INTRODUCTION

The New Jersey Division of Highway Traffic Safety (DHTS), by N.J.S.A. 27:5F-18 et seq., is responsible under its Director for developing and implementing on behalf of the Governor the New Jersey Highway Safety Program which consists of a comprehensive plan to reduce traffic crashes and deaths and injuries, and property damage resulting therefrom. The plan is to be developed in accordance with the “U.S. Highway Safety Act of 1996” (P.L. 89-564) and any acts amendatory or supplementary thereto. The DHTS is also responsible for procuring and administering federal highway traffic safety funds, processing and administering grants of these monies to State agencies and political subdivisions. As the State’s highway traffic safety agency, DHTS also promotes traffic safety and coordinates activities of State and local agencies toward the goal of a comprehensive statewide traffic safety program. The Highway Safety Plan for federal fiscal year 2003 developed in accordance with 23 U.S.C. 402 is part of this effort.

The DHTS is located in the Department of Law and Public Safety. The Division Director is appointed by and serves at the pleasure of the Governor. By the terms of N.J.S.A. 27:5F-32, the Director is specifically appointed as the Governor’s Representative for highway traffic safety matters to the National Highway Traffic Safety Administration, although as a functional matter this also entails dealing with the Federal Highway Administration of the United States Department of Transportation. The Director is also chairperson of the Governor’s Highway Traffic Safety Policy Advisory Council. The Director’s administration of the Division is under the direction and supervision of the Governor and the Attorney General.

The Highway Safety Plan for fiscal year 2004 (October 1, 2003 through September 30, 2004) was supported by $8.0 million in federal funding and addressed nine priority program areas. The funds included the annual allotment of Section 402 State and Community Highway Safety funds, Section 405 Occupant Incentive Grant funds, Section 410 Alcohol Incentive Grant Carryover funds, and Section 157 Incentive Grant funds. Funds were also received under Section 163 for Safety Incentives to Prevent Operation of Motor Vehicles by Intoxicated Persons. Funds received under these sections of Title 23 initiated projects in the following areas: alcohol and other drug countermeasures, police traffic services, occupant protection, pedestrian and bicycle safety, community traffic safety programs, roadway safety, traffic records, and motorcycle safety. A total of 126 projects were funded through the Highway Safety Plan for both state and local programs.

The Division also continues to oversee and coordinate both the State Drunk Driving Enforcement Fund, N.J.S.A. 39:4-50.8 and Motorcycle Safety Education Program, N.J.S.A. 27:5F-36 et seq.

The annual report provides an overview of the projects funded during the year and is followed by a status of each goal identified in the FY 2004 Highway Safety Plan. The Division believes the funded projects and activities in those areas in which the Division achieved its goals contributed significantly to their achievement. Based on the available data, it appears the Division will not achieve two of its goals-and a third goal will also likely not be met. In these cases, and in those where final data shows that a goal has not been met, the Division intends to review the funded
activities related to the goal to determine whether different and/or additional projects are needed to achieve it.

**PROGRAM FUNDING**

Federal Funded Programs

**A. Section 402 Program**

The State and Community Highway Safety grant program is administered at the federal level primarily by the National Highway Traffic Safety Administration and partially by the Federal Highway Administration. The funds are intended to provide seed money to catalyze innovative programs and leverage other state, local and private resources. The 402 program improves enforcement of existing laws, changes public attitudes through educational programs, and builds state and local leadership in highway safety.

Listed below is the funding obligated to each of the Section 402 program areas during FY 2004.

**B. Section 405 Program**

The Section 405 Occupant Protection Incentive Grant program provides incentive grants to encourage states to adopt and implement effective programs to reduce highway deaths and injuries resulting from individuals riding unrestrained or improperly restrained in motor vehicles. The State received $854,673 to implement occupant protection programs.

