GASB 75 Accounting Results For the Fiscal Year Ending June 30, 2024

Measurement Date June 30, 2023

Introduction

This report documents the results of the actuarial valuation for the fiscal year ending June 30, 2024 of the State Health Benefits Program (Local Government) for the State of New Jersey. The plan is a single-employer plan and does not issue a separate financial statement. As a result, all reporting requirements are included in the employer's financial statement. These results are based on a Measurement Date of June 30, 2023. The information provided in this report is intended strictly for documenting information relating to company and plan disclosure and reporting requirements.

Determinations for purposes other than the financial accounting requirements may be significantly different from the results in this report. Thus, the use of this report for purposes other than those expressed here may not be appropriate.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the financial accounting and reporting requirements under U.S. Generally Accepted Accounting Principles as set forth in Government Accounting Standards Board Statement 75 (GASB 75) including any guidance or interpretations provided by the Company and/or its audit partners prior to the issuance of this report. The information in this report is not intended to supersede or supplant the advice and interpretations of the State of New Jersey's auditors. Additional disclosures may be required under GASB 74.

A valuation model was used to develop the liabilities for this valuation. The valuation model relies on ProVal software, which was developed by Winklevoss Technologies, LLC. Experts within Aon selected this software and determined it is appropriate for performing valuations. We coded and reviewed the software for the provisions, assumptions, methods, and data of the State Health Benefits Program (Local Government).

The valuation model outputs various cost scenarios. The "1% increase" and "1% decrease" interest rate scenarios vary only the discount rate assumption, in order to illustrate the impact of a change in that assumption in isolation. In practice, certain other assumptions, such as the expected or realized asset returns, would also be expected to vary when the discount rate changes. Therefore, the output from these scenarios should be used solely for assessing the impact of the discount rate in isolation and may not represent a realistic set of results for other purposes.

The "1% increase" and "1% decrease" healthcare cost trend scenarios vary only the healthcare cost trend assumption, in order to illustrate the impact of a change in that assumption in isolation. Therefore, the output from these scenarios should be used solely for assessing the impact of the healthcare cost trend in isolation and may not represent a realistic set of results for other purposes.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to (but not limited to) such factors as the following:

- Plan experience differing from that anticipated by the economic or demographic assumptions;
- Changes in actuarial methods or in economic or demographic assumptions;
- Increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and
- Changes in plan provisions or applicable law.

Due to the limited scope of our assignment, we did not perform an analysis of the potential range of such future measurements.

Funded status measurements shown in this report are determined based on various measures of plan assets and liabilities. For entity and plan disclosure and reporting purposes, funded status is determined using plan assets measured at market value. Plan liabilities are measured based on the interest rates and other assumptions summarized in the Actuarial Assumptions and Methods section of this report.

These funded status measurements may not be appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations, and funded status measurements for State of New Jersey and plan disclosure and reporting purposes may not be appropriate for assessing the need for or the amount of future contributions. In conducting the valuation, we have relied on personnel, plan design, health care claim cost, and asset information supplied by State of New Jersey as of the valuation date. While we cannot verify the accuracy of all the information, the supplied information was reviewed for consistency and reasonableness. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

The actuarial assumptions and methods used in this valuation are described in the Actuarial Assumptions and Methods section of this report. State of New Jersey selected the economic and demographic assumptions and prescribed them for use for purposes of compliance with GASB 75. Aon provided guidance with respect to these assumptions, and it is our belief that the assumptions represent reasonable expectations of anticipated plan experience.

The undersigned are familiar with the near-term and long-term aspects of OPEB valuations and collectively meet the Qualification Standards of the American Academy of Actuaries necessary to render the actuarial opinions contained herein. The information provided in this report is dependent upon various factors as documented throughout this report, which may be subject to change. Each section of this report is considered to be an integral part of the actuarial opinions.

To our knowledge, no colleague of Aon providing services to State of New Jersey has any material direct or indirect financial interest in State of New Jersey. Thus, we believe there is no relationship existing that might affect our capacity to prepare and certify this actuarial report for State of New Jersey.

