For November 2005 General Election

PUBLIC QUESTION NO. 1

CONSTITUTIONAL AMENDMENT TO ESTABLISH THE OFFICE OF LIEUTENANT GOVERNOR

Shall the amendment of Articles II, IV, V and XI of the Constitution, agreed to by the Legislature, establishing the office of Lieutenant Governor, and providing for the term, election, succession, salary, qualifications, and duties of the office, and for an interim succession to be employed in the event of a vacancy in the office of the Governor before the election of the first Lieutenant Governor, be adopted?

Interpretive Statement

Approval of this amendment would establish the office of Lieutenant Governor. Candidates for the offices of Governor and Lieutenant Governor would be elected as joint candidates in the general election. The Lieutenant Governor would serve as acting Governor during brief periods when the Governor is absent from the State or unable to serve and would become Governor in the event of a vacancy in the office of Governor. The Lieutenant Governor would perform other duties as assigned by the Governor or by law. The first Lieutenant Governor would be elected at the general election held in 2009. In the event of a permanent vacancy in the office of the Governor occurring before the inauguration date of the first Lieutenant Governor, the President of the Senate, followed by the Speaker of the General Assembly, would become Governor, rather than acting Governor. A vacancy would be created in the Legislature if the Senate President or Assembly Speaker becomes Governor, to be filled in the manner currently provided by the Constitution.

PUBLIC QUESTION NO. 2**CONSTITUTIONAL AMENDMENT TO EXPAND USES OF DEDICATED TAX REVENUE TO FUND AIR POLLUTION CONTROL AND ADMINISTRATIVE COSTS OF THE UNDERGROUND STORAGE TANK PROGRAM**

Shall the amendment to Article VIII, Section II, paragraph 6 of the Constitution of the State of New Jersey, expanding the authorized uses of the constitutionally dedicated Corporation Business Tax revenue: (1) to allow the use of 17% of the dedicated funds for 10 years, to pay for providing grants for the costs of air pollution control equipment to reduce particulate matter emissions from diesel-powered engines, funding for other measures to reduce human exposure to those emissions, and for no more than \$1,150,000 in associated State administrative costs, (2) to allow the use of no more than \$1,000,000 per year for State administrative expenses for the underground storage tank program, and (3) to allow an appropriation as the Legislature may provide up to \$10,000,000 from the preceding unexpended balances dedicated and appropriated for the underground storage tank program to provide grants for cost of air pollution control equipment to reduce particulate matter emissions from diesel-powered engines, and funding for other measures to reduce human exposure to those emissions, be approved?

Interpretive Statement

Since 1996, 4% of the annual revenue from the Corporation Business Tax has been constitutionally dedicated to fund environmental programs. Approval of this constitutional amendment would (1) expand the authorized uses of those revenues to provide grants for the costs of air pollution control equipment to reduce particulate matter emissions from diesel-powered engines, and funding for other measures to reduce human exposure to those emissions, and (2) change the allocation of funds for the existing authorized uses. The Constitution currently allocates one-half for hazardous discharge cleanup performed by the State, a minimum of one-sixth or a minimum of \$5,000,000 for water quality projects, and a minimum of one-third for funding loans or grants for underground storage tank upgrades, replacements, closures and remediations, loans or grants to remediate hazardous substance discharges, and for an underground inspection program. This constitutional amendment would reduce the allocation for hazardous discharge cleanup by the State to 33% for ten years, allocate 17% for that period for grants for air pollution control programs, and would allow up to \$1,150,000 per year of that 17% allocation to be used for the State's associated administrative costs. Also, this amendment would allow the use of no more than \$1,000,000 per year for State administrative expenses for the underground storage tank program, and would allow an appropriation by the Legislature of up to \$10,000,000 from the preceding unexpended balances dedicated and appropriated for the underground storage tank program to provide grants for cost of air pollution control equipment to reduce particulate matter emissions from diesel-powered engines, and funding for other measures to reduce human exposure to those emissions.
