

# **NJDOT CONCEPT DEVELOPMENT COMPLETE STREETS CHECKLIST (FOR LIMITED AND FULL SCOPE PROJECTS)**

## **Background**

The New Jersey Department of Transportation's (NJDOT) Complete Streets Policy promotes a "comprehensive, integrated, connected multimodal network by providing connections to bicycling and walking trip generators such as employment, education, residential, recreational and public facilities, as well as retail and transit centers." The policy calls for the establishment of a checklist to address pedestrian, bicyclist and transit accommodations "with the presumption that they shall be included in each project unless supporting documentation against inclusion is provided and found to be justifiable."

## **Complete Streets Checklists**

The following checklist is an accompaniment to NJDOT's Complete Streets Policy and has been developed to assist Project Managers and designers with ensuring Policy compliance. The checklist applies to all NJDOT projects that undergo the Capital Project Delivery (CPD) Process except those that are deemed exempt from Complete Streets Policy requirements. The checklist should be completed during the earliest stages of the Concept Development Phase to ensure pedestrian and bicycle considerations are included in the project budget. The Project Manager is responsible for completing the checklist and must work with the designer to ensure that the checklist has been completed as a condition of the advancement of the Full Scope project to Preliminary Engineering and the Limited Scope project to Final Design.

# Using the Complete Streets Checklists

## Instructions:

For projects that are determined to be exempt, please complete the certification on page 2 and seek BSBPP's concurrence.

- For **Limited Scope** Complete Streets Checklist, please complete **page 3–4, sign, and date last page of the document**.
- For **Full Scope** Complete Streets Checklist, please complete **pages 5–7, sign, and date last page of the document**.
- For each box checked, please provide a brief description, and include documentation to support your answer for how the item is addressed (YES), not addressed (NO), not applicable (N/A), or needs further investigation (NFI).

The Complete Streets Checklist is a tool to be used by Project Managers and designers during the early stages of a project delivery phase to ensure that all developed alternatives reflect compliance with the Policy. When completing the checklist, a brief description is required for each “**Item to be Addressed**” as a means to document that the item has been considered and can include supporting documentation.
