrics to qualify for the High Performer Bonus. Payment-linked quality metrics will be scored in relation to predetermined acceptable and commendable thresholds set from the benchmark year.

You will also receive information on supplemental “reporting-only” metrics to track your performance. Definitions of each quality metric follow in the next section.

Episode cost-of-care

The episode relies on a fair comparison of the total spend on all relevant claims included in valid episodes. All spend relevant to patients’ maternity care is bundled, and includes care delivered by the principal accountable provider (PAP) as well as other providers. To achieve comparability across patients and providers, this episode spend is then risk-adjusted based on patient risk factors to produce risk-neutral episode spend metrics that are used to compute eligibility for financial incentives.
# How is quality-of-care being measured?

<td>Equals line (1) times line (9).</td>
</tr>
<tr>
<td>11. Gain sharing proportion</td>
<td>50%</td>
<td>Proportion of spending eligible for gain you share in.</td>
</tr>
<tr>
<td>12. Total gain share</td>
<td></td>
<td>Total Shared savings payment; equals line (10) times line (11).</td>
</tr>
</tbody>
</table>

1. These values subject to change between Interim and Final Performance reports. Eligibility for Shared savings will be determined at end of the performance period and any applicable incentives will be calculated at that time.
2. If avg. risk-adjusted spend (5) is greater than 103% of the benchmark (i.e. the higher corridor of the benchmark spend) (6) this could lead to risk sharing. However, since risk sharing is not in place for the current Performance Period, there will be no financial penalties.
3. If avg. risk-adjusted spend (5) is greater than benchmark (6) this would state “Higher corridor of benchmark spend; equals line (6) multiplied by 103%.” Since risk-sharing is not in place for the current Performance Period, this is calculated for informational purposes only.
4. If avg. risk-adjusted spend (5) is greater than benchmark (6) this would represent the risk-adj. spend per episode above threshold. Since risk sharing is not in place for the current Performance Period, this is calculated for informational purposes only.
How are my incentive payments calculated?

### HIGH PERFORMER BONUS

<table>
<thead>
<tr>
<th>Component</th>
<th>You¹</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>13. Target bonus per episode</td>
<td>$1,500</td>
<td>Target bonus per episode for qualifying providers.</td>
</tr>
<tr>
<td>14. Capped bonus per episode</td>
<td>$1,500</td>
<td>Bonus is subject to caps on the total amount that may be paid out because of the fixed pool fund for this bonus.</td>
</tr>
<tr>
<td>15. Total High performer bonus</td>
<td>N.A.</td>
<td>Total High performer bonus; equals line (2) multiplied by line (14).</td>
</tr>
</tbody>
</table>

### SUD PARTICIPATION INCENTIVE

<table>
<thead>
<tr>
<th>Component</th>
<th>You¹</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>16. Target incentive per episode</td>
<td>$300</td>
<td>Target incentive per episode for qualifying providers.</td>
</tr>
<tr>
<td>17. Capped bonus per episode</td>
<td>$300</td>
<td>Incentive is subject to caps on the total amount that may be paid out because of the fixed pool fund for this bonus.</td>
</tr>
<tr>
<td>18. Total SUD participation incentive</td>
<td>N.A.</td>
<td>Total SUD bonus; equals line (17) multiplied by line (18).</td>
</tr>
</tbody>
</table>

1. Eligibility for high performer bonus or SUD participation incentives will be determined at end of the performance and any applicable payments will be calculated at that time.
