

Rural Health Transformation Program

Funding Allocations – July 31, 2026

Advancing Access to Care, EMS, and Dispatch Capability in Rural New Jersey

Grant information

Applicant Name	Award Amount	Activities
Atlantic Ambulance Corporation	\$614,190	Expand access to comprehensive healthcare by expanding Mobile Integrated Health services and pre-hospital whole blood administration to improve access to coordinated care, reduce treatment delays and avoidable emergency utilization, and improve patient outcomes for underserved communities.
AtlantiCare Regional Medical Center	\$2,045,763	Establish a Mobile Integrated Health program to expand access to follow-up and preventive healthcare, improve continuity of care, reduce preventable rehospitalizations, and decrease unnecessary EMS utilization. Expand the prehospital blood program to increase access to lifesaving blood products in rural communities, improving early treatment for patients experiencing acute hemorrhage, and enhancing survival outcomes.
Cooper Health System	\$1,373,265	Establish a sustainable Mobile Integrated Health program that expands access to preventive, coordinated, and patient-centered healthcare. Improve care continuity through follow-up services, chronic disease management, and connections to primary care, behavioral health, and community resources in order to reduce preventable hospitalizations, unnecessary EMS utilization, and healthcare disparities.
Gloucester County	\$1,053,650	Improve the efficiency and effectiveness of the emergency medical response system by integrating clinician-led triage into the 9-1-1 call process, ensuring patients are directed to the most appropriate level of care based on their clinical needs. Enhance patient outcomes by reducing unnecessary emergency department visits and EMS transports, improving resource allocation, decreasing response times for high-acuity emergencies, and connecting patients with alternative care options.

Inspira Medical Centers, Inc.	\$2,033,362	Establish a sustainable Mobile Integrated Health program to expand access to preventive, coordinated, and patient-centered care in rural designated counties while implementing a safe, standardized prehospital whole blood administration program to improve trauma survival, strengthen emergency response capabilities, and enhance overall rural health outcomes.
Virtua Health Inc.	\$1,126,384	Improve rural health outcomes by expanding the Mobile Integrated Health program to expand access to coordinated, preventive, and patient-centered care for uninsured and underserved residents while reducing avoidable emergency care utilization and strengthening trauma response through expanded prehospital whole blood administration and enhanced field-based hemorrhage resuscitation.
Warren County	\$4,180	Establish and implement a comprehensive Quality Assurance/Quality Improvement (QA/QI) program that improves EMS dispatch performance, protocol compliance, workforce competency, and operational accountability through standardized call evaluation and continuous quality improvement.

Advancing Technology, Prevention, and Workforce Capacity in Rural New Jersey

Grant information

Applicant Name	Award Amount	Activities
Acenda, Inc.	\$510,112	Expand access to preventive services and improve care navigation for residents in rural Atlantic, Cape May, Cumberland, and Salem Counties through Rural Health Connect - South Jersey using a standardized, Community Health Worker and Care Partner-led model.
Allamuchy-Green First Aid Squad	\$281,939	Reduce barriers to emergency and preventive healthcare access by modernizing patient transport capabilities, preventing transport-related complications, and ensuring timely delivery of medical care in rural Warren County.
AtlantiCare Health Services, Inc.	\$1,800,000	Improve health outcomes in Atlantic and Cape May Counties by integrating a population health tool and dashboard to identify care gaps, support social determinants of health screening, and enable coordinated, closed-loop care and by implementing a patient portal that enables access to health information, supports communication across care teams, and facilitates timely follow-up and care coordination.
Bridgeway Behavioral Health Services A NJ Nonprofit Corporation	\$208,537	Increase coordinated, prevention-focused interventions for individuals with serious mental illness (SMI) and co-occurring metabolic conditions in rural Sussex County.