Allocations to Special Funding and Non-Special Funding

GASB 75 requires an allocation of results between those active employees and retirees subject to Special Funding agreements and those not subject to Special Funding agreements. Special Funding and Non-Special Funding Net OPEB Liability is allocated between Special Funding and Non-Special Funding based on the percentage of Total OPEB liability for each as of June 30, 2022 and June 30, 2023. OPEB expense (before adjustment for change in proportion) and deferred outflows and inflows (excluding change in proportion) are allocated between Special Funding and Non-Special Funding based on the percentage of Total OPEB Liability for each as of June 30, 2023. The Total OPEB Liability is generated from the valuation separately for Special Funding and Non-Special Funding. The June 30, 2023 Total OPEB Liability splits are rolled-forward on an expected basis, and trued-up to the combined Total OPEB Liability. This true-up is necessary because actual benefit payments are used to roll-forward the Total OPEB Liability. The following table shows the Total OPEB Liability and Headcounts split by Special Funding and Non-Special Funding:

	Measurement Date 6/30/2022	Measurement Date 6/30/2023

Notes to Schedule:

Benefit Changes: The \$23,039,435 increase in liability from June 30, 2022 to June 30, 2023 is due to employers adopting and or changing Chapter 48 provisions.

Differences Between Expected and Actual Experience: The \$2,123,324,632 decrease in liability from June 30, 2022 to June 30, 2023 is due the combined effect of the following:

Update in census information	(\$131,661,850)
Net effect of local entities joining and terminating between June 30, 2022 and June 30, 2023	(1,858,883,869)
Premium and Claims Experience	<u>(132,778,913)</u>
Total	(\$2,123,324,632)

Changes in Assumptions: The \$255,103,873 increase in the liability from June 30, 2022 to June 30, 2023 is due to the combined effect of the following:

Trend Update	\$491,371,690
Discount Rate Change	<u>(236,267,817)</u>
Total Changes in Assumptions	\$255,103,873

Health Care Claims Development

Claims Cost Development

PPO and HMO medical and prescription drug incurred claims are based on actual incurred claims experience from January 2022 through December 2022 reflecting paid claims runout through March 2023. EGWP revenue amounts are developed for Plan Years 2023 and 2024, based on information provided by Optum. Projected incurred claims used to develop projected claims amounts include claims that are assumed to be incurred but not reported. Claims are trended and adjusted for plan design changes in effect for Plan Years 2023 and 2024.

The PPO and HMO costs assumed in the GASB 74 and 75 valuations are based on the actual distribution of retirees among available plan options.

Claim costs for future retirees are based on a blend of the claim costs for current retirees and the assumed percentage of future retirees who elect the PPO or HMO plan options. This blend consists of 90% of the current retiree PPO costs and 10% of the current retiree HMO costs.

Trend Rate Development

Prescription drug trend rates are adjusted to reflect expected pharmacy costs for pre-Medicare retirees through the end of 2024 to reflect higher utilization of GLP-1 drugs that is not yet reflected in the plan's experience used for developing the claims cost assumption. Trends were not adjusted for Medicare-eligible retirees because Medicare populations have generally shown less of an impact and any increased cost is expected to be largely offset by increased manufacturer discount and federal reinsurance payments.

The Inflation Reduction Act (IRA)

The projection of Part D revenue and costs for 2024 reflects changes to the Part D program including the impact on the direct subsidy based on national average bid and beneficiary premium results released by the Centers for Medicare and Medicaid Services (CMS) in late July. Part D revenue and costs have not been adjusted for the benefit structure changes in the Inflation Reduction Act (IRA) that will become effective in 2025. While many elements of the IRA are expected to impact both the revenue and cost associated with Medicare Part D plans, there is significant uncertainty in terms of the net impact of all these changes. While the effect of some changes may be more easily estimated, such as the change in plan design, the manufacturer discount program, and federal reinsurance, specific items are dependent upon market reactions that are unpredictable and unknown at this time. For example:

- CMS has indicated that the pharmacy risk adjustment model will be updated for 2025
- The impact on national bid amounts for Part D plans (including individual market plans), which are a primary factor in the determination of the direct capitation payment component of Part D revenue that is expected to offset in part, or in whole, the reduction in federal reinsurance under the Act.