**C. Section 410 Program**

The Section 410 Drunk Driving Prevention program provides incentive grants to states that increase their level of effort and implement drunk driving programs. The State did not meet the requirements of the Section 410 program and was not eligible to receive funds in FY 2004. However, carryover funds in the amount of $42,496 were applied to support community programs which discouraged drinking and driving and provided enforcement and education programs.
D. Section 157 Program

The Transportation Equity Act for the 21st Century (TEA-21) established a new program of incentive grants to encourage States to increase seat belt use rates. Incentive grants are awarded to States who demonstrate an increase in seat belt usage rates. Since the State was able to increase seat belt usage rates which resulted in savings in medical costs to the Federal Government, funds in the amount of $700,372 were awarded for project implementation.

E. Section 163 Program

Section 1404 of TEA-21 established a program of incentive grants to encourage States to establish 0.08 percent blood alcohol concentration as the legal limit for drunk driving offenses. A State may use these grant funds for any project eligible for assistance under Title 23. Funds in the amount of $1,973,513 have been awarded for project implementation.

State Programs

A. Drunk Driving Enforcement Fund

The Drunk Driving Enforcement Fund establishes a $100.00 surcharge on each drunk driving conviction. Monies in this fund are distributed in grants to municipalities and to State, county and interstate law enforcement agencies. The purpose of the grants are to increase enforcement of the drunk driving law. Each law enforcement agency whose officers make arrests leading to DWI convictions and imposition of the surcharge is entitled to grants representing its proportionate contribution to the fund.

Municipalities, the Division of State Police, interstate law enforcement agencies and county law enforcement agencies apply to the Division to use Drunk Driving Enforcement Fund monies for additional DWI enforcement patrols and any appropriate measures pertaining to other DWI activities as approved by the Director of the Division of Highway Traffic Safety.

A total of $3.65 million was available to law enforcement agencies in an effort to reduce alcohol-related fatalities and crashes.

B. Motorcycle Safety Education Program

The motorcycle safety education program, established in 1992, continues to provide for a
course of instruction and training designed to develop and instill the knowledge, skills, attitude and habits necessary for the safe operation and riding of a motorcycle. Fees collected by the Division of Motor Vehicles for each motorcycle license or endorsement issued under N.J.S.A. 39:3-10, and any other monies which may become available for motorcycle safety education are deposited into the Motorcycle Education Fund. These monies are used exclusively by the Division of Highway Traffic Safety to defray the costs of the motorcycle safety education program.

Different levels of training continue to be available at both public and private locations throughout the State. During calendar year 2004, approximately 7,500 residents were trained in motorcycle safety.

The State provided classes at the Department of Military and Veterans’ Affairs facility in Sea Girt and the Anthony Canale Police and Fire Training Academy in Egg Harbor Township. A record number of students were trained at these facilities. There were 825 students trained in the basic skills class and 95 students completed the experienced rider class for a total of 920. In addition, 13 individuals completed the State offered instructor preparation course which enabled them to become certified motorcycle education instructors.
PROGRAM HIGHLIGHTS

Following is a summary of the specific projects and activities implemented in 2004.

I. Alcohol and Other Drug Countermeasures

After years of gradual improvement, fatalities in alcohol-related crashes are on the rise. In an effort to remedy the problem, a highly visible enforcement campaign was conducted nationwide on two separate occasions. The first was held from December 19, 2003 to January 4, 2004 and the second was conducted from August 27, 2004 to September 12, 2004 as part of the You Drink & Drive...You Lose campaign.

Key components of the You Drink & Drive...You Lose campaign included targeted enforcement by municipal and State Police. The enforcement program was supplemented with a media campaign, resulting in coverage of the program on radio and television and in various newspapers in the state. Television spots were aired on Telemundo and Univision in an effort to educate the Hispanic community on the dangers of drinking and driving.

A total of 157 municipal police departments from ten counties and the Division of State Police participated in the mobilizations. There were 511 DWI arrests made and over 22,000 total summonses issued. The combined efforts of the 157 local police departments and each of the five Troops resulted in 30 DWI checkpoint operations and 238 saturation/roving patrols. A total of 4,230 personnel hours were expended. Over 11,000 vehicles passed through the checkpoint operations and an additional 31,601 motor vehicles were stopped during saturation patrol operations.

Standardized training courses in the detection, apprehension, processing, and prosecution of Driving While Intoxicated (DWI) offenders were provided to law enforcement officers. A total of 29 training courses were held at various locations throughout the state with 939 police officers trained in all aspects of DWI from apprehension to prosecution.

Three Drug Evaluation and Classification training programs were conducted. A total of 95 police officers completed the class and were certified as Drug Recognition Experts (DRE). In addition, one instructor class was held and 12 individuals were certified as instructors.
On April 15-16, the International Association of Chiefs of Police and the National Highway Traffic Safety Administration sponsored the first impaired driving summit for DRE state coordinators and Governors’ Highway Safety Representatives. The summit, held in Alexandria, Virginia, included more than 100 representatives from 37 States. The summit focused on various issues related to DRE training and impaired driving and provided an opportunity to network and develop strategies for improving and building upon the Drug Evaluation and Classification Program.

The responsibility to train breath test operators and to periodically inspect breath test instruments is assigned to the Division of State Police. The Alcohol/Drug Test Unit (A/DTU), within the Division of State Police, spearheads the continual process of training and re-certifying police officers throughout the State to recognize alcohol and/or drug indicators present in suspected offenders of the law. A total of 907 police officers were trained in the five day basic breath test operator course. Another 3,485 operators were re-certified in the breath test re-certification class.

The Division of Alcoholic Beverage Control continued to oversee the statewide Cops In Shops Program. This program helps curtail underage drinking by bringing undercover law enforcement officers and retail establishments together in a partnership designed to deter the sale of alcohol to underage individual and to stop adults from attempting to purchase alcohol for people under the legal age. The program in 2004 was implemented in shore communities that historically have a large youth population during the summer months. The participating municipalities were as follows: Absecon, Avalon, Beach Haven, Belmar, Egg Harbor Township, Harveys Cedars, Lakehurst, Long Branch Township, Lower Township, Margate, Manchester, Ocean Township (Monmouth County), Ocean Township (Ocean County), Pt. Pleasant Beach, Pt. Pleasant Boro, Sea Girt, Sea Isle City, Seaside Heights, Ship Bottom, South Belmar, Stafford Township and Wildwood.

A total of 278 arrests were made during the course of the summer initiative. A total of 473 separate charges were lodged against those arrested. Those separate charges encompassed 29 different offenses. Of the 473 offenses charged, 258 were for violations pertaining to the illegal possession or attempt to possess alcohol by a person that is underage or by an adult purchasing for an underage.

Funds were also provided to implement undercover operations at locations licensed to serve alcoholic beverages in Cape May, Monmouth and Ocean Counties. The funds were used to identify persons under the legal age attempting to purchase alcohol, persons providing alcohol to underage patrons, and those utilizing fraudulent identification to purchase alcohol. A total of 85 establishments were visited during the operation and 92 individuals were arrested for underage possession or consumption of alcohol.

The Alcohol and Drug Education Program (ADEP) has been fully implemented at the College of New Jersey. The primary goal was to provide educational support services to the campus community and to create an atmosphere in which alcohol use is not the central focus of all social events. The program stresses the creation of an awareness of choice, personal responsibility and the understanding of consequences in deciding to use alcohol and/or other drugs.
A new program was implemented at New Jersey City University. The primary goal of this project was to develop programs whereby peer educators from the college would be responsible for going out onto the campus and into the surrounding community to educate young people on the dangers of drug use and alcohol abuse with a relationship to traffic safety. Since the inception of the program in February, the students educators have been active on several fronts. An after school mentor and tutor program was implemented at several local high schools giving the student educators the chance to interact with high school students. Campus efforts included presentations within dorms, displays at campus events and interactive skills and discussions with other campus organizations. As a result of this program, several new projects are being planned on campus relating to seat belt usage, impaired driving and drowsy driving.

The Rutgers Comprehensive Alcohol and Traffic Education and Enforcement (R-CAT) Program was implemented. The program consisted of law enforcement and education initiatives. Patrols were implemented on or near the Rutgers campus during peak periods of DWI violations. Sixty-two comprehensive mobile driving while intoxicated patrols were implemented and three checkpoint operations were conducted. A total of 80 DWI arrests were made.

The education component was also implemented to reduce alcohol and traffic safety related incidents on the Rutgers University campus by conducting awareness workshops for the students, disseminating informational brochures in the campus community and through the distribution of alcohol and drug abuse awareness information on a specialized website for those who desired to privately access this information. A total of 135 alcohol/drug related programs were conducted by community police officers. These programs were open to all students, staff and the public. Programs included information on alcohol awareness, responsible social hosting, underage drinking for the first year student, drunk driving prevention, laws and fines associated with offenses and use of fatal vision goggles.

II. Police Traffic Services/Speed Control

The Division partnered with the National Highway Traffic Safety Administration in hosting the state’s first Law Enforcement Traffic Safety Academy during the week of May 3-7 at the Morris County Police Academy. The Training Academy was publicized via letters to each Chief of Police as well as through the Division’s web site. A variety of training classes in various aspects of traffic safety were made available. The classes were attended by over 675 police officers. Records indicate that 109 police agencies sent officers to the training.

Fatal Crash Units were operational in Camden and Cape May counties. Importance was placed on the need to create clear policies and procedures when dealing with serious injury and death-by-auto investigations. The program has provided for the purchase of computer hardware and software programs which have proven to be indispensable tools for timely and accurate reconstruction
of fatal and serious injury crashes. The program was also responsible for building a corps of fatal
and serious crash investigators by funding training for police personnel in basic and advanced
crash reconstruction. There continues to be favorable responses from the public as well as the
municipalities about the formation of the Fatal Crash Units.

Police personnel attended various training courses directly related to highway traffic safety and
crash investigation. Formal training in crash investigation, vehicle dynamics and crash reconstruc-
tion was provided throughout the year.

The basic or at-scene course, which instructs officers on the proper techniques for recogniz-
ing and properly recording damages as a result of collisions on roadways, was attended by 393
police officers. The Crash Investigation II course placed an emphasis on vehicle damage analysis
and vehicle behavior during collisions. This course was attended by 244 police officers. The
third course, vehicle dynamics, attended by 159 police officers, provided attendees with advanced
math as it applies to collisions and vehicular behavior. Six Traffic Crash Reconstruction classes
were held at the following police academies: Atlantic, Gloucester, Middlesex, Monmouth, Ocean
and Passaic. A total of 142 police officers attended the course. An additional 217 police officers
completed training in commercial vehicle and motorcycle crash investigation courses as well as
pedestrian and bicycle crash investigation courses.

Funding was provided to four towns and one county to implement aggressive driving
programs. Funds were provided to Old Bridge, Marlboro, Sayreville and Dover Township. In
addition, the Bergen County Police Department also received funds to conduct the aggressive
driver program.

III. Occupant Protection

Funding was provided to conduct two “Click It or Ticket” seat belt mobilizations. The first was
held from November 17-30, 2003 and the second was conducted from May 24 through June 6, 2004.
Key components of the “Click It or Ticket” mobilizations included targeted enforcement by 183
police agencies during the November mobilization and 381 in the second mobilization.

The State also received $500,000 for a paid media campaign to support the mobilization. These
funds were used to produce radio spots that were aired on stations in New Jersey, New York
City and Philadelphia. Other components of the media campaign included transit bus signs and
movie theater advertising. Two kickoff events were held to launch the 2004 “Click It or Ticket”
campaign. The program was announced at the statewide “101 Safe Driving Days of Summer”
event on May 20 on the Boardwalk in Seaside Heights. The enforcement phase of the program
began with an operation near the George Washington Bridge in Fort Lee on the morning of May
24, 2004. Other highlights included nearly 90,000 seat belt citations by participating agencies, over 2,000 radio spots were aired on 67 radio stations and three counties achieved 100 percent participation by police departments in Bergen, Passaic and Sussex counties.

A “Click It or Ticket” post mobilization event was held on June 16 to recognize the police departments for their participation and successful implementation of the mobilization.

Seat belt usage surveys conducted following the May mobilization demonstrated that the program was a success. The seat belt usage rate in New Jersey rose to an all time high of 82 percent.

The Governor’s Highway Safety Association, through a grant from the National Highway Traffic Safety Administration, developed an Occupant Protection for Children Assessment. Along with two other states (Nevada and Alabama), the Division volunteered to be a pilot site for testing the new assessment. The assessment in New Jersey was conducted from January 25-28.

The Division provided funds to the Department of Community Affairs’ Center for Hispanic Policy, Research and Development to assists Hispanic organizations in developing public education programs geared toward raising child seatbelt and car seat awareness. The program provided funds and technical assistance to public and private community-based childcare and pre-school centers that offer programs to serve the needs of children under 8 years of age in the Hispanic community. The organizations that received sub-grant awards from the Center were as follows:

**ASPIRA, Inc. of NJ - Newark**  
**La Casa de Don Pedro - Newark**  
**Puerto Rican Action Board, Inc. - New Brunswick**  
**PACO - Jersey City**  
**Morris County Office of Hispanic Affairs - Dover**  
**Mercer County Hispanic Association - Trenton**  
**Puerto Rican Association for Human Development - Perth Amboy**  
**Puerto Rican Action Committee of Salem County - Penns Grove**  
**Spanish American Social Cultural Association - Willingboro**

The Child Passenger Safety Technician Conference was held in New York. The event brought together more than 400 child passenger safety advocates from New Jersey, New York, Puerto Rico, Pennsylvania, Delaware and Connecticut. Conference highlights included workshops and expert speakers on issues such as transporting children with special needs, balancing education and enforcement, enhancing child pas-
senger safety within inner city populations and hosting a successful child seat check event.

Funding was provided to forty municipal police departments and county Sheriff Offices to conduct child safety seat checkpoints and educational programs and provide materials to reduce the misuse, non-use and misinformation in the area of child passenger safety and seat belt use. Over 600 child safety seat checkpoints were conducted and approximately 70 educational programs were presented to representatives at hospitals, parent-teacher meetings, and civic events.

IV. Pedestrian and Bicycle Safety

Nineteen comprehensive pedestrian safety grants were awarded during the year. These comprehensive grants funded pedestrian safety efforts relating to enforcement and education.

The enforcement component paid for overtime so that police officers could patrol targeted high pedestrian crash locations to issue summonses to motor vehicle violators who’s action put pedestrians at risk. The educational component provided funding to purchase pedestrian safety educational materials for delivery to high risk segments of the pedestrian population including children, the elderly and non-English speaking residents. These comprehensive pedestrian safety grants have helped to increase awareness of pedestrian safety.

A statewide educational campaign designed to promote bicycle helmet use by cyclists continued to be carried out in partnership with the Brain Injury Association of New Jersey. The Brain Injury Association developed and carried out the helmet program called the Brainy Bunch. The Brainy Bunch program now has a presence in 13 New Jersey counties: Camden, Passaic, Bergen, Hudson, Morris, Essex, Middlesex, Union, Ocean, Monmouth, Mercer, Somerset and Hunterdon. Six billboards were displayed for the first time from April 14 - July 15. The billboards featured a photo of the Governor and First Lady and were displayed in the following counties: Burlington, Essex, Middlesex, Monmouth, Morris and Passaic. The Association partnered with major hospitals as well as local cycling shops to distribute Brainy Bunch materials. The program was also supported by an interactive website that was developed, as well as extensive outreach through the media. In addition, a radio public service announcement was produced in both English and Spanish and distributed through the Division’s contract with the New Jersey Broadcasters Association.

