## *Letter of Transmittal*

---

To: Berkeley Township  
From: Urban Partners  
Re: Transfer of Development Rights Real Estate Market Analysis  
Date: October 31, 2012

We have prepared the attached real estate market analysis to support the Transfer of Development Rights Element of the Berkeley Township Master Plan. This market analysis is intended to establish and document land values in the Sending and Receiving Zones, to estimate the land value component of the proposed development in the Receiving Zone under the proposed zoning, and to determine the economic relationship of development rights in the Sending Zone to development rights in the Receiving Zone for various use categories.

Land prices in the Berkeley Sending Zone are currently estimated in the range of \$60,000 to \$85,000 per approved lot for a typical one-third acre to three acre developable lot. After the transfer of development rights, the residual value of land for open space purposes is estimated to be \$5,000 to \$10,000 per acre, or \$2,000 to \$4,000 per typical one-third acre lot.

For three of the Receiving Areas—Town Center 1, Phase II; Town Center 2; and the Light Industrial Area—the current land values for TDR development are negligible since all TDR development is in addition to by-right development. For Node C, the effective Receiving Area land values are determined by the typical value of the 93 developable SFR lots for which TDR development will be substituted. These values are in the \$60,000 to \$85,000 range.

These prices are for evaluation of larger collections of lots, not for sales of single lots. These prices assume a sale after development approvals but with the buyer expending funds beyond the cost of property acquisition in order to achieve these development approvals.

This analysis and estimation is based on current market conditions and may not reflect future values, which can be affected by different market conditions. All valuations are at 2012 pricing.

Sincerely,

James E. Hartling, Partner

# Real Estate Market Analysis

## Summary

Berkeley Township is located in Ocean County along the shore of the Atlantic Ocean south of Tom's River. The Township includes three distinct areas—the Pinelands and senior communities, which lie west of the Garden State Parkway; the “eastern mainland,” which stretches from the Parkway to the shores of Barnegat Bay; and the barrier island. The future of the Township west of the Parkway is largely established by the Pinelands Comprehensive Management Plan and existing adult/senior communities, while the future of the barrier island is likewise established by the presence of an older built-out seasonal community and Island Beach State Park.

The eastern mainland between the Parkway and the bay consists of neighborhoods with long-established development patterns and available infrastructure. Paralleling the Parkway is the Route 9 corridor, the Township’s primary business, retail, and commercial area. Along the bay front are large tracts of wetlands and open space interspersed with existing residential developments. The eastern mainland contains the bulk of the vacant developable land in the Township and is the primary focus of future development and redevelopment proposals.

Berkeley Township grew rapidly between 1960 and 1990, but after 1990 growth slowed. During the 20-year period between 1990 and 2010, population grew by only 10.55% with a population of 41,255 in the 2010 census. However, Berkeley’s housing stock did grow by nearly 20% during this period. This growth was concentrated in the Eastern Mainland portion of the Township where the 2000 population of 17,631 persons was 44% of the Township total and up 16.9% from 1990.

Similarly, Berkeley experienced a 12% growth in housing stock during the 1990s and building permits averaged 186 units per year during the 2000 to 2008 period, bringing another 1,675 units to Berkeley. These 1,675 units are almost exclusively single family home construction (95% of units). The total number of housing units in the 2010 census was reported at 23,818.

If current trends continue, the Township can expect housing and population to grow at a modest pace over the next two decades. The population growth forecast for Berkeley Township anticipates a 2030 population nearing 50,000, which would support the **development of 3,650 new housing units during that 20-year period.**

As identified in the Township’s 2020 Vision Statement, it is the Township’s intention to be proactive about the future of the eastern mainland and to reverse undesirable land use trends. It will achieve this through the adoption of policies that promote four primary targets for future development – Town Center and three commercial nodes – while preserving a substantial portion of the Township as open land. Implementation of the Vision Statement would:

- Retrofit existing strip-type development along the Route 9 corridor into concentrated, mixed-use alternatives;
- Promote in-fill development and efficient use of existing infrastructure;
- Promote a well designed town center as the focus of the Township’s growth;
- Preserve environmentally sensitive coastal resources;

- Maximize circulation and mobility options; and
- Maximize housing opportunities.

To better manage this growth, Berkeley is incorporating a Transfer of Development Rights (TDR) element into its Master Plan. This TDR Plan Element establishes a Sending Zone that includes 1,973 parcels in 333 ownerships with 239.722 acres of land in four zoning classifications. Three of these classifications (CR, R-400, and R-150) including 1,915 parcels with 232.304 acres provide for residential development of up to 408.1 units. The RHB zoning classification includes 58 parcels totaling 7.418 acres and provides for development of up to 96,938 square feet of commercial space. For this TDR program, it is proposed that these commercially-zoned parcels be provided the right to transfer residential development potential to the Receiving Zone at the ratio of one development credit per 15,000 SF of land. This alternative development credit program would result in 21.54 development credits being assigned to these 58 parcels.

Taken together, these 1,973 parcels in 333 ownerships in the Sending Zone would have an allocation of 429.71 development credits.

The TDR Plan Element further establishes the proposed Receiving Zone to include 248 parcels totaling 218.75 acres in four separate Receiving Areas—Town Center 1 Phase II, Town Center 2, Light Industrial, and Node C. Development rights would be transferred to parcels in the Receiving Areas to support the residential and commercial components of mixed-use development in several contexts, as well as the expansion of a light industrial district.

This real estate market analysis is intended to establish and document land values in the Sending and Receiving Zones, to estimate the land value component of the proposed development in the Receiving Zone under the proposed zoning, and to determine the economic relationship of development rights in the Sending Zone to development rights in the Receiving Zone for various use categories.

### **Development Potential**

As noted above, 1,915 Sending Zone parcels with 232.304 acres provide for residential development of up to 408.1 units, while 58 parcels zoned RHB with 7.418 acres provide for development of up to 96,938 square feet of commercial space. Commercial development at these locations has not been highly attractive; therefore, for this TDR program, it is proposed that these commercially-zoned parcels be provided the right to transfer residential development potential to the Receiving Zone at the ratio of one development credit per 15,000 SF of land. This alternative development credit program would result in 21.54 development credits being assigned to these 58 parcels. Taken together, these 1,973 parcels in the Sending Zone would have an allocation of 429.71 development credits.

In the Receiving Zone, the program anticipates development of 1,109 housing units through TDR participation as well as another 670 units by right. Development rights transfer would also facilitate 260,000 SF of light industrial and 150,000 SF of commercial development. The portion of this development occurring at Node C would be in lieu of 93 new single family homes on 15,000 SF to three acre lots. This level of housing development is consistent with the growth forecasts for the Township of 3,650 new units of housing by 2030.

## **Land Values**

The cooling of the residential development market in the past few years has reduced the available information for accurately approximating land values for various residential types in Berkeley. Most newly constructed homes in the Eastern Mainland are in the 2,200 SF to 3,500 SF range on lots of one-quarter to one-half acre and selling in the \$300,000 to \$400,000 range, with a few priced up to \$500,000. There have been a few resales from homeowner to homeowner of homes on larger lots (over one-half acre), but the homes on these larger lots also tend to be in this same size and price range. There is a second less-active new home market for homes in the 1,500 to 1,900 SF range on lots of 5,000 SF to 8,000 SF and selling for \$225,000 to \$275,000.

Sales of vacant lots again are few, but appear to cluster in three price ranges. A few sales appear to involve approved and improved lots of approximately .35 acres ready for development in R150 zones. These sales are priced in the range of \$130,000 to \$150,000 per lot and result in homes being constructed for sale in the \$375,000 to \$425,000 range. A second group includes sales of land without approvals, presumably as part of land assembly efforts or land investment. These sales are in the range of \$10,000 to \$20,000 per potential lot, in some case up to \$30,000 per potentially developable lot.

The third group, and the collection of sales with greatest applicability to this TDR analysis, are sales in the range of \$55,000 to \$95,000 per developable lot. At this price point, these properties appear to be approved for development, but unimproved. These sales are typically for land zoned R125 and R150. We observed 19 sales in the past four years that appear to fit this profile with an average price of \$70,000 to \$75,000 per developable lot.

With the available data, we believe the appropriate assumption for TDR analysis is that the ***value of the typical developable lot in the Sending Zone is priced in the range of \$60,000 to \$85,000***, at 2012 pricing. This would be for an approved, but not improved, lot. For analysis purposes, we would place the value of a lot zoned R150 or utilizing 15,000 SF lot size as an alternate to RHB zoning in the lower part of this range (\$60,000 to \$75,000) and a lot zoned R400 or CR in the higher portion of the range (\$70,000 to \$85,000).

