</table>

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Residence 1 Year Ago (Migration)</td>
<td>Do Not Compare (Details)</td>
<td>Compare with Caution (Details)</td>
<td>The question was not asked in the 2010 Census</td>
</tr>
</tbody>
</table>

The ACS asked for residence 1 year ago whereas Census 2000 asked for residence 5 years ago.

The 2009 ACS and 2010 ACS 1-year estimates use different Census base years for the population estimates used in the ACS weighting. Estimates of population size are not comparable between 2009 and 2010. Estimates of percent distributions, rates, and ratios should be compared with caution. For more details, visit the ACS Research Note Change in Population Controls [PDF 366K].

Guidance on comparing 2005-2007 ACS 3-year and 2008-2010 ACS 3-year
What General Data Users Need to Know

Here are the basics of the American Community Survey, with the opportunities and challenges of using data. Learn to access and use ACS data on the Census Bureau's website. Plus concrete examples of how ACS data can answer real-world questions about our society.

Population Estimates

\[ P = B - D + N.M. \]

- Population counts
  - Nation - age, sex, race, and Hispanic origin
  - States - age, sex, race, and Hispanic origin
  - Counties - age, sex, race, and Hispanic origin
  - Incorporated places - total population only

- Housing unit counts
  - States
  - Counties

The Official Intercensal Count!
NJ Population Estimates

\[ P = B - D + N.M. \]
Detailed Tables (DT)
- Tables from summary files that provide the most detailed data on all topics and geographic areas from the decennial censuses and the ACS
- 'P' are population tables
- 'H' are housing tables
- 'PCT' are population tables that cover geographies to the census tract level
- 'HCT' are housing tables that cover geographies to the census tract level
- 'PL' are tables derived from the Redistricting Data (P.L. 94-171) Summary File.

Geographic Comparison Tables (GCT)
- These tables provide basic measures for decennial census 100% and sample population and housing subjects. Users can compare data across geographic areas in the same table (e.g., all counties in a state).

Demographic profile (DP)
- A profile includes tables that provide various demographic, social, economic, and housing characteristics for the U.S., regions, divisions, states, counties, county subdivisions, places, metropolitan areas,

Quick Tables (QT)
- Predefined tables with frequently requested information for a single geographic area. The information includes numerical data and derived measures (e.g., % distributions, medians).

* AFF Glossary
Hierarchy of Select Geographic Entities in the American Community Survey

Notes:
* 5-year estimates only
** 5-year estimates only, first release in 2012 for the 2007-2011 5-year estimates

This graphic does not represent the full set of entities for which the ACS publishes data.
1. **Census Tracts** are small, relatively permanent statistical subdivisions and generally have a population of 1,500 to 8,000 (optimum 4,000).

2. **Block Groups** are subdivisions of a census tract and generally have a population of 300 to 4,000 (optimum 1,500).

Guided Search - Step-by-step access to Census Information

Choose from one of the following and click Next.

- I'm looking for information about people.
  (age, sex, income, poverty, education, ...)

- I'm looking for information about housing.
  (housing units, household type, value of home, ...)

- I'm looking for information about businesses or industries.
  (annual payroll, sales and receipts, number of employees, ...)

- I'm looking for information from a specific dataset.

- I want to search for a table number or a table title.
  (P1, EC0708A1, b04*, Social Characteristics, ...)

Note that the guided search searches for tables using a subset of search methods and most requested geographies. For more search options and to select from all available geographies, use the Advanced Search.
Search - Use the options on the left (topics, geographies, ...) to narrow your search results.

To search for tables and other files in American FactFinder:

1. Enter search terms and an optional geography and click GO

   - topic or table name
   - state, county or place (optional)
   - topics, race/ancestry, industries, occupations

2. Next, select Geographies (states, counties, cities, towns, etc.)
   - these are added to 'Your Selections'
   - the Search Results are updated

3. Select one or more Search Results and click View
Geography Selection Improvement
## Express Downloads

**Download Options - Downloading data from American FactFinder and Census.gov**

### Download data from American FactFinder

There are multiple ways to download data from American FactFinder:

- **Download from the search results page**
  Download up to 10 tables from the search results page in a comma-delimited format (.csv). This format can be imported into Microsoft Excel, as well as other spreadsheet and database programs.

