

May 2020 Maker Project #8 Supply List

This week, we are making fossils impressions! The best part is collecting interesting things outside to press into dough - pine cones, leaves, shells, grasses. Anything you find could make a neat fossil impression!

Choose a dough recipe that works for you- we'll make dough as part of our project.

For a simple coffee dough (makes a brown, textured dough):

1 cup wet coffee grounds

1/2 cup cold coffee

1 cup flour

1/2 cup salt

For a salt dough (no coffee):

1 cup flour

1/2 cup salt

1/2 cup water

We'll do our dough air dried, but you could also bake your fossils dry In the oven (250 degrees for 2 hours).