After transfer of development rights, land in the Sending Zone would have minimal residual value, especially given the fragmentation of the parcels. The most likely use is as additions to adjacent residential lots or as public open space. For this analysis, and accepting the very great variation that may exist with regard to the values of these individual parcels in the Sending Zone, we place the ***value of property post TDR at \$5,000 to \$10,000 per acre, in 2012 pricing***.

In summary:

- the value of an average residential building lot in the Sending Zone at 2012 pricing is estimated at \$60,000 to \$85,000.
- the average value of residual open space is estimated at \$5,000 to \$10,000 per acre, or \$2,000 to \$4,000 per average R150 lot, \$5,000 to \$10,000 per R400 lot, and \$15,000 to \$30,000 per CR lot.

Based on these factors, *the pricing of most transferable development rights (R150 parcels or the RHB equivalent) are likely to be in the \$55,000 to \$70,000 per right range, at 2012 pricing.* Rights associated with R400 and CR zoning may be priced slightly higher in the \$60,000 to \$75,000 range. This variation, however, is not substantial enough to impact the current analysis. These prices are for rights purchases completed after development approval has been achieved for the Receiving Zone parcel.

For purposes of establishing TDR credit relationships, the Receiving Zone essentially functions as two separate areas: (1) the Town Center 1 Phase II, Town Center 2, and Light Industrial Areas where there is no loss of by-right development capacity to participate in TDR; and (2) Node C, where adjustments must be made for current by-right development potential.

For the TC 1 Phase II, TC 2, and Light Industrial Receiving Areas, the current land values for TDR development are negligible since all TDR development is in addition to by-right development. For Node C, the effective Receiving Area land values are determined by the typical value of the 93 developable SFR lots for which TDR development will be substituted. For 48 lots the typical pattern is a 2,200 SF to 3,500 SF home on a one-quarter to one-half acre lot selling in the \$275,000 to \$490,000 range; the pricing of a developable lot for this type of development is in the \$60,000 to \$75,000 range. The remaining 45 lots are in the R400 or CR categories. As also noted above, development activity in this parcel size has been very limited in recent years in Berkeley, but the pricing for a developable lot for this type of development could be expected to be in the \$70,000 to \$85,000 range at 2012 pricing.

For purposes of establishing after TDR Receiving Zone land values we need to consider the proposed TDR supported development in terms of the range of uses being facilitated by TDR:

- 150,000 SF of commercial space;
- 260,000 SF of light industrial space;
- 507 duplexes;
- 502 townhomes or condominiums; and
- 100 units of multi-family housing.

**Commercial Space Land Value:** We have identified four sales in the past seven years of commercially-zoned vacant land with a Route 9 address. Sales prices for these parcels range from \$160,000 per acre to \$313,000 per acre, with an average of \$260,000 per acre. These prices suggest that land value for commercial development is in the range of \$20 to \$30 per potential built SF, with higher values likely to prevail at Town Center 2 with the existing infrastructure and anchor development.

**Light Industrial Space Land Value:** As noted above, recent sales of land in the LI zone suggest that land value is approximately \$4 per buildable SF.

**Townhomes:** We would expect new townhome condominiums built in the Receiving Areas to be priced in the \$250,000 to \$340,000 range, or \$180 to \$215 per square foot. Land values for this type of development would typically be 35-40% of the value of a one-quarter to one-half acre lot for development of a larger single-family detached home, or \$25,000 to \$30,000 per unit.

**Duplexes:** There is little experience with duplex homes in Berkeley. Typically, these home types result in construction of 1,800 to 2,500 SF homes likely to sell in the \$300,000 to \$375,000 range in the Berkeley market. Land values for this type of development would typically be 55-60% of the value of a one-quarter to one-half acre lot for development of a somewhat larger single-family detached home, or \$35,000 to \$45,000 per unit.

**Multi-family:** The proposed multi-family units would typically be in the 1,000 SF to 1,600 SF range and support land values of 20-30% of the value of a one-quarter to one-half acre lot for development of a larger single-family detached home, or \$15,000 to \$20,000 per unit.

These prices are for evaluation of larger collections of lots, not for sales of single lots. These prices assume a sale after development approvals but with the buyer expending funds beyond the cost of property acquisition in order to achieve these development approvals. All estimated land values are at 2012 pricing.

### **Development Rights, Credits and Valuation**

The proposed Transfer of Development Rights program will provide for each parcel grouping transferable development rights equal to the nearest one-hundredth of a whole number of on-site development rights. Similarly, development credits are allocated to the commercially zoned land in the Sending Zone at the rate of 1 credit per 15,000 SF of land. Applying this formula to the 1,973 parcels results in **429.71 transferable development rights**.

As noted above, the average valuation for a transferable development right in the Sending Zone is estimated at \$55,000 to \$70,000 in 2012 pricing. Bonus density is typically used to incentivize the transfer of development rights. Given the varying development circumstances between Node C and the other Receiving Areas, these bonus densities will need to vary somewhat. Other than Node C, the necessary bonus densities are the following:

- for duplexes, the bonus density is 0.80. This means that a developer in the Receiving Zone may construct 1.8 homes of this type for each Development Right secured from the Sending Zone;
- for townhomes, the bonus density is 1.60. This means that a developer in the Receiving Zone may construct 2.6 homes of this type for each Development Right secured from the Sending Zone;
- for multi-family housing, the bonus density is 3.10. This means that a developer in the Receiving Zone may construct 4.1 homes of this type for each Development Right secured from the Sending Zone;
- for Commercial and Industrial development, there is no bonus density, as the necessary value relationships have been incorporated in the following ratios chosen for square feet of development allowed per development credit: (1) commercial development under TDR will be allowed at the rate of 2,300 SF of commercial space for each development credit. This means that developers in Town Center 2 will need to purchase 65 development credits to facilitate the addition of 150,000 SF of commercial space; (2) light industrial development under TDR will be allowed at the rate of 18,000 SF of light industrial space

for each development credit. This means that developers will need to purchase 14 development credits to facilitate the addition of 260,000 SF of industrial space in the Light Industrial Area.

In Node C, however, the need to account for the purchase of Receiving Area land based on the value from TDR requires somewhat more substantial bonus densities. For this area, the recommended bonus densities are:

- for duplexes, the bonus density is 1.30. This means that a developer in Node C may construct 2.3 homes of this type for each Development Right secured from the Sending Zone;
- for townhomes, the bonus density is 2.60. This means that a developer in the Receiving Area may construct 3.6 homes of this type for each Development Right secured from the Sending Zone.

In all cases, bonus densities have been established to provide for an estimated 10% to 19% economic incentive of TDR rights transfer over the value of land sale for on-site development to encourage the successful implementation of the TDR program.

***Based on these bonus densities and the analysis above, it appears that the proposed TDR program will effectuate the transfer of all 429.71 development rights in the Sending Zone.***

### **Viability of the Transfer of Development Rights Program**

The above analysis has detailed the specific demand for 429.71 Development Credits that will be generated from the Receiving Zone during the 2013 to 2030 period. The pool of transferable development rights in the Sending Zone is sufficiently large to meet this projected demand for development credits.

This level of residential, commercial, and light industrial demand coupled with the proposed “bonus” development rights will provide sufficient market to support needed sales of Development Rights from the Sending Zone.

***Based on this analysis, we conclude that the proposed Transfer of Development Rights Program is grounded upon sufficient market demand and provides sufficient economic incentive to Development Credit buyers to support the needed sales of 429.71 Development Rights in the Sending Zone during the forecast period (through 2030).***

## **General Information**

### **Purpose of the Market Analysis**

This real estate market analysis has been prepared to support the Transfer of Development Rights (TDR) Element of the Master Plan for Berkeley Township, Ocean County, New Jersey.

Berkeley Township includes three distinct areas – the Pinelands and senior communities, which lie west of the Garden State Parkway; the “eastern mainland,” which stretches from the Parkway to the shores of Barnegat Bay; and the barrier island. The future of the Township west of the Parkway is largely established by the Pinelands Comprehensive Management Plan and existing adult/senior communities of Holiday City and Silver Ridge. The future of the barrier island is likewise established by the presence of the South Seaside Park section of Berkeley, an older built-out seasonal community, and Island Beach State Park.

The eastern mainland between the Parkway and the bay consists of neighborhoods such as Bayville, Berkeley Shores, Holly Lake Park, and Pinewald with long-established development patterns and available infrastructure. Paralleling the Parkway is the Route 9 corridor, the Township’s primary business, retail, and commercial area. Along the bay front are large tracts of wetlands and open space interspersed with existing residential developments. The eastern mainland contains the bulk of the vacant developable land in the Township and is the primary focus of future development and redevelopment proposals.

