

FY 2025 TRANSPORTATION CAPITAL PROGRAM

New Jersey Department of Transportation Projects

Camden County

Program/Project Name	Project ID Numbers: D2403 / 243340
Camden County LINK Trail	

This project will construct a 12' wide paved, all ages and abilities shared-use path which will act as the centerpiece of the County's eventual 550 mile bicycle and trail network. The LINK will begin at the recently completed Benjamin Franklin Bridge bicycle/pedestrian ramp in the City of Camden, extend through 16 suburban municipalities, and end in the Winslow Wildlife Management Area at the Gloucester County line. The proposed trail, which is intended for both transportation and recreational use, will provide an economic stimulus to Camden County; will connect dense and diverse populations to numerous communities, businesses, employment opportunities, parks and open spaces; and will bisect the urban, suburban, and rural transect of the county.

FY 2025 TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects
Camden County

Program/Project Name	Project ID Numbers: D1709 / 174000
Kaighn Avenue (CR 607), Bridge over Cooper River (Roadway and Bridge Improvements)	

The project will make roadway improvements to Kaighn Ave. (CR 607) from Euclid St. to North Park Dr. (CR 628) and include complete bridge replacement of the Kaighn Ave. Bridge. These improvements will decrease travel time, alleviate flooding, reduce annual maintenance costs and provide for a multi-modal connection to The Circuit, Greater Philadelphia's Regional Trail Network.

Kaighn Avenue is a heavily traveled regionally significant corridor that transects the Parkside Neighborhood of Camden City and is prone to tidal flooding and plagued by road closings during regular rainfall and high tide events. Flooding is the result of a 40 year old hurricane event that breached a nearby earthen dam and subsequently allows the Cooper River to inundate a low lying area of Farnham Park which is directly adjacent to a 1/3 mile stretch of Kaighn Avenue. Road closing events due to flooding number between 15 – 18 times annually. In addition, the vertical alignment of Kaighn Avenue, as a result of topography, plays a role in the continued flooding. Over time high tides and regular rain fall have led to total washout, undermining the road structure and severe ice wedging. Non-motorized transportation challenges include the sidewalk and multiuse trail being in severe disrepair or continually washed out. This trail provides access to Farnham Park and The Circuit connecting users to Philadelphia and the regions trail.

<i>Program/Project Name</i>	<i>Project ID Numbers: D1914 / 193770</i>
Mount. Ephraim Avenue Safety Improvements, Ferry Avenue (CR 603) to Haddon Avenue (CR 561)	

The extent of parking lanes hampers pedestrian visibility/crossings and the lack of shoulders makes bicycling along the corridor undesirable and unsafe. Project limits are broken out into 3 sections: Section 1- Pine Street to the north of Mt. Vernon Street is currently one lane in the northbound direction and two lanes in the southbound direction and parking on the east side of the roadway. The preferred alternative will provide one lane in each direction with bicycle lanes on both sides and parking on the east side.

Section 2- Chestnut Street to Decatur Street is currently one lane in each direction with parking on both sides. The preferred alternative will provide one shared lane (with bicycle) and parking on both sides.

Section 3- Dayton Street to Ferry Avenue is currently two lanes in each direction. The preferred alternative will provide one lane in each direction with bicycle lanes on both sides and parking on the east side. The existing roadway width and sidewalk width in Section 3 will be maintained but roadway width will be reduced to increase the sidewalk width, on the easterly side by two feet in Sections 1 and 2.

The alternative will also install curb extensions (bulb-outs) at every corner through the corridor, to improve visibility of pedestrians and reduce pedestrian crossing distances, except where driveways and / or bus stops limit their installation, with ADA compliant ramps. Parking and bicycle lanes would be striped for delineation. 12 additional on-street parking spaces will be created.

New Jersey Regional Signal Retiming Initiative	

This project reduces congestion and improves air quality by optimizing progression on signalized 500 and 600 routes in DVRPC’s New Jersey counties. These improvements are designed to enhance mobility and promote integrated corridor management strategies. Corridors will be selected by representatives of DVRPC member governments, DVRPC, and NJDOT, with reference to the current Regional Transportation Operations Master Plan and other appropriate data. After obtaining supportive MOUs from signal owner-operators along a selected corridor, signal timing plans will be developed and implemented by consultants to DVRPC for peak hour, off-peak, weekend, event, and emergency operations, as appropriate. After implementation, signal system owner-operators will be responsible for maintaining the timing plan and implementing related physical improvements, if recommended

Route 30, Gibbsboro Road (CR 686)	

Initiated from the Safety Management System, the project will improve traffic safety at the intersection as part of the Intersection Improvement Program(IIP). Widening should address the need for dedicated left-turn lanes, and also address the need to improve the level of service by having two through-lanes that will be unencumbered by left-turning vehicles at the intersection

Route 30, Somerdale Road (CR 678)	

This project will improve safety and traffic operations at the signalized intersection. Symmetrical widening of Route 30 will provide one dedicated aligned left-turn lane on each approach to Somerdale Road. Traffic signals, lighting and ADA facilities will be upgraded to meet current standards. Pedestrian crosswalks will be restriped with 'ladder type' striping for improved visibility.