Burlington County	\$100,956	Improve health outcomes through mobile health unit services, community partnerships, and coordinated care.
Camden Coalition, Inc.	\$179,058	Enhance maternal health systems in rural Atlantic and Cape May counties through early identification and coordinated care connections for uninsured high-risk pregnant individuals.
Cape May County Council on Alcoholism/Drug	\$159,194	Strengthen caregiver and family health by delivering evidence-based education in chronic disease, mental health awareness, and substance abuse prevention.
Center for Health Equity a Public Health Institute Inc.	\$21,748,500	Improve rural community capacity to deliver preventive health interventions and addressing social drivers of health, improve access to health coverage and primary care by using AI outreach platforms to conduct eligibility screening and care connections, and improve the clinical workforce through recruitment and retention efforts.
Center for Prevention & Counseling Inc.	\$196,796	Strengthen preventive services and expand healthcare access to improve health outcomes in rural Sussex County.
Cherry Hill Free Clinic Inc.	\$447,906	Improve access to comprehensive primary care, chronic disease management, and mental health services for rural residents of southern NJ by eliminating distance and financial barriers to high-quality, timely medical care.
Child Mind Institute Inc.	\$504,429	Increase healthcare access and improve health outcomes in rural communities of Mercer, Monmouth, Sussex, and Warren Counties through interactive mental health workshops for educators, school staff, and caregivers.
CompleteCare Health Network	\$464,538	Improve access to preventive and primary care among rural residents of Cumberland and Cape May Counties and improve patient care through technology solutions for clinical decision-making and workflow adherence.
Crossroads4Hope	\$329,734	Expand access to cancer prevention education, screening and early detection awareness, technology-enabled supportive care resources, and coordinated referral pathways for rural residents of Hunterdon, Sussex, and Warren Counties.
Cumberland County	\$273,396	Increase access to preventive care, chronic disease screening and management, vaccinations, care coordination, and health education.
Deborah Heart and Lung Center	\$1,246,393	Improve access, care coordination, and continuity of services for rural residents of Burlington and Ocean Counties through preventive, primary, specialty, and home-based telehealth services, supported by remote patient monitoring.
FamCare Incorporated	\$419,072	Conduct community-based outreach, screening, and patient navigation services to improve early identification and linkage to care for sexually transmitted infections (STIs), hypertension, and cancer-related health needs with the use of technology solutions and to strengthen the capacity of the rural health workforce in

		Salem and Cumberland Counties through education, training, and experiential opportunities.
Fond of You, Inc.	\$499,498	Improve mental health outcomes among rural youth and young adults in New Jersey through clinically supervised, technology-enabled peer support, early intervention, and coordinated behavioral health services.
Health Center Network of New York, Inc. aka Health Efficient	\$727,658	Improve care quality and access by enhancing rural health center Electronic Health Record (EHR) systems and implementing e-consults to support data-driven care and timely specialty input.
Health Research and Educational Trust of NJ/NJHA	\$898,854	Improve patient outcomes by streamlining real-time clinical decision support systems and tools in rural hospitals across New Jersey.
HMH Hospitals Corporation	\$1,550,815	Improve early identification of and outcomes for pediatric and caregiver mental health needs in rural communities across New Jersey by strengthening rural provider capacities to deliver standardized, trauma-informed screening. Additionally, improve chronic disease outcomes through Remote Patient Monitoring (RPM) programs.
Hunterdon County	\$401,359	Expand access to preventive care, cancer screening, vision health, and mental health through mobile delivery, transportation support, and community-based programming.
Hunterdon Medical Center	\$1,088,184	To reduce avoidable hospital readmissions and improve continuity of care for high-risk rural patients by strengthening care transitions from inpatient to community settings and expanding access to wellness resources and to improve access to timely, safe, and coordinated care by implementing and integrating a virtual care platform across key hospital settings and care transition workflows.
Impactiv, Inc.	\$157,737	Expand access to evidence-based virtual exercise programming for older adults (55+) in rural New Jersey to reduce fall risk, increase physical activity engagement, and improve social connectedness through community-based partnerships.
Inspira Medical Centers, Inc.	\$578,248	To expand Community Health Worker (CHW) capacity to identify rural residents in Cumberland and Salem counties with unmet social and health needs and connect them to supportive services.
Kennedy University Hospital Inc.	\$584,514	Enhance patient access to care for rural residents in Atlantic, Burlington, Cumberland, and Salem Counties through the integration of technology solutions.

