**Unemployment Insurance Modernization and Worker Experience Agile Development Services - Q&A Round 2 - 3/23/2022**

| Question# | RFQ Page# | RFQ Section# | Question | Response |
|---|---|---|---|---|
| Q#37 | 7 | - 1.1.1. SCOPE | Does the scope of this RFQ include actual development and production/deployment of the final enabling system informed by user stories identified by the State or is the actual development and production anticipated for future RFPs / DOL efforts? If these initial phases DO anticipate actual systems development/production deployment, how much development capacity and skillsets are anticipated within the scope of this contract? | The scope of this RFQ involves iterative development and production deployment as output. Section 1.2.1 of the RFQ includes an overview of appropriate experience. The State expects Bidders will provide the most competitive team to achieve the scope of work based on the budget provided. |
| Q#38 | 52 | 4.2.2.4 | Are work samples exempt from the 11 point type size requirements? | Yes. |
| Q#39 | 2 | | Does the Government expect the vendor to do modernization and integration with the COBOL mainframe systems? | It is not a requirement that the vendor develop mainframe code, but if the vendor has this experience and/or capability, please indicate this in the technical submission. The vendor should expect to integrate new applications and services with existing systems' interfaces, as relevant. |
