Product Name	Detailed Narrative	Technical Specifications	Speed	Information Pertaining to the Available Features
Dedicated Internet Access	Dedicated Internet Access connection is delivered to your location via a fiber Ethernet Connection	 Static or dynamic (BGP) IPv4 and IPv6 routing DNS name resolution and domain name hosting per request -Traffic utilization statistics via Customer Portal 	10Mbps-100Gbps	 Enterprise-grade, high-speed dedicated fiber optic connection to your site. Scalable: up-to 100 Gbps of Bandwidth Symmetric: upload speeds are as fast as download speeds Geographical diverse, nationwide with multiple internet interconnection sites Crown Castle owned and operated redundant high capacity and reliable Fiber Optic Network Proactive monitoring of network performance 24/7/365 Full dual stack IPV4 and IPv6 supported Border Gateway Protocol (BGP) Communities, including BGP Remotely Triggered Blackhole (RTBH) DDoS Protection at the Network Edge may be added to your service.
Internet Access	Internet access is delivered at a Crown Castle POP or any of our data centers via a fiberoptic Ethernet connection in a meet me room.	Provide routing to the Internet via IPv4 and/or IPv6 Traffic utilization statistics via Customer Portal Domain Name Services (DNS) for name resolution and domain hosting	10Mbps - 100Gbps	 Enterprise-grade, high-speed dedicated fiber optic connection to your site. Scalable: up-to 100 Gbps of Bandwidth Symmetric: upload speeds are as fast as download speeds Geographical diverse, nationwide with multiple internet interconnection sites Orown Castle owned and operated redundant high capacity and reliable Fiber Optic Network Proactive monitoring of network performance 24/7/365 Eull dual stack IPV4 and IPv6 supported Border Gateway Protocol (BGP) Communities, including BGP Remotely Triggered Blackhole (RTBH) DOS Protection at the Network Edge may be added to your service.
DDoS Defense	Monitor, detect, alert and respond to attacks before customers' network resources are severely impacted. In the event of an attack, the target traffic is re-routed to our in-network scrubbing facility to proceed with a surgical mitigation where the unwanted traffic is removed and the clean traffic is allowed to flow to your network. MUST be a CCF Dedicated Internet Access -or- Internet Access Customer to utilize this service.		10Mbps - 100Gbps	
Metro-E Advanced Private Line	Metro-E Advanced Private Line: Private Ethernet delivered over dedicated fiber with switches deployed at each end-user location across a metro area. Interfaces available 10GE, 100GE. Bandwidth options from 1Gbps – 100Gbps.	Layer 2 Ethernet over private fiber Interface and Transport: 1Gbps - 100Gbps Jumbo Frames up to 9100 Metro configurations: Architecture: Point-to-point	1Gbps-100Gbps	Crown Castle supports four Classes of Service on our switched Ethernet products, providing the routing option necessary to manage traffic while ensuring application performance. CoS enables the customer to differentiate traffic by assigning Bandwidth with various classes of network priority designated by Crown Castle. If the customer elects CoS, (i) Customer's traffic must be marked by Customer in accordance with Crown Castle's available classes of network priority, and (ii) Customer's traffic will be prioritized in accordance with the assigned network priority. If Customer does not elect CoS, Customer's traffic will be treated with the default network priority level. Crown Castle Supported Ethernet Classes of Service • Mission Critical: Ultra-high availability, superior performance, lowest latency • Business Critical: High-availability, high-performance • Business Priority: Enhanced performance • Standard: Standard performance (default class)
