RA MANDATORY TIMEFRAMES

The Remedial Action (RA) mandatory timeframes for legacy contaminated sites that received the Remedial Investigation (RI) mandatory timeframe extension in May 2014 are fast approaching (May 2024). If you, as the retained LSRP, do not think that the Person Responsible for Conducting the Remediation (PRCR) will have the RA completed by then (i.e., RAO issued) you are **REQUIRED TO NOTIFY IN WRITING** the PRCR and Department before the deadline. [Requirements can be found at N.J.A.C.7:26I-6.8\(c\).](#) [Click here to download the Instructions.](#) for the Notice of Failure to Comply with a Mandatory or Expedited Site-specific Remediation Timeframe Form. [Click here to download the Form.](#)

TECHNICAL REVIEW PANEL RE-ESTABLISHED

NJDEP Contaminated Site Remediation and Redevelopment (CSRR) has announced that it has re-established the Technical Review Panel (TRP) to address technical disagreements between LSRPs and CSRR staff. The goal of the TRP process is to resolve these disputes as quickly as possible to ensure that the remediation of sites results in the protection of public health and safety and the environment and occurs in an expeditious manner. [Click here to learn more about the Technical Review Panel \(TRP\).](#)

ADVICE FROM THE AUDIT COMMITTEE

Be prepared by keeping an up-to-date list of your sites and their status using the table on Page 5 of the Audit Questionnaire Form. [Click here.](#)

Trivia Answer

On August 7, 2023, at the SRPL Board Open Public Meeting, Peter Strom, Academic Representative, reported that “FRANKLINITE” has been named the new state mineral of New Jersey.

Board Chairperson's Message

Greetings and Happy New Year!

First, a note of thanks to the Outreach Committee for launching this first edition of the Board's Quarterly Newsletter. It is a new and exciting avenue for the Board to communicate with the LSRP community, further relay items that are discussed and decided upon at our regular meetings, and touch on other issues of importance and interest for New Jersey's LSRPs. Reflecting on 2023, it was a full and rewarding year for all our dedicated volunteer Board members, our many committees, and LSRPs in the Garden State. We welcomed Dana Haymes to serve in the role of Executive Director, helping us to perform the Board's day-to-day activities. We thanked Jeffrey Hoffman for his years of service as he retired on December 1st, and welcomed Steven Domber, New Jersey's State Geologist, as our newest member of the Board. Through the tireless efforts of Joann Held and our Rules Committee, the Board's amended rules were adopted in the NJ Register on November 20th. And finally, 31 candidates passed the October exam – I wish all the best to these professionals as they start in their new role of LSRP. Looking ahead, 2024 will present more opportunities for the Board to serve LSRPs and to help us achieve our collective goals of remediation of contaminated sites, restoring impaired natural resources, and revitalizing New Jersey. I look forward to continuing to work with our volunteer Board members and all in the LSRP community – thank you for your work you do to protect New Jersey's residents and environment!

Sincerely,

Paul Stofa, Chairperson