Legacy Treatment Services	\$662,335	Increase access to quality whole-person care through mobile-enabled healthcare delivery, including substance use disorder (SUD) services and prevention in rural Atlantic and Cape May counties.
LilyLink Inc.	\$440,370	Improve maternal and neonatal health outcomes among rural residents across New Jersey through technology-enabled solutions.
Maryville Inc.	\$821,012	Improve recovery outcomes for residents of rural Southern New Jersey with mental health and substance use disorders (SUDs) by enrolling and maintaining active participation in peer-led recovery support services and expanding access to mental health and SUD support services by implementing technology-enabled solutions.
Mercer County	\$409,538	Increase access to preventive health screenings and vaccinations for populations in rural Mercer County.
Montclair State University	\$335,731	Provide professional development opportunities, including reflective supervision training and coaching, for the rural health workforce.
New Jersey Chapter, American Academy of Pediatrics	\$515,257	Improve oral health and mental health outcomes for children and adolescents in rural New Jersey, with a focus on uninsured and underinsured populations.
NJ Prevention Network	\$291,079	Expand access for rural residents in New Jersey to timely, coordinated health, behavioral health, and social support services through integrated technology solutions for communications, referral, and resource navigation and to strengthen the capacity of New Jersey's behavioral health workforce by developing and delivering evidence-informed, rural-adapted training modules for providers serving eligible rural areas.
NORWESCAP	\$52,236	Deploy community-based digital screening kiosks and navigation services that identify social needs and connect individuals to wraparound services in rural Hunterdon, Sussex, and Warren Counties.
Oaks Integrated Care Inc.	\$149,810	Improve mental health care access, quality, and outcomes for rural New Jersey residents by integrating technology solutions, including Electronic Health Record (EHR) enhancements, telehealth expansion, and AI-driven tools.

Ocean County	\$713,310	Improve access to coordinated preventive, chronic disease, maternal, and behavioral health services and support better health outcomes through community-based care, education, and engagement. Improve chronic disease, maternal health, and perinatal mental health outcomes by enabling early clinical intervention through remote patient monitoring and behavioral health integration programs.
Ocean Mental Health Services	\$849,327	To increase preventive care access and to improve early detection of chronic disease among rural residents through mobile outreach, health education, and digital communication efforts and by expanding access to care through remote patient monitoring, telehealth infrastructure, and integrated Electronic Health Record (EHR) technology solutions.
Parker Family Health Center Inc.	\$438,215	Increase healthcare access and improve health outcomes in Monmouth and Ocean County rural communities by implementing initiatives focused on oral health, diabetes, and hypertension prevention and management, supported by new technological resources.
RH Health Inc.	\$269,612	Improve health outcomes among rural residents across New Jersey through a home-based diagnostic testing program.
Rowan University	\$786,938	Expand rural health infrastructure and programming to improve early detection and prevention of chronic conditions, substance use, and nutritional health challenges among residents of Cumberland County.
Rutgers Biomedical and Health Sciences	\$518,443	Improve maternal mental health and access to perinatal support services by implementing and scaling technology-enabled interventions and by expanding access to culturally responsive, evidence-based patient education integrated into routine perinatal care clinical workflows.
Rutgers, The State University of New Jersey, Camden	\$239,785	Identify and address healthcare access barriers for residents in rural Atlantic, Salem, and Cumberland counties through community-informed research that informs statewide rural health strategy.
Rutgers, The State University of NJ	\$1,216,604	Expand identification of health risks and improve access to health care and supportive services and integrated systems through community outreach, health screening, remote patient monitoring, risk detection, and care navigation and strengthening the rural health infrastructure by building community and workforce capacity through training and technical assistance to support chronic disease prevention, health literacy, and care coordination in Hunterdon and Cumberland Counties.
Rutgers, The State University of NJ	\$115,921	Establish the New Jersey Rural Health Resource Center (NJ-RHRC) to strengthen rural health care delivery across the state by providing expert technical assistance to rural partners, fostering collaborative partnerships, and building sustainable capacity for rural health care.

