RFP for Financial Printer Q&A Responses

Question 1

Could you please clarify whether NJEFA has any published historical or expected transaction-volume information, historical printing-spend range, or target cost-of-issuance allocation that bidders may use to calibrate the Exhibit A fee proposal? If there is no target budget or comparable historical pricing that NJEFA intends bidders to use, should vendors simply provide their standard all-inclusive pricing for each Exhibit A line item, with overtime/additional charges stated separately as requested in the RFP?

The Authority's [annual reports](#) provide historical transaction-volume information. Vendors should provide their standard all-inclusive pricing for each Exhibit A line item, with overtime/additional charges stated separately as requested in the RFP. The fee proposals from the Authority's prior Financial Printer procurement are also publicly available in the Authority's [minutes](#).