Prescription drug costs and trends have not been adjusted for the provisions introduced in the Inflation Reduction Act (IRA) related to drug negotiation or manufacturer rebate for certain drugs with prices increasing faster than inflation. There is significant uncertainty about how manufacturers will react to these provisions in drug pricing policy and any Part D inflation rebates generated by that policy will be paid to Medicare rather than to plan sponsors.

Withdrawal Rates	See Table
Disability Rates	See Table
Spouse Coverage Election Rate	Spouses are assumed to lose coverage upon the death of the former employee. While spouses may participate in the SHBP at an unsubsidized rate, we have assumed they will not participate. The State provided data for spouses of police officers killed in the line of duty who are assumed to receive retiree health care benefits for life.
Future Retirees	It is assumed that 55% are married. Future retirees who are assumed to be married are assumed to choose family coverage at retirement. Males are assumed to be three years older than their female spouses.
Current Retirees	Spousal coverage is based on actual retiree coverage elections. Males are assumed to be three years older than their female spouses.

Coverage	<p>It is assumed that:</p> <ul style="list-style-type: none"> ▪ 100% of all retirees who currently have healthcare coverage will continue with the same coverage ▪ 100% of all actives, upon retirement, will be assumed to have the following coverage blend: <ul style="list-style-type: none"> PPO: 90% HMO: 10% <p>Other available plan options are assumed to garner zero enrollment</p>
Participant Contributions for Current Retirees	<p>Actual contribution amounts were provided by the State for current healthy and disabled retirees who contribute towards the cost of their postretirement health care benefits. The Chapter 78 contribution percentages for healthy retirees were determined based on the actual contributions received from the State and each retiree's plan election. Actual contribution data provided by the State for current retirees that receive subsidized benefits under a local employer Chapter 48 resolution has been reflected.</p>
Valuation Methodology and Terminology	<p>We have used the GASB accounting methodology to determine the postretirement medical benefit obligations. Under the EGWP program, the Medicare reimbursements to the Plan will be shown as a reduction in the plan sponsor liability.</p>

Data Adjustments

During the course of our review of the census data provided by the State, reasonable adjustments were made to the census data resulting from conversations with the State.

The Total OPEB Liability as of June 30, 2023 reflects an adjustment for the deletion of 11,239 enrolled counts due to the net effect of local entities joining and terminating from the SHBP between June 30, 2022 and June 30, 2023.

Where an employee is eligible for different employer subsidies due to that employer adopting various resolutions, a hierarchy of how the resolutions would apply to those subsidies was established based upon the employee meeting certain grandfathering and eligibility rules. In general the hierarchy is Chapter 88, Chapter 48 and then Chapter 330. There is one notable exception to this logic for the limited number of members of PFRS who are both eligible for Chapter 48 with a limited period and Chapter 330. In that case, Chapter 330 provisions were valued as that is the benefit that is available for the entire period.

If an employer is listed as “non-participating” and has a special funding situation (Chapter 330/271) the following will occur:

- For all active PFRS under Chapter 330, we will assume that they may become eligible for retiree benefits if they meet the service criteria. All assumptions regarding election coverage rates will be the same as a PFRS member in a participating location.
- Although small, a PFRS active employee of a non-participating employer could have a potential liability under Chapter 271 and is included in the valuation.
- All current retirees reflected in the census data will be included and valued as long as they are not indicated as “self-paying,” regardless of the participating status of their employer or whether or not a special funding situation exists.

Medical and Prescription Drug Benefit Contributions for Current Retirees and Grandfathered Future Retirees Under Chapter 78

Individuals who pay 100% of the plan cost are excluded from the valuation results.

For retirees receiving subsidized SHBP benefits and future retirees who are currently in retirement status as of July 1, 2011, or have at least 20 years of service as of July 1, 2011, we will apply average contribution rates to the population. Based on the reporting in published SHBP financial reports, the average contributions are as follows:

Local Government: 5% of cost

Certain future retirees will pay 1.5% of pension for retiree medical coverage, unless they participate in the New Jersey Retirees' Wellness Program. The valuation assumes that 100% of future retirees will participate in the Wellness Program and, therefore, avoid paying the contribution rates for coverage.

Single premiums are a weighted average of PPO and HMO premiums. Family premiums reflect the current enrollment distribution of Married, Family, and Parent premiums, as well as the PPO/HMO blend.