Salem County	\$230,344	Improve health outcomes and reduce health barriers in Salem County by expanding access to comprehensive primary care, preventive services, and chronic disease management for rural residents.
Salem Inter Agency Council of Human Services	\$242,010	Build community health capacity through health ambassador training, culturally responsive engagement strategies, and peer-driven health communication in rural Salem County.
Southern Jersey Family Medical Centers, Inc.	\$697,114	Improve access to coordinated preventive care and chronic disease health services for rural residents in Atlantic, Burlington, and Salem Counties through remote patient monitoring, telehealth infrastructure, and integrated Electronic Health Record (EHR) technology solutions.
Southern NJ Perinatal Cooperative	\$278,102	Improve maternal health and future pregnancy outcomes in rural Atlantic and Cumberland Counties through increased connectivity with health care during the interconception period.
St. Luke's Warren Hospital	\$657,452	Enhance patient care and operational efficiency through the integration of technology solutions.
Sussex County	\$206,539	Expand access to preventive health screenings, health education, and referral resources for rural Sussex County residents through community-based screening kiosks and mobile health clinics.
The Food Bank of South Jersey	\$272,199	Increase access to preventive healthcare services for adults in rural Burlington and Salem County. Strengthen rural organizations' capacity to reduce stigma, build trust, and improve access to care through trauma-informed training and community engagement.
Virtua Health Inc.	\$1,196,187	Increase awareness of and access to preventive health services among rural residents in Atlantic and Burlington Counties, improve early identification and outcomes for pediatric and caregiver health needs by strengthening rural provider knowledge and capacities, and improve chronic disease outcomes through technology solutions.
Visiting Nurse Association of Central Jersey, Community Health Center, Inc.	\$169,550	Strengthen preventive care for rural and underserved populations in Monmouth County by enhancing care coordination, improving infectious disease management, and increasing access to pediatric preventive services.
Visiting Nurse Association of Central Jersey, Inc.	\$271,617	Improve mental health outcomes through rural resident participation in HIV Case Management, ResourceConnect, Early Intervention, Nurse-Family Partnership, Healthy Families, Parents as Teachers, and WIC programs.
Zufall Health Center	\$600,162	Expand equitable access to comprehensive primary and preventive health care for residents in rural Hunterdon, Sussex, and Warren Counties through innovative mobile, telehealth, and community-based service delivery and strengthen Zufall organizational capacity and patient care delivery through

		leadership development, operational excellence, and enhanced workforce capabilities.

Building Rural Hospital Capacity

Grant information

Applicant Name	Award Amount	Activity
AHS Hospital Corp.	\$1,460,000	[Hackettstown Medical Center] The project is intended to expand the capacity of Hackettstown Medical Center to serve primarily uninsured and underinsured patients through three programs to build rural hospital capacity. These include: 1) Transitions of Care (to increase accessibility to hospital services); 2) Food Is Medicine (to expand existing nutrition programs); and 3) tele-neurology robots (to modernize infrastructure).
AHS Hospital Corp.	\$1,460,000	[Newton Medical Center] The project is intended to expand the capacity of Newton Medical Center to serve primarily uninsured and underinsured patients through three programs to build rural hospital capacity. These include: 1) Transitions of Care (to increase accessibility to hospital services); 2) Food Is Medicine (to expand existing nutrition programs); and 3) tele-neurology robots (to modernize infrastructure).
AtlantiCare Regional Medical Center	\$1,460,000	[City Campus] This project is intended to modernize and strengthen the digital infrastructure, security posture, and clinical technology capabilities across the two-campus health system.
AtlantiCare Regional Medical Center	\$1,460,000	[Mainland Campus] This project is intended to modernize and strengthen the digital infrastructure, security posture, and clinical technology capabilities across the two-campus health system.
Capital Health System, Inc.	\$1,388,795	This grantee intends to purchase a new Specialty Care Transport Unit and an Advance Life Support ambulance. This project will also be used to strengthen their IT infrastructure.
Cooper Health System	\$1,460,000	This project will include digital infrastructure modernization, implementation of a telehealth pilot, home-based care, workforce development and Food as Medicine integration.
Deborah Heart and Lung Center	\$1,393,982	This project is intended to implement RuralCare Connect™ program, which includes outreach and support, and technology and monitoring. This program follows an integrated prevention-to-technology care model that expands access to preventive services, strengthens workforce capacity, and integrates telehealth and remote monitoring solutions to reach rural residents.

Hunterdon Medical Center	\$1,446,828	This project is intended to modernize the digital hardware and technological infrastructure to complete EMR modernization to align with the latest HITECH standards.
Inspira Medical Centers, Inc.	\$1,460,000	[Elmer] The project centers on implementing an end-to-end virtual nursing model with a centralized command center, virtual observation, and standardized care coordination workflows, to preserve access, and stabilize staffing.
Inspira Medical Centers, Inc.	\$1,209,202	[Mannington] The project centers on implementing an end-to-end virtual nursing model with a centralized command center, virtual observation, and standardized care coordination workflows, to preserve access, and stabilize staffing.
Inspira Medical Centers, Inc.	\$1,460,000	[Vineland] The project centers on implementing an end-to-end virtual nursing model with a centralized command center, virtual observation, and standardized care coordination workflows, to preserve access, and stabilize staffing.
Shore Memorial Hospital	\$1,458,227	This project will transition Shore Physicians Group from Athena to Oracle Health, consolidating both hospital and ambulatory services onto a single, remote-hosted Oracle Health enterprise platform.
St. Luke's Warren Hospital	\$1,460,000	This project will upgrade Ultrasound, General Diagnostic and Women's Imaging equipment with the latest software to improve patient care.

