

Division of Mental Health and Addiction Services

Name of Program: Adult Psychiatry Residency and Child/Adolescent Psychiatry Fellowship Training

Purpose: For the last three years, DHS/DMHAS has been using state funding to support additional residency positions in the accredited adult psychiatry residency programs and child and adolescent psychiatry fellowships in New Jersey. The initiatives are addressing the shortage of psychiatrists and child psychiatrists in the state. In addition to increasing the number of psychiatry residency and Fellowship positions, the program is designed to provide residents and fellows with extensive experience in the community and public behavioral health system, including settings that serve individuals in the community who have serious mental illness, substance use disorders, or intellectual /developmental disabilities. The initiative encourages recruitment of qualified candidates for residency and fellowship training who are likely to practice psychiatry in the state after graduation. The programs receive supplemental funding to support faculty to provide supervision and mentorship of the psychiatry residents and fellows. The residency and fellowship program classes commence on July 1 of each year and end on June 30. The Table indicates the numbers of positions supported over the last three years.

A. On July 1, 2024 the following number of 4 Year Adult Psychiatry Residency residents will start:
