

# **RESOLUTION OF THE NEW JERSEY PINELANDS COMMISSION**

**NO. PC4-20-\_\_\_\_\_**

**TITLE:** To Establish the Objectives of the Pinelands Commission Relative to Climate Change in the Pinelands Area and the Responsibilities of the Commission's Land Use, Climate Impacts and Sustainability Committee

**Commissioner \_\_\_\_\_ moves and Commissioner \_\_\_\_\_ seconds the motion that:**

**WHEREAS**, the Pinelands Protection Act of 1979 recognized the Pinelands Area as an area comprised of significant and unique natural, ecological, agricultural, scenic, cultural and recreational resources, among them pine-oak forests, cedar swamps and extensive surface and ground water resources of high quality that provide unique habitat for a wide diversity of rare plant and animal species; and

**WHEREAS**, to ensure protection of the Pinelands Area from the threat posed by development pressure, the Pinelands Protection Act directed the Pinelands Commission to adopt a comprehensive management plan designed to protect, preserve and enhance the significant values of the resources of the Pinelands Area; and

**WHEREAS**, since its adoption by the Commission in 1981, the Pinelands Comprehensive Management Plan (CMP) has encouraged appropriate patterns of growth as a means of protecting the overall Pinelands environment from the individual and cumulative impacts of scattered and piecemeal development; and

**WHEREAS**, through its implementation of the CMP, the Pinelands Commission has successfully safeguarded the core of the Pinelands Area while channeling growth toward designated areas with the infrastructure needed to support it; and

**WHEREAS**, collaborative efforts among the Commission, state, local, county and nonprofit organizations have preserved more than 50 percent (479,000 acres) of the land in the Pinelands Area to date; and

**WHEREAS**, these measures have not only protected the Pinelands ecosystem but have significantly benefited air and water quality, while protecting agricultural lands and vast wildfire-prone forests that serve to sequester carbon in the entire region when properly managed; and

**WHEREAS**, wetlands comprise approximately one-third of the Pinelands, and they play a critical role in filtering sediments, pollutants and nutrients from water, while also capturing and storing carbon, providing a buffer against sea level rise, and reducing the impacts of flooding and droughts; and

**WHEREAS**, the Pinelands Commission acknowledges there is ample scientific evidence documenting that climate change poses a new and severe threat to the Pinelands environment; and

**WHEREAS**, the Pinelands Commission endeavors to serve as an example for others as to how homeowners, businesses and local governments in the Pinelands Area should operate in order to mitigate and adapt to the significant challenges posed by climate change; and

**WHEREAS**, the Pinelands Commission is committed to building on the success of the CMP and the Pinelands protection program by refining the CMP so that climate change considerations may be incorporated in the Commission's future planning and permitting decisions; and

**WHEREAS**, to that end, the Chairman of the Commission established the Land Use, Climate Impacts and Sustainability (LUCIS) Committee in December 2018; and

**WHEREAS**, on October 9, 2019, New Jersey Governor Murphy signed Executive Order 89 which stated, in part: "WHEREAS, the severity of future impacts of climate change on our State will directly depend on the willingness and ability of communities, businesses, industries and *government entities* [emphasis added] to integrate climate change considerations into planning and decision-making, and to become more resilient and adapt to the effects of climate change"; and

**WHEREAS**, on January 27, 2020, New Jersey Governor Murphy signed Executive Order 100 which stated, in part: “WHEREAS, it is the policy of this State that, as a key part of its efforts to curtail the serious impacts of global climate change caused by greenhouse gas emissions, New Jersey must pursue a just and smooth transition away from its reliance on fossil fuels as a primary energy source and build a stronger and fairer economy that relies primarily upon clean and renewable energy sources”; and

**WHEREAS**, in order to ensure that the policies, practices, regulations and actions of the Pinelands Commission serve to mitigate, not exacerbate, the impacts of climate change, it is now appropriate to detail the responsibilities and objectives of the LUCIS Committee and the Commission as a whole; and

**WHEREAS**, pursuant to N.J.S.A. 13:18A-5h, no action authorized by the Commission shall have force or effect until ten (10) days, Saturdays, Sundays and public holidays excepted, after a copy of the minutes of the meeting of the Commission has been delivered to the Governor for review, unless prior to expiration of the review period the Governor shall approve same, in which case the action shall become effective upon such approval.

**NOW, THEREFORE BE IT RESOLVED** that

1. The Pinelands Commission acknowledges the scientific consensus that human influence on the climate system is clear, recent anthropogenic emissions of greenhouse gases are the highest in history and recent climate changes have had widespread adverse impacts on human and natural systems.
2. The Pinelands Commission acknowledges the scientific consensus that the continued emission of greenhouse gases will cause further warming and long-lasting changes in all components of the climate system, increasing the likelihood of severe, pervasive and irreversible adverse impacts on people and ecosystems, including the Pinelands.
3. The Pinelands Commission further acknowledges that substantial and sustained reductions in greenhouse gas emissions are required, together with adaptation measures, to limit the risks of climate change.

**BE IT FURTHER RESOLVED** that

4. The Executive Director, in consultation with the Commission’s Personnel & Budget Committee, shall examine all of the Commission’s facilities, day-to-day operations and management practices. The Chair of the Personnel & Budget Committee shall update the LUCIS Committee on the results of said examination and shall present to the Commission for its consideration recommended changes that would mitigate greenhouse gas emissions to the greatest extent feasible.
5. The LUCIS Committee shall coordinate with the New Jersey Department of Environmental Protection, the Board of Public Utilities and other state agencies and departments on their efforts to mitigate the impacts of climate change in New Jersey.
6. The LUCIS Committee shall examine all Commission policies, including but not limited to those governing use of the Pinelands Conservation Fund, to determine those that may have an effect on climate change, those that serve to mitigate climate change and those that may be strengthened or otherwise amended to have such a mitigating effect, and shall recommend such changes to the Commission for its consideration.
7. The LUCIS Committee shall identify existing CMP standards that may be strengthened and new CMP standards that may be adopted to mitigate the effects of climate change on the Pinelands environment and shall recommend such standards to the Pinelands Commission for consideration as proposed amendments to the CMP. Such amendments may include the incorporation of language into the CMP that emphasizes the importance of mitigating the effects of climate change on Pinelands resources, in keeping with the goals set forth in the Pinelands Protection Act. The LUCIS Committee may also take such other actions and make such other recommendations to the Commission consistent with this mandate, the Pinelands Protection Act and the CMP as the Committee may deem appropriate.
8. The Pinelands Commission shall evaluate all proposed CMP amendments in terms of their potential impacts on greenhouse gas emissions and shall seek to include measures that will mitigate adverse impacts on the Pinelands environment.

**Record of Commission Votes**

A Y E N A Y N P A/R*				A Y E N A Y N P A/R*				A Y E N A Y N P A/R*