Community Health Workers in Rural New Jersey

Grant information

Applicant Name	Award Amount	Activity
Community Health Care, Inc. DBA CompleteCare Health Network	\$240,589	Deploy CHWs to expand access to care, address SDOH, reduce avoidable emergency department utilization, and improve health outcomes for rural residents in Cumberland and Cape May counties through SDOH screenings, care coordination and patient navigation, community outreach, and building lasting community-clinical partnerships.
Cooper Health System	\$169,861	Deploy CHWs to deliver community-centered outreach, care coordination, and social needs navigation in rural Burlington and Cape May Counties to ensure continuity across care settings.
Healthy People Worldwide DBA Mowana Care	\$300,000	Improve access to maternal, behavioral, and preventive healthcare services in rural Hunterdon and Mercer Counties through outreach, care coordination, and SDOH navigation via CHWs.

Kennedy University Hospital Inc.	\$123,603	Improve access to care, strengthen chronic disease prevention and management, and address SDOH among rural residents of Burlington County via CHWs.
NORWESCAP	\$106,258	Identify unmet medical and SDOH needs in Warren and Hunterdon Counties and connect residents to appropriate resources, reducing avoidable emergency care utilization and improving long-term well-being.
Statewide Parent Advocacy Network	\$186,517	Deploy CHWs across Atlantic, Cape May, Cumberland, Hunterdon, Salem, Sussex, and Warren counties, to strengthen family navigation, improve care coordination, and enhance community-clinical linkages.
Trenton Health Team, Inc.	\$249,382	Improve maternal and infant health outcomes for rural pregnant and postpartum individuals in Mercer County using a fully embedded CHW model within Capital Health's prenatal clinics, including SDOH screening and care coordination.
Virtua Health Inc.	\$107,451	Expand a specialized CHW workforce to improve access to preventive maternal and child health services for families in rural South Jersey through home visiting, mobile health integration, telehealth support, and care coordination.

Doula Integration in Rural New Jersey

Grant information

Applicant Name	Award Amount	Activity
AtlantiCare Regional Medical Center	\$790,478	Establish a doula integration model to increase the delivery of patient-centered prenatal and perinatal care through standardized practices, shared decision making, culturally responsive care, and individualized birth plans.
Cooper Health System	\$185,000	Implement a Tier 1 Community Doula Program that integrates paid, NJ-approved community doulas into existing clinical and community-based maternal health services at Cooper University Health Care within Burlington County, Atlantic, Cape May, Cumberland, and Salem Counties.

HMH Hospitals Corporation	\$750,000	Establish a hospital-integrated Transitions of Care Doula program at Hackensack Meridian Health (HMH) through the deployment of six full-time doulas to provide support to high-risk postpartum patients in Atlantic, Burlington, Cape May, Cumberland, Mercer, Monmouth, Ocean, Salem, and Sussex Counties.
Virtua Health Inc.	\$292,524	Expand access to culturally competent doula services for pregnant and postpartum individuals through the recruitment and training of a rural doula workforce, establishment of referral pathways with healthcare and community partners, and provision of continuous prenatal, labor, and postpartum support in rural Burlington and Atlantic Counties.
Visiting Nurse Association of Central Jersey, Community Health Center, Inc.	\$85,484	The Bridge to Birth Doula Program will implement Community Doula services through consistent, culturally responsive support that strengthens patient engagement, builds trust, and complements medical care.