V. Community Traffic Safety Programs

Community Traffic Safety Programs were implemented in the following seven counties: Atlantic, Bergen, Camden, Cumberland, Gloucester, Morris, Ocean, Passaic, Somerset and Union. Funds were provided to support counties in their efforts to develop and implement programs to inform and educate the public of the dangers associated with traffic in their areas. Programs were ad-
ministered through an established unit in the community and provided for public and private input and participation in an action plan to solve one or more of the county’s traffic safety problems.

Highlights of the public information and education program included the ongoing partnership with the New Jersey Broadcasters Association. A DHTS contract with the Broadcasters Association once again allowed the highway safety message to reach millions of New Jersey residents through radio public service announcements. In addition, various messages were also aired by Shadow/Metro Traffic. Topics that were addressed included bicycle helmet use, work zone safety, school bus safety, Take Five Stay Alive campaign, Hero Campaign (Designated Driver Campaign), driver fatigue, child passenger safety, drinking and driving and cell phones. For the period October 2003 through September 2004, the Division received a total of 20,075 spots (average of 1,673 per month) with a value of $1,390,908 for an investment of $155,000. The return on the investment is approximately 9:1.

The “Safety Cruiser” was successful in providing information to the citizens of the state and was displayed at various events throughout the year. The traffic safety bus was used in cooperation with the Community Policing Unit of the Division of State Police. The bus provided citizens with access to information and materials on all areas of traffic safety. The bus is equipped with radar and breathalyzer equipment, video and driver simulator equipment, child car seats and other materials. Over 6,000 individuals took the opportunity to tour and experience the various traffic safety equipment located on the bus. The schedule of events in 2004 is listed below:

- **EMS for Children Conference**  
  **May 24-25**
- **Hispanic Leadership Summit**  
  **June 10**

The second Highway Traffic Safety Summit was held on September 21. The program focused on partnerships between the community and law enforcement in sharing the responsibility for highway safety. Education and its importance in forming a bond with law enforcement to work together for mutual goals within the highway safety framework was stressed. Forums and workshops were held on how to become a grantee or partner and an overview of traffic safety programs was also presented. Presentations were made at the awards luncheon recognizing the efforts of partners that worked to make our state safer during the year. Approximately 200 individuals attended the Traffic Safety Summit.

The Statewide Safety Conscious Planning Forum was held on May 26. The forum participants represented a good mix of the transportation and safety planning communities. Many New Jersey Department of Transportation employees attended along with representatives of all three Metropolitan Planning Organizations, law enforcement, public transit, the federal highway safety agencies and many others. One of the major accomplishments was the formal adoption of the 2004 Safety Conscious Planning Report. The next step is for the State to develop the New Jersey State Action Plan that is based on the goals and action steps identified during the Forum.

**VI. Roadway Safety**

The Roadway Safety Work Force Training and Resource project at Rutgers University effectively met the goal of a clearinghouse agency with the distribution of nearly 6,000 technical resources to members of the transportation community. Work Zone Safety Kits and Flagging Kits were also disseminated to municipal road workers and law enforcement personnel. A total of 89 workshops were held during the period for 4,419 participants from the transportation community.
Rutgers continues to work with the Garrett Morgan Academy High School in Paterson. The Garrett Morgan Academy curriculum includes a specialized transportation component. Students are required to attend Transportation and Society, Engineering, and Planning courses in addition to their normal academic subjects. The school was formed to educate future engineers and workers in the transportation field. One project of significance required students to complete a traffic analysis of the area around the school. They analyzed the traffic flow, pedestrian and bicyclist use of the area and then identified procedures for improving traffic safety in the immediate area. Detailed reports were submitted to the municipal officials on their findings and recommendations for reducing crashes in the area.

