COMMENTS:

The thumbdrive in one of the 4 machines in Frelinghuysen didn't read into the Electionware results software on election night. We are working with ES&S to determine the best redundent method to use to extract the results and input them into the system. This should be resolved by 6/12/25.   Also, while we received a small amount of VBM's into the SVRS today it appears that our numbers in the "Received into SVRS" column have decreased since yesterday.   I attribute this to tired, blurry-eyed 18 hour work day operator error. Today's numbers are correct.