Improving Chronic Disease Outcomes

Grant information

Applicant Name	Award Amount	Activity
Atlantic Prevention Resources Inc.	\$130,392	Rural Pharmacy Medication Management Therapy Program supports medication management, tobacco cessation, and chronic disease prevention services not covered by medical insurance. This program targets medication adherence, polypharmacy, and tobacco use among uninsured and underinsured populations with or at risk for chronic conditions to delay disease progression and support overall well-being.
AtlantiCare Health Services, Inc.	\$146,655	The NJ Rural Southern Physical Activity and Nutrition (NJ R-SPAN) Program will support evidence-based physical activity, nutrition, and obesity prevention initiatives for rural communities by leveraging partnerships and resources from various sectors in Atlantic, Cumberland, Salem, Cape May counties.
Community Health Care, Inc. DBA CompleteCare Health Network	\$322,104	The Rural Health Screening and Education improves access to preventive cancer screening, chronic disease self-management education, and care coordination for underserved rural residents of Cumberland and Cape May Counties through health education, screening activation, navigation, and referral services.

Cooper Health System	\$178,711	The Enhancing Rural Cancer Healthcare program aims to implement sustainable policy, systems, and environmental change approaches across the rural areas of 8 Regional Chronic Disease Coalitions to reduce the burden of cancer and other chronic and reproductive diseases through cancer education, outreach, referrals to appropriate screening services, and survivorship care services.
Healthy People Worldwide DBA Mowana Care	\$89,268	The Umbrella Hub Organizations aims to reduce barriers and increase reimbursement for education on diabetes, cardiovascular, and other chronic diseases covered by public and private insurers.
Hunterdon Medical Center	\$147,117	Enhance and expand early detection, prevention, and management of chronic diseases through coordinated screening and education initiatives encouraging proactive engagement in preventive care, healthier behaviors, and improvement in long-term health outcomes and to advance health equity among food-insecure and medically underserved rural residents by providing access to healthy foods through an integrated community-clinical model.
Legacy Treatment Services	\$133,296	Improve health outcomes in rural communities through medication therapy management, tobacco cessation services, and chronic disease prevention and management that are not covered by medical insurance.
National Kidney Foundation	\$177,757	Enhance and expand early detection, prevention, and management of chronic diseases through coordinated screening and education initiatives encouraging proactive engagement in preventive care, healthier behaviors, and improvement in long-term health outcomes among residents through home-based testing, patient-centered support services, and quality improvement initiatives.
New Jersey Innovation Institute, Inc.	\$197,004	The NJ Rural Southern Physical Activity and Nutrition (NJ R-SPAN) Program will support evidence-based physical activity, nutrition, and obesity prevention initiatives for rural communities by leveraging partnerships and resources from various sectors in Atlantic, Cumberland, Salem, Cape May counties.
Rowan University School of Osteopathic Medicine	\$437,838	Increase hepatitis C diagnosis, linkage to care, treatment completion, and cure rates through the Rowan University School of Osteopathic Medicine Liver Health Mobile Unit Project among rural residents in Cumberland County.

Rutgers, The State University of NJ	\$277,462	Support evidence-based physical activity, nutrition, and obesity-prevention initiatives for rural communities by leveraging partnerships and resources. Reduce barriers and increase reimbursement for education on diabetes, cardiovascular, and other chronic diseases covered by public and private insurers.
Salem County	\$67,167	Increase the capacity of Salem County residents, particularly those living in rural and medically underserved communities, to prevent and manage chronic diseases through the implementation of accessible health monitoring technology, personalized education, and ongoing engagement strategies that support sustained behavior change.
Shore Memorial Hospital	\$45,021	The NJ Rural Southern Physical Activity and Nutrition (NJ R-SPAN) Program will support evidence-based physical activity, nutrition, and obesity prevention initiatives for rural communities by leveraging partnerships and resources from various sectors in Atlantic, Cumberland, Salem, Cape May counties.
Statewide Parent Advocacy Network	\$710,000	Reduce risk factors associated with youth violence in rural communities, strengthen protective factors through positive youth development, and enhance family and community capacity to prevent youth violence through the Safe Communities: Youth Violence Prevention in Rural Communities initiative.
Virtua Health Inc.	\$427,709	Support evidence-based physical activity, nutrition, and obesity-prevention initiatives. Improve health outcomes in rural communities through medication therapy management, tobacco cessation services, and chronic disease prevention and management. Implement sustainable policy, systems, and environmental change across eight Regional Chronic Disease Coalitions to reduce cancer and other chronic and reproductive disease burden.
Zufall Health Center	\$154,135	Improve access to chronic disease prevention, screening, and self-management services for residents in rural Hunterdon, Sussex, and Warren Counties, to reduce risk factors and improve long-term health outcomes related to hypertension and diabetes through the Bridging Chronic Disease Care Gaps in Rural America program.