Traffic interns were hired during the Summer months in Sussex, Union and Warren counties to assist the county traffic engineer to video log all the county roads. The video log is a record of road signs, pavement marking road surface conditions, intersection traffic, traffic signals, sight distance, vegetation encroachment on roadways and other safety issues. The video log is valuable to committees when discussing site plans or sub-division reviews.

The Fifth Annual Work Zone Safety Conference was held on April 1. The goal of the conference was to raise awareness of the dangers that exist in highway work zones to both construction workers and the motoring public. Over 300 people attended the conference. Presentations were made by Federal, State and local agencies. Proclamations were also given from the Governor McGreevey and Assemblyman John Wisniewski recognizing April 1, 2004 as Work Zone Safety Day.

A new program in 2004 allowed for the installation of deer reflectors along a two mile stretch of roadway in White Township, Warren County. This stretch of roadway has experienced 73 deer-vehicle collisions during a five-year period (1998-2002). The deer reflectors were received by the county in August 2004 and subsequently installed. Deer-vehicle collisions will be tracked for a two year period in the test area.

**VII. Traffic Records**

The Statewide Traffic Records Coordinating Committee, chaired by the Department of Transportation, meets periodically to address data related matters. The NJTR-1 traffic crash report form has been revised to meet the Model Minimum Uniform Crash Criteria (MMUCC). The MMUCC is a minimum set of crash data elements with standardized definitions that are relevant to injury control, highway and traffic safety.

The Division is represented on the Executive Board of the Association of Transportation Safety Information Specialists. This group of professionals are committed to improving the state of traffic records data collection nationwide.
GOALS

This section sets forth the program goals and the current status of each short-term goal identified in the FY 2004 Highway Safety Plan.

Goal 1 - Mileage Death Rate

1. To reduce the fatality rate per 100 million vehicle miles traveled from 1.05 in 2001 to 1.02 in 2004.

Accomplishment

There were a total of 733 fatalities in calendar year 2003. The number of vehicle miles traveled in 2003 was 69.8 billion. The death rate, which is calculated using total fatalities and vehicle miles traveled, was 1.09 deaths per 100 million vehicle miles traveled in 2003. As of December 2, 2004, the number of fatalities reported for calendar year 2004 was 618. If the vehicle miles traveled increases at an anticipated rate of 1.9 percent, the fatality rate in 2004 would be estimated at 1.01 deaths per 100 million vehicle miles traveled based on 720 fatalities for the year.

Data Source: U.S. Department of Transportation, Fatal Analysis Reporting System, 2004

Goal 2 - Injuries From Crashes

1. To reduce the number of traffic crash injuries from 71,834 to 70,397 by December 31, 2004.

Accomplishment

The number of traffic injuries for 2004 is estimated at 74,300. As the data is calculated, the final number of injuries will be submitted at a later date.

Data Source: New Jersey Department of Transportation, Bureau of Data Development, 2004

Goal 3 - Alcohol and Other Drugs

1. To decrease the percentage of alcohol related fatalities from 39 percent in 2002 to 38 percent in 2004.

Accomplishment

The data file for calendar year 2004 is currently incomplete. A report on alcohol related fatalities for calendar year 2004 will be submitted under separate cover when finalized.

Data Source: U.S. Department of Transportation, Fatal Analysis Reporting System, 2004
Goal 4 - Occupant Protection

1. To reduce occupant fatalities under the age of eight in calendar year 2004.

Accomplishment

As of December 2, 2004, the number of occupant fatalities has declined from seven to in 2003 to five in calendar year 2004.

Data Source: U.S. Department of Transportation, Fatal Analysis Reporting System, 2004

2. To increase seat belt use rate from 81.2 percent in 2003 to 84.2 percent in 2004.

Accomplishment

An observational survey of seat belt usage revealed a statewide usage rate of 82 percent. Although not meeting the anticipated goal, the 82 percent is the highest observed rate in the State.

Data Source: New Jersey Division of Highway Traffic Safety, Seat Belt Survey, 2004

3. To reduce the number of unrestrained vehicle occupant fatalities as a percent of all vehicle occupant fatalities from a rate of 53 percent in 2002 to no more than 50 percent in December 31, 2004.