As identified in the Township’s 2020 Vision Statement, it is the Township’s intention to be proactive about the future of the eastern mainland and to reverse undesirable land use trends. It will achieve this through the adoption of policies that promote four primary targets for future development – Town Center and three commercial nodes – while preserving a substantial portion of the Township as open land. Implementation of the Vision Statement would:

- Retrofit existing strip-type development along the Route 9 corridor into concentrated, mixed-use alternatives;
- Promote in-fill development and efficient use of existing infrastructure;
- Promote a well designed town center as the focus of the Township’s growth;
- Preserve environmentally sensitive coastal resources;
- Maximize circulation and mobility options; and
- Maximize housing opportunities.

Berkeley recently adopted land use and circulation master plan elements that complement and support the development transfer element.

To further these objectives, this TDR Plan Element establishes a Sending Zone that includes 1,973 parcels in 333 different ownerships with 239.722 acres of land in four zoning classifications. Three of these classifications including 1,915 parcels with 232.304 acres provide for residential development of up to 408.1 units:

- 532 parcels totaling 49.891 acres are in the CR Zone. Under current zoning, only one of these parcel groupings can accommodate a conforming lot, yielding 2 units of development. But the potential exists for further lot consolidation, with a maximum buildout of 16.6 housing units;

- 706 parcels totaling 76.137 acres are in the R-400 Zone. Under current zoning, only four of these parcel groupings constitute conforming lots, yielding 12 units of development. But the potential exists for further lot consolidation, with a maximum buildout of 82.9 housing units;
- 677 parcels totaling 106.276 acres are in the R-150 Zone. Under current zoning, 24 of parcels constitute conforming lots, yielding 79 units of development. But the potential exists for further lot consolidation, with a maximum buildout of 308.6 housing units;

The RHB zoning classification includes 58 parcels totaling 7.418 acres and provides for development of up to 96,938 square feet of commercial space. For this TDR program, it is proposed that these commercially-zoned parcels be provided the right to transfer residential development potential to the Receiving Zone at the ratio of one development credit per 15,000 SF of land. This alternative development credit program would result in 21.54 development credits being assigned to these 58 parcels.

Taken together, these 1,973 parcels in the Sending Zone would have an allocation of 429.71 development credits.

The TDR Plan Element further establishes the proposed Receiving Zone to include 248 parcels totaling 218.75 acres in four separate Receiving Areas. Development rights would be transferred to parcels in the Receiving Areas to support the residential and commercial components of mixed-use development in several contexts, as well as the expansion of a light industrial district.

The four Receiving Areas include:

### ***Town Center 1 Phase II***

Berkeley is proposing the development of a Town Center along Route 9 at the gateway to the Township from Beachwood Borough. The proposed Town Center would occur in two phases, with Transfer of Development Rights allowing for greater density on certain parcels in the second phase of development. 16 parcels in six ownerships would be eligible to purchase TDR credits to increase density. These 16 parcels total 118.26 acres of land, but increased density would be permitted on only 52.98 acres. TDR credits would provide for an increase in density from 20 dus/acre to 30 dus/acre on 14.06 acres and from 10 dus/acre to 15 dus/acre on 38.92 acres. This would result in the development of an additional 335 residential units—140 high density units (townhomes, condominiums, or multi-family) and 195 units at medium density (duplexes).

### ***Town Center 2***

A second Town Center Receiving Area (Town Center 2) is proposed for development on vacant parcels surrounding an existing shopping center on the east side of Route 9 just south of the intersection with Korman Road. This Town Center 2 area will accommodate development of 12 new duplex units, 46 townhomes, 100 units of multi-family housing, 140,000 SF of additional retail, and 10,000 SF of additional restaurant space. All of this development would require TDR. The Town Center 2 Receiving Area includes five parcels in one ownership with a total of 30.57 acres including the currently developed shopping center portion of the site.

### ***Light Industrial Area***

A third Receiving Area is an extension of a light industrial area along Hickory Lane, where 194 parcels in 12 ownerships include 39.73 additional acres that can be developed for industrial use at a density of .15 FAR subject to TDR. One credit transfer would be required for each 20,000 SF of additional light industrial development.

### ***Node C***

A fourth Receiving Area is known as Node C and involves more intensive mixed use development of 33 parcels along Route 9 in the vicinity of Harbor Inn Road totaling about 95.47 acres of developable land. The development program for this area includes 300 duplexes, 316 townhomes, and 147,000 SF of commercial space. Based on by-right zoning, current property owners could construct 152,600 SF of commercial space and 92 single-family residential units: five units on 3 acre lots; 61 units on 40,000 SF lots; and 26 units on 20,000 SF lots. (Note: the suggested TDR commercial development program (147,000 SF) is 5,600 SF less than allowed under current zoning. This analysis assumes that owners of commercially zoned property will be allowed to build one additional home by right in lieu of that 5,600 SF of commercial space.) ***Without a detailed development plan for this area, we can reasonably assume that the effective “value-added” of the TDR program is to allow for 300 duplexes and 316 townhomes in lieu of 93 new single family homes on 15,000 SF to three acre lots.***

This real estate market analysis is intended to establish and document land values in the Sending and Receiving Zones, to estimate the land value component of the proposed development in the Receiving Zone under the proposed zoning, and to determine the economic relationship of development rights in the Sending Zone to development rights in the Receiving Zone for various use categories.

***The analysis presented below estimates the relationship in value of (a) the rights to construct 408.17 single-family detached houses in the Sending Zone on 15,000 SF to 3.0 acre lots and to develop commercial space equivalent in value to 21.54 single family homes on 15,000 SF lots with (b) the right to construct up to 1,109 residential units in the Receiving Zone at densities ranging from 6 units per acre to 30 units per acre and to construct up to 260,000 SF of light industrial and 150,000 SF of commercial space in lieu of 93 new single family homes on 15,000 SF to three acre lots.***

## **Definition of Legal and Technical Terms**

The following is a definition list of legal and technical terms used throughout this market analysis:

1. **Base Zoning:** the zoning in place as of one year prior to the municipal enactment of a transfer of development rights ordinance or the zoning in place less than one year prior to the municipal enactment of the transfer of development rights ordinance provided that the zoning was adopted by the municipality for purposes of achieving consistency with a master plan that has received initial or advanced plan endorsement from the State Planning Commission pursuant to N.J.A.C. 5:85-7.1 et seq.
2. **Bonus Density:** in a receiving zone either the amount by which development can exceed base zoning or the right to develop a use not permitted under the base zoning with the use of TDR credits.
3. **Development Right:** an interest in land, less than fee simple absolute title, which enables the owner to develop the land for any purpose allowed by ordinance.
4. **Environmentally Constrained Area:** an area in which development is precluded or significantly limited by existing environmental statutes or regulations.
5. **Market Value Restricted:** the value of a property based on its agricultural, environmental or historical resource and its other remaining property rights, but does not allow the owner to develop the land for any other purpose except as expressly authorized by the transfer of development rights ordinance.
6. **Real Estate Market Analysis or Market Analysis:** the Report required pursuant to Subchapter 2 of N.J.A.C.5:86-1.1 et seq.
7. **Receiving Zone:** an area or areas designated in a master plan and zoning ordinance, adopted pursuant to N.J.S.A. 40:55D-1 et seq., within which development may be increased, and which is otherwise consistent with the provisions of N.J.S.A. 40:55D-145.
8. **Sending Zone:** an area or areas in a master plan and zoning ordinance, adopted pursuant to N.J.S.A. 40:55D-1 et seq., within which development may be restricted and which is otherwise consistent with the provisions of N.J.S.A. 40:55D-144.
9. **TDR Credit:** the development right can be utilized in a receiving zone to achieve the bonus density, the number of TDR credits is determined based on the transfer ratio and the number of development rights being transferred from the sending zone to the receiving zone.
10. **TDR Zoning:** zoning authorized in the receiving zone when TDR credits are utilized or in the sending zone once development credits have been relinquished.
11. **Transferable Development Right:** a unit of development permitted by the base zoning which can be transferred from a property in the sending zone.

**12. Transfer Ratio:** the number of transferable development rights that can be transferred from a sending zone property divided by the additional units of development that can be built on the receiving zone property through the use of TDR credits.

**13. Unit of Development:** an additional right to build on a particular piece of property as determined by zoning ordinance; which may include, but is not limited to acre, square foot, residential unit, floor, height etc.

### **Assumptions and Limitations**

The validity of the real estate market analysis incorporated in this report and the determination in this report of the viability of the Transfer of Development Rights program proposed for Berkeley Township are dependent on a number of assumptions concerning overall economic conditions and policies at the national, state, regional, county, and local level. Most critical among these assumptions are the following:

- that the overall growth of the national economy viewed over a multi-year period remain generally consistent with patterns of the past fifteen years, including periods of rapid growth and periods of stagnation.
- that interest rates and credit availability remain within the ranges of rates seen in the past fifteen years. There has been a considerable development slowdown in the past six years as credit market conditions and excess supply of housing have slowed—or in some case, halted—housing development. This real estate market analysis assumes that this adjustment will be short-term (no longer than two more years) and that monetary conditions will support housing demand in the long-term;
- that this portion of New Jersey will continue to maintain the moderate pace of economic growth that has prevailed during the past fifteen years;
- that New Jersey and Ocean County tax and public services policies will remain consistent relative to other regional counties; and
- that Berkeley Township will remain a location of choice for new housing development through the analysis period.

In addition, this real estate market analysis relies on calculations of buildout potential produced by planners for Berkeley Township, as well as on the completeness of documentation provided by the Township concerning property parcels, development applications and approvals, zoning regulations, infrastructure requirements, and other land configuration and development requirement items.

## **Identification of the Sending and Receiving Zones**

The proposed Sending Zone includes 1,973 parcels in 333 different ownerships with 239.722 acres of land in four zoning classifications (see **Map 1**). Three of these classifications including 1,915 parcels with 232.304 acres provide for residential development of up to 408.1 units:

- 532 parcels totaling 49.891 acres are in the CR Zone. Under current zoning, only one of these parcel groupings can accommodate a conforming lot, yielding 2 units of development. But the potential exists for further lot consolidation, with a maximum buildout of 16.6 housing units;
- 706 parcels totaling 76.137 acres are in the R-400 Zone. Under current zoning, only four of these parcel groupings constitute conforming lots, yielding 12 units of development. But the potential exists for further lot consolidation, with a maximum buildout of 82.9 housing units;
- 677 parcels totaling 106.276 acres are in the R-150 Zone. Under current zoning, 24 of parcels constitute conforming lots, yielding 79 units of development. But the potential exists for further lot consolidation, with a maximum buildout of 308.6 housing units;

The RHB zoning classification includes 58 parcels totaling 7.418 acres and provides for development of up to 96,938 square feet of commercial space. For this TDR program, it is proposed that these commercially-zoned parcels be provided the right to transfer residential development potential to the Receiving Zone at the ratio of one development credit per 15,000 SF of land. This alternative development credit program would result in 21.54 development credits being assigned to these 58 parcels.

Taken together, these 1,973 parcels in the Sending Zone would have an allocation of 429.71 development credits.

The current uses in the Sending Zone are woodlands and open space. **Table 1** identifies the parcels included in the Sending Zone by tax map block & lot number, ownership, zoning, and size.

The proposed Receiving Zone includes 248 parcels totaling 218.75 acres in four separate Receiving Areas. Development rights would be transferred to parcels in the Receiving Areas to support the residential and commercial components of mixed-use development in several contexts, as well as the expansion of a light industrial district.

The four Receiving Areas include:

#### **Town Center I Phase II**

Berkeley is proposing the development of a Town Center along Route 9 at the gateway to the Township from Beachwood Borough. The proposed Town Center would occur in two phases, with Transfer of Development Rights allowing for greater density on certain parcels in the second phase of development. 16 parcels in six ownerships would be eligible to purchase TDR credits to increase density. These 16 parcels total 118.26 acres of land, but increased density would be permitted on only 52.98 acres. TDR credits would provide for an increase in density from 20 dus/acre to 30 dus/acre on 14.06 acres and from 10 dus/acre to 15 dus/acre on 38.92 acres. This would result in the development of an additional 335 residential units—140 high density units (townhomes, condominiums, or multi-family) and 195 units at medium density (duplexes).

## **Town Center 2**

A second Town Center Receiving Area (Town Center 2) is proposed for development on vacant parcels surrounding an existing shopping center on the east side of Route 9 just south of the intersection with Korman Road. This Town Center 2 area will accommodate development of 12 new duplex units, 46 townhomes, 100 units of multi-family housing, 140,000 SF of additional retail, and 10,000 SF of additional restaurant space. All of this development would require TDR. The Town Center 2 Receiving Area includes five parcels in one ownership with a total of 30.57 acres including the currently developed shopping center portion of the site.

## ***Light Industrial Area***

A third Receiving Area is an extension of a light industrial area along Hickory Lane, where 194 parcels in 12 ownerships include 39.73 additional acres that can be developed for industrial use at a density of .15 FAR subject to TDR. One credit transfer would be required for each 18,000 SF of additional light industrial development.

## ***Node C***

A fourth Receiving Area is known as Node C and involves more intensive mixed use development of 33 parcels along Route 9 in the vicinity of Harbor Inn Road totaling about 95.47 acres of developable land. The development program for this area includes 300 duplexes, 316 townhomes, and 147,000 SF of commercial space. Based on by-right zoning, current property owners could construct 152,600 SF of commercial space and 92 single-family residential units: five units on 3 acre lots; 61 units on 40,000 SF lots; and 26 units on 20,000 SF lots. Alternately, the suggested TDR program provides for 147,000 SF of commercial space in lieu of the allowable 152,600 SF; under this approach, owners of RHB zoned land could substitute one residential unit on a 15,000 SF lot for the remaining 5,600 SF of commercial development potential. ***Without a detailed development plan for this area, we can reasonably assume that the effective “value-added” of the TDR program is to allow for 300 duplexes and 316 townhomes in lieu of 93 new single family homes on 15,000 SF to three acre lots.***

**Table 2** identifies the parcels included in the Receiving Zone by tax map block & lot number, ownership, zoning, and size.

## **Sending & Receiving Zone Zoning**

Berkeley Township has modified its zoning to encourage a more compact development program in the Town Center 1 portion of the Receiving Zone along Route 9 at the gateway to the Township from Beachwood Borough. The proposed Town Center 1 would occur in two phases, with Transfer of Development Rights allowing for greater density on certain parcels in the second phase of development. 16 parcels in six ownerships would be eligible to purchase TDR credits to increase density. These 16 parcels total 118.26 acres of land, but increased density would be permitted on only 52.98 acres.

### **Sending Zone**

Zoning in the Sending Zone is described above. More detailed descriptions of these allowable uses and other applicable portions of the Zoning Code for the Township of Berkeley are attached as **Appendix 1**.

### **Receiving Zone**

Zoning in the Receiving Zone includes the Town Center Zone, HB zoning for the Town Center 2 area, Light Industrial for the third Receiving Area, and several zoning categories in the Node C Receiving Area.

#### ***Town Center 1 Phase II***

Town Center zoning on the 52.98 acres of this Receiving Area provides by right for 20 dus/acre on 14.06 acres and 10 dus/acre on 38.92 acres. This would result in the development of 670 residential units by right—280 high density units (townhomes, condominiums, or multi-family) and 390 units at medium density (duplexes).

#### ***Town Center 2***

The Town Center 2 Receiving Area is fully developed under current HB zoning.

#### ***Light Industrial Area***

The third Receiving Area—light industrial—is fully developed under current LI zoning.

#### ***Node C***

Node C includes 33 parcels totaling 95.47 acres of developable land. Five parcels totaling 15.34 acres are zoned CR, with maximum by-right development potential of five residential units on 3 acre lots. One parcel of 12.29 acres is zoned R-200, with maximum by-right development potential of 26 residential units on 20,000 SF lots. 20 parcels totaling 56.16 acres are zoned R-400, with maximum by-right development potential of 61 residential units on 40,000 SF lots. Seven parcels totaling 11.68 acres are zoned RHB with maximum by-right development potential of 152,600 SF of commercial space or, alternately, 147,000 SF of commercial space (as suggested in the TDR program) and one residential unit on a 15,000 SF lot. Assuming use of the alternate approach to the RHB parcels, the total by-right development program for this area includes 93 residential units on lots ranging from 15,000 SF to 3 acres and 147,000 SF of commercial space.

## Community Trends

Berkeley Township grew rapidly between 1960 and 1990, but after 1990 growth slowed. During the 20-year period between 1990 and 2010, population grew by only 10.55% with a population of 41,255 in the 2010 census (see **Table 3**). However, Berkeley's housing stock did grow by nearly 20% during this period. This growth was concentrated in the Eastern Mainland portion of the Township where the 2000 population of 17,631 persons was 44% of the Township total and up 16.9% from 1990.

**Table 3**  
**Berkeley Township Growth 1990-2007**

	1990	2000	2010	Change 1990-2010	% Change 1990-2010
Population	37,319	39,991	41,255	3,936	10.55%
Households	17,614	19,828	20,349	2,735	15.53%
Housing Units	19,873	22,288	23,818	3,945	19.85%

Source: U.S. Census; Urban Partners

As shown on **Table 4**, building permits averaged 186 units per year during the 2000 to 2008 period, bringing another 1,675 units to Berkeley. These 1,675 units are almost exclusively single family home construction (95% of units). New housing construction in Berkeley represents about 6% of the total housing development activity in Ocean County during this period.

**Table 4**  
**Building Permit Activity**

Year	Berkeley Permits Single-Family	Berkeley Permits Multi-Family	Ocean County Permits Single-Family	Ocean County Permits Multi-Family	Berkeley As Percent Of Ocean County Single-Family	Berkeley As Percent Of Ocean County Multi-Family

Source: New Jersey Department of Labor; Urban Partners

The North Jersey Transportation Planning Authority (NJTPA) population projections (March 14, 2005) for Berkeley estimate a 2005 population base of 45,680 in 21,120 households growing to a population of 57,440 in 27,150 households by 2030 (see **Table 5**). With few opportunities for development west of the Parkway and on the barrier island, the Eastern Mainland is presumably where the majority of Township's growth would be accommodated. These NJTPA population forecasts would suggest sufficient demand to accommodate 6,760 new housing units in Berkeley between 2005 and 2030.

The U.S. Census 2010 population data and the building permit data above, however, suggest that growth in the 2000 to 2010 period has been well below these forecasts.

**Table 5****Berkeley Growth Forecasts--NJTPA Base & Adjustments**

Year	Berkeley Population Forecast (NJTPA)	Estimated Berkeley Households (NJTPA)	Estimated Berkeley Housing Units (NJTPA)	5-Year Berkeley Housing Unit Growth Needed For NJTPA	Berkeley Population Forecast (2010 Census As Base)	Estimated Berkeley Maximum Housing Unit Buildout
2005	45,680	21,120	23,650			
2010	46,870	21,800	24,420	770	41,255	168
2015	48,630	22,780	25,510	1,090

2025	54,340	25,740	28,830	1,740		
2030	57,440	27,150	30,410	1,580		
Total				6,760		

Source: New Jersey TPA; U.S. Census; Urban Partners

A build-out analysis conducted for the Township's land use element identified approximately 1,900 residentially-zoned acres as "vacant and unconstrained" and available for development of 2,800 new dwelling units. These units are in addition to any redevelopment in the proposed Town Center 1. Nearly 400 units are on sites in the proposed Sending Zone, while almost 100 are situated in "Node C." This leaves approximately 2,300 potential dwelling units that could be constructed beyond the development proposed in the Town Centers and Node C under the Transfer of Development Rights program.

A reassessment of development potential and environmental constraints, however, suggests that as many as 1,300 of these units may never be developed. With these adjustments, we now estimate that full build-out of Berkeley Township will result in an additional 3,650 housing units after 2010 and before 2030 (see **Table 6**). Development plans for the Town Centers and Node C identify potential for 2,400 of these units; the remaining 1,248 are anticipated to occur at other sites, including 248 duplexes currently approved in the Hickory Estates development. Expected Berkeley Township population at full buildout in 2030 is 49,740 residing in 24,525 households.

**Table 6****Berkeley Growth Forecasts**

Year	Berkeley Population Forecast	Estimated Berkeley Households	Estimated Berkeley Housing Units	5-Year Berkeley Housing Unit Growth	Town Centers Node C	Other
2010	41,255	20,349	23,818			
2015	44,290	21,845	24,465	647		
2020	46,110	22,740	25,465	1,000		
2025	47,920	23,630	26,465	1,000		
2030	49,740	24,525	27,465	1,000		
				3,647	2,399	1,248

Source: New Jersey TPA; U.S. Census; Berkeley Township; Urban Partners

The population growth detailed above will support modest, but sustained demand for additional housing units in the range of 200 units annually. The policy focus on Town Center development suggests that larger portions of this demand will be targeted to somewhat more densely developed housing units—duplexes, townhomes, and multi-family condominium and apartment structures. We estimate that approximately 60% of incremental housing demand in Berkeley will be for this more compact product (see **Table 7**).

**Table 7**  
**Berkeley Housing Buildout Forecast**

Year	Berkeley Estimated/ Forecasted Population	Berkeley Total Housing Absorption	Berkeley SFR Housing Absorption	Berkeley Duplex/Townhome Multi-Family Housing Absorption

Source: U. S. Census, NJTPA, Urban Partners

**Table 8** details the anticipated allocation of this housing unit growth among various geographic areas of Berkeley. The TDR program will absorb 1,109 units of this total incremental development of 3,650 units. Non-TDR related development within Town Center 1 Phase 2 is anticipated to capture another 670 units. Other Town Center 1 sites will capture 620 housing units. The remaining 1,248 units are expected to be developed on other sites within the Township, including 248 duplexes at Hickory Estates and 1,000 single-family detached units scattered at other sites throughout the Township.

**Table 8**  
**Berkeley Housing Buildout By Area**

	Total Housing Absorption	SFR Housing Absorption	Duplex/Townhome Multi-Family Housing Absorption
Other Sites	1,248	1,000	248
Other Town Center 1 Sites	620	470	150
Receiving Areas Non-TDR	670		670
Receiving Areas TDR Based	1,109		1,109
Total	3,647	1,470	2,177

Source: Urban Partners

## **Receiving Zone Analysis**

The proposed Receiving Zone includes 248 parcels totaling 218.75 acres in four separate Receiving Areas. Development rights would be transferred to parcels in the Receiving Areas to support the residential components of mixed-use development in several contexts, as well as the expansion of a light industrial district. The four Receiving Areas include:

### **Town Center 1 Phase II**

Berkeley is proposing the development of a Town Center along Route 9 at the gateway to the Township from Beachwood Borough. The proposed Town Center would occur in two phases, with Transfer of Development Rights allowing for greater density on certain parcels in the second phase of development. 16 parcels in six ownerships would be eligible to purchase TDR credits to increase density. These 16 parcels total 118.26 acres of land, but increased density would be permitted on only 52.98 acres. TDR credits would provide for an increase in density from 20 dus/acre to 30 dus/acre on 14.06 acres and from 10 dus/acre to 15 dus/acre on 38.92 acres. This would result in the development of an additional 335 residential units—140 high density units (townhomes, condominiums, or multi-family) and 195 units at medium density (duplexes).

### **Town Center 2**

A second Town Center Receiving Area (Town Center 2) is proposed for development on vacant parcels surrounding an existing shopping center on the east side of Route 9 just south of the intersection with Korman Road. This Town Center 2 area will accommodate development of 12 new duplex units, 46 townhomes, 100 units of multi-family housing, 140,000 SF of additional retail, and 10,000 SF of additional restaurant space. All of this development would require TDR. The Town Center 2 Receiving Area includes five parcels in one ownership with a total of 30.57 acres including the currently developed shopping center portion of the site.

### **Light Industrial Area**

A third Receiving Area is an extension of a light industrial area along Hickory Lane, where 194 parcels in 12 ownerships include 39.73 additional acres that can be developed for industrial use at a density of .15 FAR subject to TDR. One credit transfer would be required for each 18,000 SF of additional light industrial development.

### **Node C**

A fourth Receiving Area is known as Node C and involves more intensive mixed use development of 33 parcels along Route 9 in the vicinity of Harbor Inn Road totaling about 95.47 acres of developable land. The development program for this area includes 300 duplexes, 316 townhomes, and 147,000 SF of commercial space. Based on by-right zoning, current property owners could construct 147,000 SF of commercial space and 93 single-family residential units: five units on 3 acre lots; 61 units on 40,000 SF lots; 26 units on 20,000 SF lots; and one unit on a 15,000 SF lot. *Without a detailed development plan for this area, we can reasonably assume that the effective “value-added” of the TDR program is to allow for 300 duplexes and 316 townhomes in lieu of 93 new single family homes on 15,000 SF to three acre lots.*

*The analysis presented below estimates the relationship in value of (a) the rights to construct 408.17 single-family detached houses in the Sending Zone on 15,000 SF to 3.0 acre lots and to develop commercial space equivalent in value to 21.54 single family homes on 15,000 SF lots with (b) the right to construct up to 1,109 residential units in the Receiving Zone at densities ranging from 6 units per acre to 30 units per acre and to construct up to 260,000 SF of light industrial and 150,000 SF of commercial space in lieu of 93 new single family homes on 15,000 SF to three acre lots.*

Taken together, the effective “value-added” of the full TDR program appears to *allow for 507 duplexes, 502 townhomes or condominiums, 100 multi-family housing units, 260,000 SF of light industrial, and 150,000 SF of commercial development in lieu of 93 new single family homes on 15,000 SF to three acre lots.*

Terrain in the Receiving Zone is flat and the buildout estimates have been adjusted for environmentally sensitive areas. The Zoning Code of the Township of Berkeley, NJ was adopted in xxxxxxxxxxxxxxxxx

### **Recent Subdivision and Site Plan Activity**

**Table 9** provides a list of all subdivision and site plan applications that have been submitted to the Township for land in the Receiving Zone since January 1, 2007, and describes the action taken by the Township on these applications.