E-Line	E-Line: A port-based Product providing dedicated UNIs for point-to-point connections. E-Line supports a single EVC between two (2) UNIs. Dedicated UNIs for point-to-point connections, simple and secure. Interfaces available 1GE, 10GE. Bandwidth options from 10Mbps – 10Gbps.	Layer 2 Ethernet Interface and Transport: 10Mbps - 10Gbps Jumbo Frames up to 9100 Architecture: Point-to-point	10Mbps - 10Gbps	Crown Castle supports four Classes of Service on our switched Ethernet products, providing the routing option necessary to manage traffic while ensuring application performance. CoS enables the customer to differentiate traffic by assigning Bandwidth with various classes of network priority designated by Crown Castle. If the customer elects CoS, (i) Customer's traffic must be marked by Customer in accordance with Crown Castle's available classes of network priority, and (ii) Customer's traffic will be prioritized in accordance with the assigned network priority. If Customer does not elect CoS, Customer's traffic will be treated with the default network priority level. Crown Castle Supported Ethernet Classes of Service • Mission Critical: Ultra-high availability, superior performance, lowest latency • Business Critical: High-availability, high-performance • Business Priority: Enhanced performance • Standard: Standard performance (default class)
ELAN Services	E-LAN: VLAN based meshed Product providing many-to-many communication with. dedicated or service-multiplexed UNIs. E-LAN supports transparent LAN and multipoint Layer 2 VPNs. Crown Castle recommends limiting the number of VLAN Nodes to 25 or fewer. Interfaces available 1GE, 10GE. Bandwidth options from 10Mbps – 10Gbps.	Layer 2 Ethernet Interface and Transport: 10Mbps - 10Gbps Jumbo Frames up to 9100	10Mbps - 10Gbps	Crown Castle supports four Classes of Service on our switched Ethernet products, providing the routing option necessary to manage traffic while ensuring application performance. CoS enables the customer to differentiat traffic by assigning Bandwidth with various classes of network priority designated by Crown Castle. If the customer elects CoS, (i) Customer's traffic must be marked by Customer in accordance with Crown Castle's available classes of network priority, and (ii) Customer's traffic will be prioritized in accordance with the assigned network priority. If Customer does not elect CoS, Customer's traffic will be treated with the default network priority level. Crown Castle Supported Ethernet Classes of Service • Mission Critical: Ultra-high availability, superior performance, lowest latency • Business Critical: High-availability, high-performance • Business Priority: Enhanced performance • Standard: Standard performance (default class)
VPL Services	EVPL: A flexible, VLAN based Product providing multiplexed UNIs allowing multiple EVCs per UNI. Interfaces available 1GE, 10GE. Bandwidth options from 10Mbps – 10Gbps.	Layer 2 Ethernet over MPLS or Fiber Interface and Transport: 10Mbps - 10Gbps Jumbo Frames up to 9100	10Mbps - 10Gbps	Crown Castle supports four Classes of Service on our switched Ethernet products, providing the routing optio necessary to manage traffic while ensuring application performance. CoS enables the customer to differentia traffic by assigning Bandwidth with various classes of network priority designated by Crown Castle. If the customer elects CoS, (i) Customer's traffic must be marked by Customer in accordance with Crown Castle's available classes of network priority, and (ii) Customer's traffic will be prioritized in accordance with the assigned network priority. If Customer does not elect CoS, Customer's traffic will be treated with the default network priority level. Crown Castle Supported Ethernet Classes of Service • Mission Critical: Ultra-high availability, superior performance, lowest latency • Business Critical: High-availability, high-performance • Business Priority: Enhanced performance • Standard: Standard performance (default class)
EPL over DWDM	Ethernet Private Line (EPL) over DWDM is a point-to-point service with two mirrored services. EPL consists of a 100/1000/10,000/40,000/100,000M node at each customer location. Crown Castle Fiber does not charge for mileage. EPL service traverses dedicated DWDM and fiber networks not	Crown Castle Fiber does not price services based on Interlata/Intralata delivery Additional charges may be applied for Interstate connectivity based on	1Gbps-100Gbps	