Medical and Prescription Drug Benefit Contributions for Non-Grandfathered Future Retirees (who are subject to retiree contributions under Chapter 78)

Future retirees, who do not have at least 20 years of service as of July 1, 2011 are expected to pay an amount equal to their Contribution Rate times the plan's gross premiums. In no event shall the contribution be less than 1.5% of the Retirement Allowance. The Contribution Rate is based on type of coverage (single or family) and the Retirement Allowance.

Medical and Prescription Drug Benefit Contributions for Future Disabled Retirees

All future disabled retirees are assumed to contribute 1.5% of their Retirement Allowance.

Retirement Allowance

Retirement Allowance is assumed to be the annual annuity from the State of New Jersey pension plan:

<i>Public Employees' Retirement System (PERS)</i>	Final Compensation times service at retirement divided by 55
<i>Police and Firemen's Retirement System (PFRS)</i>	Special Retirement Benefit: 65% of Final Compensation plus 1% of Final Compensation for each year of credited service over 25, subject to a maximum of 70% of Final Compensation

Medical and Prescription Drug Benefit Contributions Under Chapter 330

Local police and firemen who retire from participating local employers subject to Chapter 330 are assumed to receive a subsidy equal to 80% of the cost of the lowest available plan, excluding high deductible health plans. A list of the local employers which are subject to Chapter 330 and current retirees who contribute under Chapter 330 were provided by the State and are reflected in the valuation.

The premium rates below summarize the lowest cost plan premium rates for Plan Year 2023 adjusted to the valuation date used for retiree contributions under Chapter 330.

Medical Cost Group	Pre 65		65 and Over	
	Single	Family	Single	Family
Local Government	\$10,761	\$24,058	\$1,737	\$3,937

A list of local government employers who are subject to Chapter 330 is provided in the "Plan Provisions" section of the report.

Medical and Prescription Drug Benefit Contributions Under Chapter 48

Certain local employers which have adopted special agreements under Chapter 48 may provide retiree health benefits with differing retiree contributions, dependent eligibility, and benefit provisions. The valuation reflects the provisions of Chapter 48 resolutions adopted by local employers which provide retiree health benefits under the SHBP.

Local employers which have adopted a Chapter 48 resolution may also be subject to Chapter 78 contributions. It is assumed that for all employers which have adopted a Chapter 48 resolution, contributions under Chapter 78 constitute a minimum required retiree contribution amount.

A list of local government employers and their provisions under Chapter 48 are provided in the "Plan Provisions" section of the report.

Discussion of Actuarial Assumptions and Methods

State of New Jersey selected the economic, demographic and health care claim cost assumptions and prescribed them for use for purposes of compliance with GASB 75. Aon provided guidance with respect to these assumptions, and it is our belief that the assumptions represent reasonable expectations of anticipated plan experience. Retirement, withdrawal, and disability rates as well as assumed salary increases were developed by the PERS experience study for the period July 1, 2018 to June 30, 2021 and the PFRS experience study for the period July 1, 2018 to June 30, 2021. An evaluation of the reasonability of these assumptions is beyond the scope of the assignment.

Calculation of Normal Costs and Liabilities

The method used to calculate the service cost and accumulated postretirement benefit obligation for determining OPEB expense is the entry age normal cost method. Under this cost method, the actuarial accrued liability is based on a prorated portion of the present value of all benefits earned to date over expected future working lifetime as defined by GASB. The proration is determined so that the cost with respect to service accrued from date of hire is recognized as a level percentage of pay each year. The Normal Cost is equal to the prorated cost for the year of the valuation.

Accounting Information Under GASB 75

Benefit obligations and expense/(income) are calculated under U.S. Generally Accepted Accounting Principles as set forth in Government Accounting Standards Board Statement 75.

The total OPEB liability represents the actuarial present value of benefits based on the entry age normal cost method as of the measurement date. The service cost represents the actuarial present value of benefits that are attributed to the 2024 fiscal year, reflecting the effect of assumed future health care claim cost and/or pay increases.

The OPEB expense is the annual amount to be recognized in the income statement as the cost of OPEB benefits for this plan for the period ending June 30, 2024.