**Table 9**  
**Berkeley Subdivision & Site Plan Applications in TDR Receiving Zone**

### **Recent Sales Activity**

In the past four years there have been six recorded sales transactions in the Receiving Zone (see **Table 10**). Two transactions involved light industrial vacant land; one may not have been arms-length. The sales prices suggest a value of \$25,000 to \$30,000 per acre or about \$4 per built SF of industrial space. Three commercial properties—one each in Node C, Town Center 1 Phase II, and the Light Industrial Area sold for \$300,000, \$800,000, and \$850,000. The sale in TC 1 does not impact valuation for TDR purposes, since the increment of development under TDR is in addition to underlying zoning. The Node C and Light Industrial Area sales appear to be largely based on the value of the commercial buildings. One 3.44 acre two-parcel assemblage of vacant land in Node C sold for \$550,000. Based on current zoning this assemblage could support 45,000 SF of commercial development; under the proposed alternative of R-150 housing development, the site could support 9 to 10 units. This suggests land values of \$10 to \$15 per built SF of commercial space or \$55,000 to \$60,000 per building lot.

**Table 10**  
**Recent Sales Transactions In Receiving Zone**

## **Development Potential for Receiving Zone Property**

Development forces influencing the Berkeley Receiving Zone will derive from the overall demand for new housing and commercial services in the Berkeley area (noted above as requiring 3,650 new housing units over the next two decades) and from the public policy of encouraging such growth to locate within more compact, mixed-use locations. The expectation is that approximately 65% to 70% of the new housing development in Berkeley during the next two decades will concentrate in these Receiving Areas and the adjacent Town Center 1, Phase I. This will be due both to TDR and to the opportunities provided and encouraged through Town Center development policies and zoning.

***These factors strongly suggest that the redevelopment and intensification of development planned for the designated locations along the Route 9 corridor is the highest and best use for land within the Receiving Zone.***

Uses facilitated by TDR for this Receiving Zone under the proposed Transfer of Development Rights program include:

- 150,000 SF of commercial space;
- 260,000 SF of light industrial space;
- 507 duplexes;
- 502 townhomes or condominiums; and
- 100 units of multi-family housing.

These uses will occur in lieu of 93 new homes on 15,000 SF to three acre lots.

As noted above, the projected overall housing demand for Berkeley Township through 2030 anticipates 3,650 additional housing units. Within this forecast there is sufficient capacity for residential development in the Receiving Zone of the 1,109 housing units to be supported by TDR as well as the 1,290 additional units proposed to be developed by-right under new Town Center and underlying Node C zoning.

***Based on this analysis and assuming the population growth forecasts for Berkeley referenced above, there appears to be sufficient residential demand to absorb 2,399 residential units in the Receiving Zone during the 2011 through 2030 period, including the 1,109 units to be facilitated through TDR.***

## Sending Zone Analysis

As noted above, the proposed Sending Zone includes 1,973 parcels (see **Map 1**). These parcels--located throughout the Eastern Mainland portion of the Township predominantly in agricultural, open space, or undeveloped commercial areas--range in size from 0.003 to 9.807 acres and include a total of 239.722 acres. These 1,973 parcels are in 333 different ownerships in four zoning classifications. Three of these classifications including 1,915 parcels with 232.304 acres provide for residential development of up to 408.1 units:

- 532 parcels totaling 49.891 acres are in the CR Zone. Under current zoning, only one of these parcel groupings can accommodate a conforming lot, yielding 2 units of development. But the potential exists for further lot consolidation, with a maximum buildout of 16.6 housing units;
- 706 parcels totaling 76.137 acres are in the R-400 Zone. Under current zoning, only four of these parcel groupings constitute conforming lots, yielding 12 units of development. But the potential exists for further lot consolidation, with a maximum buildout of 82.9 housing units;
- 677 parcels totaling 106.276 acres are in the R-150 Zone. Under current zoning, 24 of parcels constitute conforming lots, yielding 79 units of development. But the potential exists for further lot consolidation, with a maximum buildout of 308.6 housing units;

The RHB zoning classification includes 58 parcels totaling 7.418 acres and provides for development of up to 96,938 square feet of commercial space. For this TDR program, it is proposed that these commercially-zoned parcels be provided the right to transfer residential development potential to the Receiving Zone at the ratio of one development credit per 15,000 SF of land. This alternative development credit program would result in 21.54 development credits being assigned to these 58 parcels.

The proposed Transfer of Development Rights program will provide for each parcel transferable development rights equal to the nearest one-hundredth of a whole number of on-site development rights. Similarly, development credits are allocated to the commercially zoned land in the Sending Zone at the rate of 1 credit per 15,000 SF of land. Applying this formula to the 1,973 parcels results in **429.71 transferable development rights as shown on Table 11**.

**Table 11--Part 1**  
**Development Credits Allocation**

## **Recent Subdivision and Site Plan Activity**

**Table 12** provides a list of all subdivision and site plan applications that have been submitted to the Township for land in the Sending Zone since January 1, 2007, and describes the action taken by the Township on these applications.

**Table 12**  
**Berkeley Township—Sending Zone Subdivision & Site Plan Applications**

## **Recent Sales Activity**

In the past four years, we have identified 19 arms-length recorded sales transactions in the Sending Zone (see **Table 13**). 16 of these sales involve vacant land: three parcels zoned RHB, two zoned R400, and eleven zoned R150. Four of these sales appear to be purchases of conforming lots by home builders or potential homeowners. These four sales were priced in the range of \$54,900 to \$80,000. One half-acre RHB-zoned property sold for \$70,000. The remaining vacant parcels sold for an average of \$29,400 per acre, with most prices ranging from \$25,000 per acre to \$45,000 per acre.

**Table 13**

## **Development Potential for Sending Zone Property**

As noted above, based on current zoning and development characteristics of the 1,973 Sending Zone parcels, the total potential buildup of the 1,915 parcels zoned residentially is 408 units, while the 58 parcels zoned RHB could support 96,938 square feet of commercial space or, alternately, another 21 residential units.

Also, as noted above in Community Trends, Berkeley Township anticipates demand for 3,647 new housing units in the next two decades. In the absence of the Transfer of Development Rights program, growth forecasts suggest that 429 units of demand will be absorbed by these Sending Area parcels.

*These factors suggest that based on current zoning and assuming the population growth forecasts for Berkeley Township referenced above, there appears to be sufficient residential demand to absorb all 429 potential residential units in the residentially-zoned portion of the Sending Zone during the 2011 through 2030 period. These factors strongly suggest that gradual evolution from the current pattern of scattered open space and forest use to lower density residential development is the highest and best use for land within the Sending Zone.*

## Sending Zone Land Values Under Current Zoning

The cooling of the residential development market in the past few years has reduced the available information for accurately approximating land values for various residential types in Berkeley. Most newly constructed homes in the Eastern Mainland are in the 2,200 SF to 3,500 SF range on lots of one-quarter to one-half acre and selling in the \$300,000 to \$400,000 range, with a few priced up to \$500,000. There have been a few resales from homeowner to homeowner of homes on larger lots (over one-half acre), but the homes on these larger lots also tend to be in this same size and price range.

There is a second less-active new home market for homes in the 1,500 to 1,900 SF range on lots of 5,000 SF to 8,000 SF and selling for \$225,000 to \$275,000.

Sales of vacant lots again are few, but appear to cluster in three price ranges. There are a few sales that appear to involve approved and improved lots of approximately .35 acres ready for development in R150 zones. These recorded transactions include one sale of 11 improved lots from one developer to another for \$1,595,000. These sales are priced in the range of \$130,000 to \$150,000 per lot and result in homes being constructed for sale in the \$375,000 to \$425,000 range.

A second group includes sales of land without approvals, presumably as part of land assembly efforts or land investment. These sales are in the range of \$10,000 to \$20,000 per potential lot, in some case up to \$30,000 per potentially developable lot.

The third group, and the collection of sales with greatest applicability to this TDR analysis, are sales in the range of \$55,000 to \$95,000 per developable lot. At this price point, these properties appear to be approved for development, but unimproved. These sales are typically for land zoned R125 and R150. We observed 19 sales in the past four years that appear to fit this profile with an average price of \$70,000 to \$75,000 per developable lot.

There have been only 38 sales of existing homes in the Eastern Mainland in the past twelve years where the lot is between one acre and five acres in size and only two of these involved a lot of three acres or more. The homes developed on these lots are generally in the same size range as those on the one-quarter to one-half acre lots, although there were two homes in the 4,000 SF to 5,000 SF range sold. The prices for homes on these larger lots appear to be somewhat higher than for the same size home on a smaller lot. More critically, the market for homes built on these larger lots appears to be quite thin.