Accomplishment

There were a total of 220 unrestrained occupants killed in 2003 that represented 55 percent of all fatalities. Preliminary data for 2004 indicates a slight decrease from 55 to 54 percent.

Data Source: U.S. Department of Transportation, Fatal Analysis Reporting System, 2004

Goal 5 – Pedestrian/ Bicycle Injuries and Fatalities

1. To reduce the number of pedestrian fatalities from 177 in calendar year 2002 to 160 by December 31, 2004.

Accomplishment

Preliminary data for 2004 indicates a total of 117 pedestrian fatalities as of December 2, 2004. This represents 19 percent of all fatalities.

Data Source: U.S. Department of Transportation, Fatal Analysis Reporting System, 2004
2. To decrease the number of pedestrian injured by 5 percent from 5,947 in 2002 to 5,650 by the end of calendar 2004.

Accomplishment

Preliminary data indicates that there were 2,765 pedestrians injured during the first six month of calendar year 2004.

Data Source: New Jersey Department of Transportation, Bureau of Data Development, 2004

3. To reduce the number of pedestrians killed under the age of 15 from 14 in calendar year 2002 to no more than 10 in 2004.

Accomplishment

As of December 2, 2004, the number of pedestrian fatalities under 15 years of age was 11.

Data Source: U.S. Department of Transportation, Fatal Analysis Reporting System, 2004

4. To reduce the number of pedestrians killed, age 65 and older, from 55 in calendar year 2002 to 48 by December 31, 2004.

Accomplishment

As of December 2, 2004, the number of pedestrian fatalities for those 65 years of age and older had been reduced to 27 fatalities.

Data Source: U.S. Department of Transportation, Fatal Analysis Reporting System, 2004

5. To reduce the number of bicyclists killed in 2004.

Accomplishment

As of December 2, 2004, the number of bicyclists killed totaled 11 fatalities. This was identical to the number of fatalities in calendar year 2003.

Data Source: U.S. Department of Transportation, Fatal Analysis Reporting System, 2004

6. To reduce the number of bicyclists injured from 2,279 in 2002 to 2,166 by December 31, 2004.
Accomplishment

Data for the first six months of the year indicates that there were 1,075 bicyclists injured.

Data Source: New Jersey Department of Transportation, Bureau of Data Development, 2004

LEGISLATION

The following highway safety legislation was enacted and became effective during calendar year 2004.

P.L. 2003, c.310

Approved on January 20, 2004, this legislation established a penalty for persons who use a cellular telephone while operating a motor vehicle. The penalty is a fine of not less than $100 or more than $250. The penalties established are applicable only when a driver is stopped for another motor vehicle violation or other offense.

P.L. 2003, c.314

Approved on January 20, 2004, this legislation reduced the level of blood alcohol content that determines drunken driving from 0.10 to 0.08 percent.

P.L. 2003, c.315

Approved on January 20, 2004, this legislation established criminal penalties for third and subsequent offenses of driving while intoxicated. The legislation requires a person who commits a third or subsequent DWI offense to serve a 180-day prison term in a county jail or workhouse. The court may lower the term of imprisonment for up to 90 days for each day the offender participates in a rehabilitation program for drug and alcohol dependent persons. The legislation is known as “Michael’s Law”.

P.L. 2004, c.8

Approved on April 26, 2004, this legislation clarifies the penalties for refusing to submit to a breathalyzer test after being arrested for drunk driving. The legislation requires first time offender whose BAC is 0.08 percent or higher but less than 0.10 percent to lose their driver’s license for three month; if the BAC is 0.10 percent or higher, the license will be suspended for seven months to one year.

P.L. 2004, c.95

Approved on July 9, 2004, this legislation requires prosecutors to determine if a person charged with drunk driving is a repeat offender for that offense. Until this legislation, there was no law that required prosecutors or judges to examine a person’s driving record before sentencing, although it was normally done.