Plan Provisions

Program Eligibility for Retired Group Coverage

The following individuals will be offered Program's Retired Group coverage for themselves and their eligible dependents:

- Full-time State employees, employees of State colleges/universities, autonomous State agencies and commissions, or local employees (including benefits-eligible Local Education employees of non-participating Local Education employers) who were covered by, or eligible for, the SHBP at the time of retirement.
- Part-time State employees and part-time faculty at institutions of higher education that participate in the SHBP if enrolled in the SHBP at the time of retirement.
- Spouses of police officers who die in the line of duty receive fully-subsidized retiree health benefits for life.

The following subsections outline the eligibility for retirement (that would qualify a retiree for subsidized SHBP Program benefits) for the various groups of State employees. Service under multiple Retirement Systems can be aggregated for purposes of Program's benefit eligibility.

Public Employees' Retirement System Members

(i) In General for subsidized SHBP Benefits

Service Retirement	Eligible at age 60 with 25 years of service.
Early Retirement	Eligible after 25 years of service prior to age 60.
Ordinary Disability Retirement	Eligible after 10 years of service and total and permanent disability.
Accidental Disability	Eligible upon total and permanent disability as a result of a duty injury.

(ii) Law Enforcement (Chapter 330, P.L. 1997)

In General for subsidized SHBP Benefits

Service Retirement	Eligible at age 55 after 25 years of service.
Chapter 4, P.L. 2001 Special Retirement	Completion of 25 years of service.
Ordinary Disability	Eligible after 5 years of service and total and permanent disability.

(iii) Legislators

In General for subsidized SHBP Benefits

Service Retirement	Eligible at age 60 and 25 years of service.
Early Retirement	Attainment of 25 years of service prior to age 60.
Ordinary Disability Retirement	Eligible after 10 years of service and total and permanent disability.
Accidental Disability	Eligible upon total and permanent disability as a result of a duty injury.

(iv) Prosecutors Part (Chapter 366, P.L. 2001)

In General for subsidized SHBP Benefits

Service Retirement	Eligible after age 55 and 25 years of service.
Special Retirement	After completion of 25 years of service.
Ordinary Disability Retirement	Eligible after 10 years of service and total and permanent disability.
Accidental Disability	Eligible upon total and permanent disability as a result of a duty injury.

(v) Workers' Compensation Judges Part (Chapter 259, P.L. 2001)

Service Retirement	(A) Mandatory retirement at age 70. Voluntary retirement prior to age 70 as follows: <ul style="list-style-type: none"> (a) Age 70 and 10 years of service as a Workers' Compensation Judge; (b) Age 65 and 15 years of service as a Workers' Compensation Judge; or (c) Age 60 and 20 years of service as a Workers' Compensation Judge.
	(B) Age 65, with 5 consecutive years of service as a Workers' Compensation Judge and 15 years in the aggregate of public service; or Age 60, with 5 consecutive years of service as a Workers' Compensation Judge and 20 years in the aggregate of public service.

Plan Provisions (continued)

In General for subsidized SHBP Benefits	Attainment of 25 years of service and Service Retirement eligibility.
Early Retirement	Prior to age 60, with 5 consecutive years of service as a Workers' Compensation Judge and 25 years or more in the aggregate of public service.
Ordinary Disability Retirement	Eligible after 10 years of service and total and permanent disability.
Accidental Disability	Eligible upon total and permanent disability as a result of a duty injury.

Police and Firemen's Retirement System Members

Enrollment is restricted to eligible policemen and fireman who are permanent and full-time and who pass the physical and mental fitness requirements. The maximum enrollment age is 35.

In General for subsidized SHBP Benefits

Service Retirement	Eligibility means age 55 and 25 years of service. Mandatory at age 65.
Special Retirement	After completion of 25 years of service.
Ordinary Disability Retirement	A Member is eligible for Ordinary Disability Retirement if he (she) has 4 years of Service and is totally and permanently incapacitated from the performance of usual or available duties.
Accidental Disability Retirement	A Member is eligible upon total and permanent incapacitation from the performance of usual and available duties as a result of injury during the performance of regular duties.
Special Disability Retirement	A Member is eligible for Special Disability Retirement if he (she) has 5 years of Credited Service, is under age 55, and has received a heart transplant.