With the available data, we believe the appropriate assumption for TDR analysis is that the value of the typical developable lot in the Sending Zone is priced in the range of \$60,000 to \$85,000, at 2012 pricing. This would be for an approved, but not improved, lot. For analysis purposes, we would place the value of a lot zoned R150 or utilizing 15,000 SF lot size as an alternate to RHB zoning in the lower part of this range (\$60,000 to \$75,000) and a lot zoned R400 or CR in the higher portion of the range (\$70,000 to \$85,000).

## **Sending Zone Land Values After Transfer of Development Rights**

After transfer of development rights, land in the Sending Zone would have minimal residual value, especially given the fragmentation of the parcels. The most likely use is as additions to adjacent residential lots or as public open space. The most modest sales prices for vacant lots recorded in the past two years have been in the range of \$5,000 to \$10,000 per acre.

For this analysis, and accepting the very great variation that may exist with regard to the values of these individual parcels in the Sending Zone, we place the *value of property post TDR at \$5,000 to \$10,000 per acre, in 2012 pricing.*

## **Transferable Development Rights Value**

The very small size of many of the Sending Zone parcels and the great diversity of ownership makes it difficult to estimate the specific value of transferable development rights for specific parcels. However, for purposes of this analysis, we will develop an estimated average valuation for a development right in the Sending Zone based on these factors:

- the value of a developable lot zoned R150 or its RHB alternative equivalent in the Sending Zone at 2012 pricing is \$60,000 to \$75,000.
- the value of a developable lot zoned R400 or CR in the Sending Zone at 2012 pricing is \$70,000 to \$85,000.
- the average value of residual land is estimated at \$5,000 to \$10,000 per acre, or \$2,000 to \$4,000 per average R150 lot, \$5,000 to \$10,000 per R400 lot, and \$15,000 to \$30,000 per CR lot.
- 76.83% of development rights will be allocated to parcels zoned R150 or its RHB equivalent.

Based on these factors, *the pricing of most transferable development rights (R150 parcels or the RHB equivalent) are likely to be in the \$55,000 to \$70,000 per right range, at 2012 pricing.* Rights associated with R400 and CR zoning may be priced slightly higher in the \$60,000 to \$75,000 range. This variation, however, is not substantial enough to impact the current analysis. These prices are for rights purchases completed after development approval has been achieved for the Receiving Zone parcel.

## **Receiving Zone Land Values Under Current Zoning**

For purposes of establishing TDR credit relationships, the Receiving Zone essentially functions as two separate areas: (1) the Town Center 1 Phase II, Town Center 2, and Light Industrial Areas where there is no loss of by-right development capacity to participate in TDR; and (2) Node C, where adjustments must be made for current by-right development potential.

For the TC 1 Phase II, TC 2, and Light Industrial Receiving Areas, the current land values for TDR development are negligible since all TDR development is in addition to by-right development. For Node C, the effective Receiving Area land values are determined by the typical value of the 93 developable SFR lots for which TDR development will be substituted.

Recent sales of new homes by developers in Berkeley are detailed on **Table 14**. 85% of sales involve homes selling in the \$275,000 to \$490,000 range on one-quarter to one-half acre lots. Typical home size is 2,200 SF to 3,500 SF. This is the typical development pattern likely under existing zoning for 48 of the 93 lots in the Node C Receiving Area. As noted above, the pricing of a developable lot for this type of development could be expected to be in the \$60,000 to \$75,000 range.

The remaining 45 lots in Node C are in the R400 or CR categories. As also noted above, development activity in this parcel size has been very limited in recent years in Berkeley, but the pricing for a developable lot for this type of development could be expected to be in the \$70,000 to \$85,000 range at 2012 pricing.

**Table 14**

## **Receiving Zone Land Values After Transfer of Development Rights**

For purposes of establishing after TDR Receiving Zone land values we need to consider the proposed TDR supported development in terms of the range of uses being facilitated by TDR:

- 150,000 SF of commercial space;
- 260,000 SF of light industrial space;
- 507 duplexes;
- 502 townhomes or condominiums; and
- 100 units of multi-family housing.

**Commercial Space Land Value:** We have identified four sales in the past seven years of commercially-zoned vacant land with a Route 9 address. Sales prices for these parcels range from \$160,000 per acre to \$313,000 per acre, with an average of \$260,000 per acre. These prices suggest that land value for commercial development is in the range of \$20 to \$30 per potential built SF, with higher values likely to prevail at Town Center 2 with the existing infrastructure and anchor development.

**Light Industrial Space Land Value:** As noted above, recent sales of land in the LI zone suggest that land value is approximately \$4 per buildable SF.

**Townhomes:** Recent resales of townhome condominiums show a typical product of 1,200 SF to 1,900 SF selling in the range of \$175,000 to \$340,000, or \$130 to \$215 per square foot. The higher priced units include a garage. We would expect new product built in the Receiving Areas to be priced in the \$250,000 to \$340,000 range, or \$180 to \$215 per square foot. Land values for this type of development would typically be 35-40% of the value of a one-quarter to one-half acre lot for development of a larger single-family detached home, or \$25,000 to \$30,000 per unit.

**Duplexes:** There is little experience with duplex homes in Berkeley. Typically, these home types result in construction of 1,800 to 2,500 SF homes likely to sell in the \$300,000 to \$375,000 range in the Berkeley market. Land values for this type of development would typically be 55-60% of the value of a one-quarter to one-half acre lot for development of a somewhat larger single-family detached home, or \$35,000 to \$45,000 per unit.

**Multi-family:** The proposed multi-family units would typically be in the 1,000 SF to 1,600 SF range and support land values of 20-30% of the value of a one-quarter to one-half acre lot for development of a larger single-family detached home, or \$15,000 to \$20,000 per unit.

These prices are for evaluation of larger collections of lots, not for sales of single lots. These prices assume a sale after development approvals but with the buyer expending funds beyond the cost of property acquisition in order to achieve these development approvals. Sales of individual lots after subdivision may command higher prices, but are not likely to participate in the TDR program.

## **Development Credit Requirements, Bonus, and Affordability To Facilitate Transfer of Development Rights**

In this section, we apply the factors discussed above to each portion of the Receiving Zone.

For the Town Center 1 Phase II, Town Center 2, and Light Industrial areas, TDR-based development is in addition to by-right development; therefore, developers can anticipate utilizing all of their available land purchase budgets to secure development credits from the Sending Zone.

In Town Center 1 Phase II, this amounts to an estimated \$7.8 million for duplex units and \$3.85 million for townhomes or condominium (see **Table 15**). These developers, however, have no on-site housing development rights and, therefore, must purchase from the Sending Zone, the right to construct all 195 duplexes and 140 townhomes.

**Table 15**  
**Development Credit Requirements**  
**Receiving Zone**

Receiving Area	Development Type	Land Value of Development	Receiving Area Land Cost	Available For Development Credit Purchase	Required Development Credits	Receiving Area Development Credits By Right	Development Credit Shortfall
Town Center 1 Phase II	Duplex (195)	\$7,800,000	\$0	\$7,800,000	195	0	195
	Townhome (140)	\$3,850,000	\$0	\$3,850,000	140	0	140
Town Center 2	Duplex (12)	\$480,000	\$0	\$480,000	12	0	12
	Townhome (46)	\$1,265,000	\$0	\$1,265,000	46	0	46
	Multi-Family (100)	\$1,750,000	\$0	\$1,750,000	100	0	100
	Commercial (150,000 SF)	\$4,500,000	\$0	\$4,500,000	65	0	65
Light Industrial	Industrial (260,000 SF)	\$1,040,000	\$0	\$1,040,000	14	0	14
Node C	Duplex (300)	\$12,000,000	\$3,626,005	\$8,373,995	300	48	252
	Townhome (316)	\$8,690,000	\$2,876,495	\$5,813,505	316	45	271
Total		\$41,375,000	\$6,502,500	\$34,872,500	1,188	93	1,095

Source: Urban Partners

In Town Center 2, this amounts to an estimated \$480,000 for duplex units, \$1.265 million for townhomes, and \$1.75 million for the 100 multi-family units. These developers, however, have no on-site housing development rights and, therefore, must purchase from the Sending Zone, the right to construct all 12 duplexes, 46 townhomes, and 100 multi-family units.

In addition, we are assuming that commercial development under TDR will be allowed at the rate of 2,300 SF of commercial space for each development credit. This means that developers will need to purchase 65 development credits to facilitate the addition of 150,000 SF of

commercial space in this Town Center 2. At an estimated land value of \$30 per built square foot, developers will have \$4.5 million available to purchase these 65 development credits.

