

## **Appendix N. Local Hazard Mitigation Plan Capability Assessments**

## **Appendix N. Local Hazard Mitigation Plan Capability Assessments**

As discussed in Section 3 (Coordination of Local Planning), as part of the 2014 Plan update process, the local HMPs were reviewed and where available local legal and regulatory capability information was extracted and compiled into a matrix (presented below). The purpose of this exercise was to perform a baseline assessment on how local capabilities are captured in local HMPs and to integrate the data into the 2014 Plan update. If the information was not available in the local HMP, entries are blank for that local jurisdiction.

The evaluation of local mitigation capabilities using the local HMPs proved challenging due to inconsistent planning methods, information tracking and reporting processes. In general, the local plans did not offer a detailed description of local capabilities that was conducive to data collection at the State level. The local plan review indicated that most approved plans in the State have noted only high-level summary information on local legal and regulatory capability, and do not indicate information on local floodplain administrators. This review exercise has provided an opportunity to provide constructive feedback to the State regarding the necessity of requiring consistent capability assessment formats in all local plans in addition to frequent municipal outreach programs to educate local officials regarding the duties of floodplain administrators.

**Notes:** As part of the 2014 Plan update process, the local HMPs were reviewed and where available local legal and regulatory capability information was extracted and compiled into a matrix. The purpose of this exercise was to perform a baseline assessment on how local capabilities are captured in local HMPs and to integrate the data into the 2014 Plan update. If the information was not available in the local HMP, entries are blank for that local jurisdiction. In other words, blank entries should not be interpreted that the capabilities do not exist; they were just not readily available in the local HMP
