NOTES:

¹ For residences, use the R-100 requirements.

² On all lots, such as those one block deep, in which the rear yard fronts on a street, the rear yard setback distance of the building shall be the same as the front yard setback required in that zone.

³ Twenty feet if used for a loading area.

⁴ For lots with an existing principal building, the side yard and rear yard setbacks for accessory buildings are reduced to 15 feet and 40 feet for corner lots.

⁵ For waterfront lots, rear yard setback is 25 feet for the principal building and 15 feet for accessory buildings and structures, as measured from the outbound face of the bulkhead.

⁶ Detached accessory buildings have a height limitation of 16 feet in all zones, as defined in § 335-15.

⁷ No waterfront setback required.

⁸ For existing single-family residential dwellings located in the O-C Zone, the minimum building setbacks on front, side and rear, for both principal and accessory structures shall be the same as for the R-75 Zone.