- **Download when viewing a table**
  Download a single table from the table view in comma-delimited (.csv), PDF, Microsoft Excel (.xls), or Rich Text Format (.rtf) formats.

- **Download spatial data from reference maps and thematic maps**
  Download shapefiles that can be imported into various geographic information systems (GIS) software packages.

See the download limits FAQ for more information about limits to the number and size of tables that can be downloaded in American FactFinder.

### Download data via FTP

If American FactFinder's download limits prevent you from downloading the data you need, you may be able to download the complete dataset from the Census Bureau's FTP Site. Use the links to the right for information about downloading data from various Census Bureau programs.

Visit the Census Bureau's FTP site for a complete list of available files.

### Access data with Census APIs

To improve access to data and encourage innovation, the Census Bureau provides Application Programming Interface (API) access to selected data sets, including the 2010 Census Summary File 1 and the American Community Survey (five-year data). The API allows developers to design Web and mobile apps to explore or learn more about America's changing population and economy. Visit our Developer Site to learn more.
Frequently Asked Questions

Why doesn't American FactFinder display properly in my browser?

Since browsers cache some of the web bar files (*.js, *.css) by name, whenever an updated or new version of AFF is released, the content of these files changes but some browsers do not always detect the change to get a fresh file. Instead, they continue to serve the files from the local cache, creating a confusing and error-prone mix of new and old files. As a result, some American FactFinder User Interface elements (buttons, text boxes, etc.) may not function correctly.

To correct this issue and properly display American FactFinder, you can clear the browser cache as follows:

(Note: IE 8, 9, and 10 users may also need to set the Compatibility View, see instructions below)

In Firefox 10:
Tools -> Advanced -> Network -> Clear Now.

In IE 8 or 9:
Tools -> Delete Browsing History -> Have Temporary Internet Files, Cookies, and History checked -> Deselect Preserve Favorites website data -> Delete.

Compatibility View for IE 8, 9, and 10
If you are using IE 8, 9, or 10, and American FactFinder still does not display properly, you can set your browsers Compatibility View as follows:

Tools -> If Compatibility View is not grayed out, click on Compatibility View so that it is checked; if it is grayed out, click on Compatibility View Settings, and enter "https://factfinder2.census.gov" to the ‘Add this website’ textbox -> Add -> Close.

In IE 7:
Tools -> Delete Browsing History -> Delete files... -> Delete cookies... -> Delete history... -> Delete -> Close -> OK.

In Firefox 3.5 and above for Windows or Mac OS X:
Tools -> Clear Recent History (OK for Windows – Select the History menu from the orange Firefox button in Firefox 4 and above) -> From the Time range to clear: drop-down menu select the desired range to clear. To clear your entire cache, select Everything -> Click the down arrow next to ‘Details’ -> Check Browsing & Download History, Form & Search History, Cookies, and Cache -> Clear Now.

In Chrome:
Enter: chrome://settings/clearBrowserData is the browser bar -> Select the items you want to clear (e.g., Clear browsing history, Clear download history, Empty the cache, Delete cookies and other site and plugin data) -> Select the period of time to clear your cache in the Deliberate the following items from drop-down menu (Note: to clear your entire cache, select the beginning of time) -> Clear browsing data.

In Safari:
Safari menu -> Reset Safari... -> Select the items you want to reset -> Reset. (Note: As of Safari 5.1, Remove all website data will include both cookies and cache).

Source: U.S. Census Bureau, 2006-2010 American Community Survey
Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The methodology for calculating median income and median earnings changed between 2008 and 2009. Medians over $75,000 were most likely affected. The underlying income and earnings distribution now uses $2,500 increments up to $250,000 for households, non-
PERCENTAGE OF FAMILIES AND PEOPLE WHOSE INCOME IN THE PAST 12 MONTHS IS BELOW THE POVERTY LEVEL