Dark Fiber Services	 ITU compliant Dark Fiber Crown Castle Fiber's unique fiber assets, routes and secure rights-of-way provide the network infrastructure that your business needs, where you need it, to support mission-critical applications. 	bandwidth utilization. Custom Dark Fiber Solutions utilizing ITU compliant Fiber CCF will terminate at specified locations and or splice at mutually agreed upon locations	N/A - Limitless	 Customizable: Protected and unprotected configurations available Allows customers with in-house optical expertise to manage their own network Enables customers to select the equipment best suited to support their applications Flexibility to support a large number of configurations, services, and applications Delivers virtually unlimited bandwidth at a fixed cost with the potential of capitalizing your network as an asset Dark Fiber networks are under your control, completely secure, and are tailored to your connectivity requirements Crown Castle Fiber's network leverages unique rights-of-way providing added resilience to your infrastructure Ability to leverage Crown Castle Fiber's networking expertise and benefit from its award winning customer service Strong ROI for companies that use substantial bandwidth and utilize numerous services
Cloud Transport	Dedicated Connectivity to cloud computing network environment. Transport only to AWS, Azure and/or Google Cloud. (Ashburn, VA). This service does not include Clound Services, this is Customer connection/transport only. Customer responsible for their own cloud subscription.	Circuit capacity ranges from 50Mbps to 100Gbps depending upon the target CSP. Connections to Azure may require additional equipment on the premises depending on capacity and architecture.		The minimum circuit capacity may be as low as 50Mbps depending upon the target CSP. There is no minimum
Managed SD-WAN (Basic)	Fully Managed turn-key solution with Versa Networks technology. White glove deployment by a professional staff and supported by a US- based Network Operation Center. Product includes: SD-WAN Network Design, Supply of hardware and software, installation, provisioning, management and maintenance of the SD-WAN Edge Devices. End-toend visibility from a single pane of glass. Managed SD-WAN Provides a virtual overlay network that enables application aware, policy driver and orchestrated connectivity between SD WAN User Network Interface.	SD-WAN as an application-aware, policy-driven connectivity service, that optimizes transport of IP Packets over multiple underlay networks. Underlay Connectivity Services (UCS) is the underlying transport used by the SD WAN overlay for connectivity. SD-WAN Edge Device: supports up-to eith WAN interfaces. A variety of UCS are supported such as Internet, Ethernet, Wireless, etc. The recommended deplyent is to have at least one internet UCS per SD-WAN Edge. Our solution also supports Bring Your Own Underlay which allows you to utilize	10Mbps - 10Gbps	throughput required. •Zero Touch Provisioning •Dentrally controlled templates to manage site configurations. •Monitoring, Reporting, and Analytics2 •DHCP: Client, Relay and Server setup at that site for DHCP •Application Visibility, Control, Traffic Engineering, SLAs, QOS, and Shaping •Multiple WAN Links in an Active/Active supported •SD-WAN VPN2 •Stateful L4 Firewall2 •Site to Site VPN2 •MOS Traffic Management2 •Bouting Function2 •EC, Cloning, Striping2 •Fligh Availability@may select a redundant configuration with a second SD-WAN Edge Device.
Managed Security - Cyber Defense One	Threat Monitoring and Detection in real time, using both AI & Human Intelligence.	We collect and analyze Customer log data using our robust security platform. We ingest this data from log producing environments such as firewalls, servers, endpoint security/IDS, and other applications, etc.	Any - Consumption based	If you have a single system – a copy of your data can be correlated directly to our cloud environment. If there are multiple systems pushing data, we will suggest an aggregator (virtual or on prem).
Managed Security - Intrusion Prevention	Advanced intrusion prevention that finds, mitigates and prevent threats within network traffic tha other traditional IPS' miss.		Any - Consumption based	Deeply inspect and edit full session Internet traffic. Reviews the entire session, corrects it, then sends the corrected packet.
Fixed Wireless	Our enterprise-grade Fixed Wireless solution provides high speed broadband internet or ethernet access scaling from 100Mbps to 10Gbps. Using a radio link, the wireless technology connects two fixed locations with line of sight		100mbps to 10Gbps	Microwave 6 - 42GHz 40km / mmWave 60GHz (V) 70 - 80GHz (E) 500m 8km