In the Light Industrial area, we are assuming that light industrial development under TDR will be allowed at the rate of 18,000 SF of light industrial space for each development credit. This means that developers will need to purchase 14 development credits to facilitate the addition of 260,000 SF of industrial space in this area. At an estimated land value of \$4 per built square foot, developers will have \$2.04 million available to purchase these 14 development credits.

For Node C, circumstances are more complicated since developers can complete some development by-right, but must also factor in the cost of land acquisition in the Receiving Area. As shown on Table 15, we estimate the land value of development of 300 duplexes at \$12 million, while the land value of development of 316 townhomes is \$8.69 million. Based on underlying by-right zoning, we estimate the cost of this land in the Receiving Area at \$6.502 million, leaving \$14.187 million available for purchase of development rights. Underlying zoning will permit the development of 93 housing units, leaving a requirement for purchase of 523 development credits to complete the development of the proposed 616 units.

In total, we estimate that the total potential development programmed for the Receiving Areas can support \$41.375 million of land purchase value at 2012 pricing. We also estimate that the cost of securing control of these Receiving Areas for the purpose of developing the identified TDR program will cost approximately \$6.502 million at 2012 prices. ***This leaves approximately \$34.872 million available to purchase development rights from the Sending Zone.***

The potential to use this \$34.872 million in excess land purchase potential to purchase Development Rights in the Sending Zone is detailed on **Table 16**.

**Table 16**  
**Development Credit Bonus & Affordability**  
**Receiving Zone**

Receiving Area	Development Type	Development Credit Shortfall	Development Credit Bonus Ratio	Bonus Development Credits	Development Credits Needed From Sending Zone	Sending Zone Development Cost	Available For Development Credit Purchase	Funds Available For Credit Purchase As Percentage of Credit Cost
Town Center 1 Phase II	Duplex (195)	195	0.80	87	108	\$7,041,667	\$7,800,000	110.77%
	Townhome (140)	140	1.60	86	54	\$3,500,000	\$3,850,000	110.00%
Town Center 2	Duplex (12)	12	0.80	5	7	\$433,333	\$480,000	110.77%
	Townhome (46)	46	1.60	28	18	\$1,150,000	\$1,265,000	110.00%
	Multi-Family (100)	100	3.10	76	24	\$1,585,366	\$1,750,000	110.38%
	Commercial (150,000 SF)	65	0.00	0	65	\$4,225,000	\$4,500,000	106.51%
Light Industrial	Industrial (260,000 SF)	14	0.00	0	14	\$910,000	\$1,040,000	114.29%
Node C	Duplex (300)	252	1.30	142	110	\$7,121,739	\$8,375,000	117.60%
	Townhome (316)	271	2.60	196	75	\$4,893,056	\$5,812,500	118.79%
Total		1,095		620	475	\$30,860,161	\$34,872,500	

Source: Urban Partners

Bonus density is typically used to incentivize the transfer of development rights. Given the varying development circumstances between Node C and the other Receiving Areas, these bonus densities will need to vary somewhat. Other than Node C, the necessary bonus densities are the following:

- for duplexes, the bonus density is 0.80. This means that a developer in the Receiving Zone may construct 1.8 homes of this type for each Development Right secured from the Sending Zone;
- for townhomes, the bonus density is 1.60. This means that a developer in the Receiving Zone may construct 2.6 homes of this type for each Development Right secured from the Sending Zone;
- for multi-family housing, the bonus density is 3.10. This means that a developer in the Receiving Zone may construct 4.1 units of this housing type for each Development Right secured from the Sending Zone;
- for Commercial and Industrial development, there is no bonus density, as the necessary value relationships have already been incorporated in the ratios chosen for square feet of development allowed per development credit.

In Node C, however, the need to account for the purchase of Receiving Area land based on the value from TDR requires somewhat more substantial bonus densities. For this area, the recommended bonus densities are:

- for duplexes, the bonus density is 1.30. This means that a developer in Node C may construct 2.3 homes of this type for each Development Right secured from the Sending Zone;
- for townhomes, the bonus density is 2.60. This means that a developer in the Receiving Area may construct 3.6 homes of this type for each Development Right secured from the Sending Zone.

In all cases, bonus densities have been established to provide for an estimated 10% to 19% economic incentive of TDR rights transfer over the value of land sale for on-site development to encourage the successful implementation of the TDR program.

***Based on these bonus densities and the analysis above, it appears that the proposed TDR program will effectuate the transfer of all 429.71 development rights in the Sending Zone.***

## **Viability of the Transfer of Development Rights Program**

### **Impact of Infrastructure and COAH Costs on Potential Development Rights Transfer**

The Capital Improvement Program and Utility Service Plan necessary to support the proposed development program in the Receiving Zone have been tentatively structured to impose only modest costs on Receiving Zone developers. The estimated cost allocation to developers is:

• Town Center 1, Phase II	\$822,000
• Town Center 2	\$545,000
• Light Industrial Area	\$125,000
• Node C	\$585,000.

These costs are in addition to typical water and sewer fees.

These modest costs reflect the location of Receiving Areas in portions of the Township with substantial in-place infrastructure.

*Therefore, for purposes of this real estate market analysis and the determination of viability of the Transfer of Development Rights program, we assume that these infrastructure costs for roadways, utilities, and site preparation will be allocated to Receiving Area developments at levels equivalent to or less than similar infrastructure costs elsewhere in Berkeley for each proposed development type.*

Current COAH requirements in Berkeley are contributions based on .... .... There is no proposed change in the level or structure of developer COAH obligations under the Transfer of Development Rights program from current requirements. Therefore, *for purposes of this real estate market analysis and the determination of viability of the Transfer of Development Rights program, we assume that the costs of providing affordable housing under COAH requirements will be identical to those under current conditions and that these costs have been already incorporated in land pricing.*

### **Effect of Other Impact Fees**

The only existing impact fees in Berkeley Township involve..... These requirements will be applied equivalently in the Sending and Receiving Zones as well as elsewhere in the Township. Therefore, *the relative applicability of existing impact fees will have no impact on the valuation of land in the Sending and Receiving Zones or on the viability of the Transfer of Development Rights program.*

## **Market Conditions Assumptions**

The validity of the real estate market analysis incorporated in this report and the determination in this report of the viability of the Transfer of Development Rights program proposed for Berkeley Township are dependent on a number of assumptions concerning overall economic conditions and policies at the national, state, regional, county, and local level. Most critical among these assumptions are the following:

- that the overall growth of the national economy viewed over a multi-year period remain generally consistent with patterns of the past fifteen years, including periods of rapid growth and periods of stagnation.
- that interest rates and credit availability remain within the ranges of rates seen in the past fifteen years. There has been a considerable development slowdown in the past six years as credit market conditions and excess supply of housing have slowed—or in some case, halted—housing development. This real estate market analysis assumes that this adjustment will be short-term (no longer than two more years) and that monetary conditions will support housing demand in the long-term;
- that this portion of Ocean County will continue to maintain the moderate pace of economic growth that has prevailed during the past fifteen years;
- that New Jersey and Ocean County tax and public services policies will remain consistent relative to other regional counties; and
- that Berkeley Township will remain a location of choice for new housing development through the analysis period.

Based on the maintenance of these policies and conditions, the underlying housing development demand forecasted in this analysis should provide the market forces necessary to facilitate the proposed Transfer of Development Rights program and ***achieve a full utilization of maximum available transferable development rights in the Sending Zone in the 20-year analysis period.***

Specific economic relationships among different housing types and land uses can change over the proposed twenty year buildout period forecasted here. These could occur due to the evolution of desired housing types, changes in technology, increases in energy costs, etc. These slowly-evolving consumer and production trends can and should be monitored. If necessary, ***economic relationships incorporated in the Transfer of Development Rights element (the specific multiples applied to Sending Zone parcels; the relative allocation of land within the Receiving Zone among different land uses, etc.) can and should be adjusted based on any such changes in consumer behavior or production technology.***

## **Viability of the Transfer of Development Rights Program**

The above analysis has detailed the specific demand for 429.71 Development Credits that will be generated from the Receiving Zone during the 2013 to 2030 period. The pool of transferable development rights in the Sending Zone is sufficiently large to meet this projected demand for development credits.

This level of residential, commercial, and light industrial demand coupled with the proposed “bonus” development rights will provide sufficient market to support needed sales of Development Rights from the Sending Zone.

***Based on this analysis, we conclude that the proposed Transfer of Development Rights Program is grounded upon sufficient market demand and provides sufficient economic incentive to Development Credit buyers to support the needed sales of 429.71 Development Rights in the Sending Zone during the forecast period (through 2030).***
